Subject: Important Meeting for Melrose BID Property & Business Owners

---

Good Morning Melrose BID Property & Business Owners

After the devastating impacts of COVID-19 and the recent civil unrest on Melrose area businesses and already dilapidated City infrastructure, the Melrose BID, StreetsLA (a City Department), Mid City West Community Council, and others have identified a State Grant to improve the business community and surrounding neighborhoods just in time for the Olympics. Unfortunately, the State grant application timeline is short and there may not be any future funding. Despite this problem, project proponents decided to initiate as much of a public outreach effort as possible with the promise to continue it if the grant funding is awarded. An important element of the project is that neighborhoods around Melrose will have the opportunity to identify, and specify needed measures to protect their side streets from adverse impacts. It is also important to note that these grant funds may only be used for certain purposes as described in the State approved measure that provides the funding.

This is a long way of saying that there is an important virtual public Meeting scheduled for Wednesday, August 26 at 6:30 PM. It is important that all Melrose area property and business owners, residents, and other stakeholders attend. The link below will take you to the StreetsLA website for this project, which will have a link to the online meeting for Wednesday.

Please join the Bureau of Street Services (StreetsLA) on **Wednesday, August 26th at 6:30 pm** - for a **Virtual Community Meeting** to learn more about the **Uplift Melrose Proposal**.

Working with the BID, neighbors, business owners, tenants, Council District 5, and others in the community around Melrose Avenue, StreetsLA has identified exciting and transformative improvements to the streetscape between Fairfax and Highland Avenues to Uplift Melrose and activate safe public space on the streets of LA. The plan will slow traffic down on Melrose, widen sidewalks, add safe bike lanes and crosswalks, new lighting, and create a much better overall pedestrian experience.

This meeting will be your opportunity to gain a better understanding of the project proposal and have your voice heard. If the Uplift Melrose Proposal is approved by the community, StreetsLA will be submitting a competitive grant application in September, for State funding in the amount of approximately $50 million dollars.

Good Afternoon Mathew...

You've probably received this meeting notice several times at this point. The Melrose BID believes that this Uplift Melrose improvement project is exactly the kind of project that Melrose Elementary School families would want to see implemented to benefit their families and school. It's unfortunately, probably the only significant funding we can hope to see for the foreseeable future and it's uses are really limited by the terms of the State funding measure that adopted it. Can you get the word out to your parents and staff? They should log on and take the survey and attend the virtual meeting on August 26 @ 6:30 PM. Everyone should participate, including school staff.

Let me know how we can assist in any way. Is it possible for us to talk on Monday?

PS - We intend to use this project as a way to re-energize our discussions with LAUSD for after hours valet parking use of at least a portion of the school site with revenues to go to Melrose Elementary.

---

Good Afternoon Jeff...

I was able to catch up to Pastor Mark yesterday and only then did I find out about his retirement. Well deserved. He was a great leader for the Church. We will miss him. He directed me to you with this important email / meeting invitation for Wednesday evening.

We need to get Church members and staff to become informed and vote on the Uplift Melrose Project that the Melrose BID, the City, and others have been working on. The BID Board believes that this Uplift Melrose improvement project is exactly the kind of project that Hope Lutheran Church families would want to see implemented to benefit their families and church. It's unfortunately, probably the only significant funding we can hope to see for the foreseeable future and it's uses are really limited by the terms of the State funding measure that adopted it. Can you get the word out to your members and staff? They should log on as noted below and take the survey and attend the virtual meeting on August 26 @ 6:30 PM. Everyone should participate, including church staff.

Can you connect me by email with the current President and possibly Bill De Generis? This project could well be the way for us to address the parking issues we talked about with former church President (can't remember her name), Board Member Halbert, and Pastor Mark. We should not let this opportunity slip through our fingers.

Let me know how we can assist in any way. Is it possible for us to talk on Monday? Thank Jeff.

Re: Torah Ohr Supports Project Uplift Melrose

Honorable Council Member Koretz:

The congregation at Torah Ohr is writing you today to show our support for the Uplift Melrose Project. This project, which will bring necessary improvements to Melrose, is long overdue. What a wonderful idea to make Melrose safer by reducing traffic speed, extending sidewalks, creating protected bicycle lanes, increasing lighting for safety, among other noted improvements that are showcased in the project brief.

As residents of the area, we know that the area has needed improvements for quite some time. You now have the opportunity to make a lasting impact in our community. On behalf of our entire congregation, we ask that you support the City's ATP Grant application for the Uplift Melrose Project.

Looking forward to hearing positive movement.

Sincerely,

Torah Ohr

Debbie, Via various sources (Mid City NC, Melrose BID etc) I heard about the "Melrose Avenue Active Transportation Project." It's an ATP grant being put forward by BSS and Dept of Transportation i believe. The commentary deadline is Sept 15th so GWNC is weighing putting it straight on the agenda for next Wednesday. From what i can tell, this is a tall glass of cool water in the socioeconomic drought of the last 4 months. The prospect of tree canopy and a revitalization of Melrose between Fairfax and Highland is something I have been pining for since I moved here. That said, I wanted to know if the Council Office has taken an official position on this yet? Best (and hope you are well!) Philip Farha Chair Land Use Committee Board Member Area 8 (Melrose)

Hi Philip, nice to hear from you. I am including the project manager/designers, Alexander and Jeff. If you can do it, we'd love to get this on your agenda for next week. It is an exciting concept for sure. The Councilmember is interested in this but he and our StreetsLA staff want to see pretty strong community support, even within this short time frame. You may have heard about the PeopleStreet grant the Melrose BID was awarded last year for a plaza at Stanley/Melrose, which, due to strong public opposition, they ended up returning.

We want to avoid that type of a situation here, even as we know this is not the same. It is a huge grant, however, and would impact the entire community, so before we get too deep into an application, we need to know we have enough support.

i hope that helps clarify things,
Debbie

Debbie / Alex /Jeff,

It was unfortunate that the Melrose BID didn't think of this for East of Highland :) We might well have actually welcomed a Plaza! There are plenty of people who live, walk (and now work) in their neighborhood. The prospect of a well-envisioned street is long overdue.

I wish i had more time to garner support for this but i don't. The last few months have been brutal for everybody but especially so for Melrose. It had been thriving against all odds until the combination of pandemic plus social unrest.

Some of the small spots are trying their darnedest to keep on - even under such heavily restricted conditions. Baker Amy Taylor's pastries at Oui Cafe have been feeding the neighborhood since March. Standings Butcher's -pricier than gold- have seen socially distant lines out the front.
Even the newer smaller Melrose Mac store is hanging in there.

I will do the best i can to help push this forward. I will need some documentation in order to fast track a motion at our next meeting on Wednesday.
Could you send me something? It doesn't have to be completely detailed but pictures would be lovely.
Normally this would go to Committee first but this is timely. Because the Board agenda is already loaded, there may not be time for a proper presentation. I will still try to get support but if Members balk at the short notice, we might have to hold a 'Special Meeting.'

In that case, I would love Alex and Jeff to present it themselves. We could set the date in time for Sept 15th.

Many thanks,
p

Subject: Re: Melrose Avenue Active Transportation Project

---

Good Afternoon Philip,
My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project (Uplift Melrose). I am including the Project Lead Jeff Palmer on this email as well. We would like to request to be put on your August 12th 7:00 pm Agenda for the Greater Wilshire Neighborhood Council Meeting, to present the proposed changes to Melrose Avenue and gain feedback from the community on the concept. We are applying for additional grant funding and the application is due September 15th, 2020. All community outreach will be occurring in a very short window of time.

The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.

A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- Application Due September 15th, 2020 (Uplift Melrose). We are seeking funding of approximately 40-50 million dollars.

**Project information**
The scope of the proposed Melrose Avenue Active Transportation Streetscape Project (Uplift Melrose) is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project (Uplift Melrose) is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe

and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way.

**Visuals and Graphics**

**a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and hearing more information on the proposed project. This flyer will be completed by today and we will share with your group, for the August 12th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 12th meeting and any subsequent community outreach meeting

**Voting on the Concept and Gaining Project Feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meetings as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

If there are other questions in the interim, please let us know.

Thank you,

**Alexander J. Caiozzo**
***Until further notice, Design-Build staff will be working remotely. Please be assured services to the City and our residents will continue in the safest manner possible.***

The commentary deadline is Sept 15th so GWNC is weighing putting it straight on the agenda for next Wednesday.

From what i can tell, this is a tall glass of cool water in the socioeconomic drought of the last 4 months. The prospect of tree canopy and a revitalization of Melrose between Fairfax and Highland is something I have been pining for since I moved here. That said, I wanted to know if the Council Office has taken an official position on this yet?

Best (and hope you are well!)

Alex,

I greatly welcome your presentation on this project. As you may know, Melrose Is “my” area and our area has been Facing a list of hardships.

However, the Board agenda on 8/12/2020 Is already too full for this to be adequately heard. In addition, the GWNC always wants projects to be vetted in Committee first.

I would suggest this:

1. Please do announce the project As a Govt item on 8/12/2020. It will not be voted on then and you won’t have more than 5 min (less likely) to do so. Short and sweet.

2. Properly present the project at our next Land Use Committee meeting on 8/25/2020. This will allow you to assemble your materials and me to spread the word and get some neighborhood outreach. Hopefully, we can Vote on this then and there.

3. If the project were to be supported, I could draft a letter for your application affirming preliminary support pending Board approval. The next Board meeting is on 9/9/2020.

Like this, the Board will have been introduced to the project, know that it's committee vetted it properly and can vote on the matter in good conscience.

Please let me know if you would be amenable to this?

Best
Philip Farha

I am including the Project Lead Jeff Palmer on this email as well. We would like to request to be put on your August 12th 7:00 pm Agenda for the Greater Wilshire Neighborhood Council Meeting, to present the proposed changes to Melrose Avenue and gain feedback from the community on the concept. We are applying for additional grant funding and the application is due September 15th, 2020. All community outreach will be occurring in a very short window of time.
>
> The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.
>
> A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- Application Due September 15th, 2020 (Uplift Melrose). We are seeking funding of approximately 40-50 million dollars.
>
> **Project information**
> The scope of the proposed Melrose Avenue Active Transportation Streetscape Project (Uplift Melrose) is as follows:
>
> - Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
> - Curb extensions to reduce pedestrian crossing lengths for increased safety
> - Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
> - Approx. 4 acres of newly delineated pedestrian Public Space

- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project (Uplift Melrose) is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way.

**Visuals and Graphics**

**a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and hearing more information on the proposed project. This flyer will be completed by today and we will share with your group, for the August 12th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 12th meeting and any subsequent community outreach meeting

**Voting on the Concept and Gaining Project Feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meetings as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

If there are other questions in the interim, please let us know.

Thank you,

**Alexander J. Caiozzo**
***Until further notice, Design-Build staff will be working remotely. Please be assured services to the City and our residents will continue in the safest manner possible.***

Debbie / Alex /Jeff,

It was unfortunate that the Melrose BID didn't think of this for East of Highland :) We might well have actually welcomed a Plaza! There are plenty of people who live, walk (and now work) in their neighborhood. The prospect of a well-envisioned street is long overdue.

I wish i had more time to garner support for this but i don't. The last few months have been brutal for everybody but especially so for Melrose. It had been thriving against all odds until the combination of pandemic plus social unrest.

Some of the small spots are trying their darnedest to keep on - even under such heavily restricted conditions. Baker Amy Taylor's pastries at Oui Cafe have been feeding the neighborhood since March. Standings Butcher's -pricier than gold- have seen socially distant lines out the front.
Even the newer smaller Melrose Mac store is hanging in there.

I will do the best i can to help push this forward. I will need some documentation in order to fast track a motion at our next meeting on Wednesday.
Could you send me something? It doesn't have to be completely detailed but pictures would be lovely.
Normally this would go to Committee first but this is timely. Because the Board agenda is already loaded, there may not be time for a proper presentation. I will still try to get support but if Members balk at the short notice, we might have to hold a 'Special Meeting.'

In that case, I would love Alex and Jeff to present it themselves. We could set the date in time for Sept 15th.

Many thanks,
p

Good Afternoon Philip,
My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project (Uplift Melrose). I am including the Project Lead Jeff Palmer on this email as well. We would like to request to be put on your August 12th 7:00 pm Agenda for the Greater Wilshire Neighborhood Council Meeting, to present the proposed changes to Melrose Avenue and gain feedback from the community on the concept. We are applying for additional grant funding and the application is due September 15th, 2020. All community outreach will be occurring in a very short window of time.

The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.

A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- Application Due September 15th, 2020 (Uplift Melrose). We are seeking funding of approximately 40-50 million dollars.

**Project information**
The scope of the proposed Melrose Avenue Active Transportation Streetscape Project (Uplift Melrose) is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project (Uplift Melrose) is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way.

Good Afternoon Philip,
Thank you for your response to our email. See my responses in blue below:

1. Please do announce the project As a Govt item on 8/12/2020. It will not be voted on then and you won't have more than 5 min (less likely) to do so. Short and sweet.
StreetsLA: Can you please send me the meeting invite information for Wednesday August 12. We will be happy to do a quick announcement.

2. Properly present the project at our next Land Use Committee meeting on 8/25/2020. This will allow you to assemble your materials and me to spread the word and get some neighborhood outreach. Hopefully, we can Vote on this then and there.
StreetsLA: Can you please provide the meeting information for the Tuesday August 25 event. We will provide an informational flyer (see attached flyer we are using for other outreach events). If desired, we can also add the meeting link (Zoom, Google etc.) to the flyer. We look forward to presenting and getting feedback.

3. If the project were to be supported, I could draft a letter for your application affirming preliminary support pending Board approval. The next Board meeting is on 9/9/2020.
StreetsLA: A letter of support would be beneficial for the grant application - thank you.

Regards,

Alexander

Alex,

I greatly welcome your presentation on this project. As you may know, Melrose Is “my” area and our area has been Facing a list of hardships.

However, the Board agenda on 8/12/2020 Is already too full for this to be adequately heard. In addition, the GWNC always wants projects to be vetted in Committee first.

I would suggest this:

1. Please do announce the project As a Govt item on 8/12/2020. It will not be voted on then and you won’t have more than 5 min (less likely) to do so. Short and sweet.

2. Properly present the project at our next Land Use Committee meeting on 8/25/2020. This will allow you to assemble your materials and me to spread the word and get some neighborhood outreach. Hopefully, we can Vote on this then and there.

3. If the project were to be supported, I could draft a letter for your application affirming preliminary support pending Board approval. The next Board meeting is on 9/9/2020.

Like this, the Board will have been introduced to the project, know that it’s committee vetted it properly and can vote on the matter in good conscience.

Please let me know if you would be amenable to this?

Best
Philip Farha

On Aug 6, 2020, at 13:21, Alexander Caiozzo <Alexander.Caiozzo@lacity.org> wrote:

Good Afternoon Philip,
My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project (Uplift Melrose). I am including the Project Lead Jeff Palmer on this email as well. We

would like to request to be put on your August 12th 7:00 pm Agenda for the Greater Wilshire Neighborhood Council Meeting, to present the proposed changes to Melrose Avenue and gain feedback from the community on the concept. We are applying for additional grant funding and the application is due September 15th, 2020. All community outreach will be occurring in a very short window of time.

The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.

A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- Application Due September 15th, 2020 (Uplift Melrose). We are seeking funding of approximately 40-50 million dollars.

**Project information**
The scope of the proposed Melrose Avenue Active Transportation Streetscape Project (Uplift Melrose) is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project (Uplift Melrose) is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way.

**Visuals and Graphics**

**a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and hearing more information on the proposed project. This flyer will be completed by today and we will share with your group, for the August 12th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 12th meeting and any subsequent community outreach meeting

**Voting on the Concept and Gaining Project Feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meetings as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

If there are other questions in the interim, please let us know.

Thank you,

**Alexander J. Caiozzo**

>
> I wish i had more time to garner support for this but i don't. The last few months have been brutal for everybody but especially so for Melrose. It had been thriving against all odds until the combination of pandemic plus social unrest.
>
> Some of the small spots are trying their darnedest to keep on - even under such

heavily restricted conditions. Baker Amy Taylor's pastries at Oui Cafe have been feeding the neighborhood since March. Standings Butcher's -pricier than gold- have seen socially distant lines out the front.
Even the newer smaller Melrose Mac store is hanging in there.

I will do the best i can to help push this forward. I will need some documentation in order to fast track a motion at our next meeting on Wednesday.
Could you send me something? It doesn't have to be completely detailed but pictures would be lovely.
Normally this would go to Committee first but this is timely. Because the Board agenda is already loaded, there may not be time for a proper presentation. I will still try to get support but if Members balk at the short notice, we might have to hold a 'Special Meeting.'

In that case, I would love Alex and Jeff to present it themselves. We could set the date in time for Sept 15th.

Many thanks,
p

Good Morning Philip,
Thank you again for the opportunity to announce the Uplift Melrose Project last week. Can you please send me all pertinent information for the August 25th Land Use Committee Meeting. We will create a flyer that you can post on your social media or share with Board members. We will be preparing this today.

Thank you,

Subject: Melrose BID Damages / Economic Recovery Needs

---

It was very nice to meet you on the telephone yesterday. As promised, the attached letter quantifies some of our District's losses and identifies concrete and easily and quickly implemented actions that the Mayor's Office could take to assist in Melrose recovery. We would be very happy to schedule a working meeting to delve into additional details of our requests.

As our stakeholders communicate new "pinch points" to their recovery or needs, we will relay those to you.

Please don't hesitate to contact me as we can assist in any manner whatsoever. Thank you, Leila. Thank you Mayor Garcetti.

Subject: Melrose BID Recovery Plans

---

The Melrose BID Board has started to think about how business can be restored after the Covid-19 pandemic. The MTA Grant plays a large role in those plans for getting the street back in business as soon as possible. We are very pleased that CD5 will be joining the Board Members on Friday, April 17 at 10:30 AM to continue the planning for implementing that Grant.

After our first meeting with the City staff, Debbie was going to inquire as to how the installation of the two "hawk crosswalks" (one at Stanley and the other at Orange) could be expedited in the City budget process. The ability for pedestrians to safely cross Melrose will be a huge positive impact on pedestrian walk-ability on the street, and consequently business volumes. Is it possible to get installation of these signals included in the coming year's budget?

A related item that the Board wanted to pursue was the installation of "festival lighting" that parallels the street but does not cross it. scalloped from the tops of the existing light poles. The Hollywood Entertainment District BID sponsored a similar installation on Cahuenga as shown in the attached photo. (The pictured installation differs from that anticipated by the Melrose BID in that it does cross the street.) Kevin, can you direct us to the appropriate City staff member to begin the needed planning and permitting that might be required for this project? I'd like to make an initial contact as soon as possible.

Thank you both! See you Friday.

Hi Don,

With regard to the decorative street lights, the Melrose BID would have to apply for a decorations permit; then, the Bureau of Street Lighting would have to make sure the areas of Melrose you are requesting are eligible locations. If approved, the permit fee would be $350 plus all electrical usage fees for approximately 100 strands of lights. Attached please find a PDF of the rules/procedures. If you wish to go forward, please contact Enrique Sanchez in BSL at enrique.x.sanchez@lacity.org and he will be able to provide an application for you. That is, assuming he is working at the moment -- I'm not sure what BSL's current situation is.

Hi Don. We can certainly work to see if those pedestrian signals can be added to this year's budget- however, given the virus and its fallout, next year's budget is completely up in the air at the moment. I am including Jay Greentstein on this email as he will be our point person on that particular piece.

That's progress. We can only do what is possible. That said, we'd like to advance the argument that these signals are Covid recovery costs.

Another point is that these signal costs may have enhanced fund-ability because they may not require General Funds. These signals could be funded from some "special fund" (transportation projects, Gas Tax, pedestrian safety grant, etc, etc. You guys know the City's "fund accounting alphabet" better than I do.)

Finally, the MTA Grant could probably be used to fund these new signals with CD5 support. Even if we had to go back to MTA for a formal amendment. I have an inkling that the BID Board, would prefer improvements that promote pedestrian transit more than other expenditures that don't have such an impact. The ability for pedestrians to cross from one side of the street to the other very much improves first mile / last mile transit and the commercial district.

Thank you for your support.

Hi Don,

I am sorry for the delay in getting back to you. We are all working from home and I needed to find time between my various conference calls to get to my office to grab my file with the key information I need regarding signal projects in the district. Now that I have that file I was able to confirm that the Department of Transportation had approved the Traffic Control Report for each of these projects in Feb. and May of last year. That is our first step and has put these on our list of about forty signal projects in CD 5 waiting to be built. The next step in this process is to attach the funding to the project which is needed in order to get the projects into design and then into a bid package. This all takes time and any expectation that this can all happen within a year would not be realistic. The next step that is needed is to determine how to work with Streets LA and Metro to direct a portion of your grant toward these two projects. The estimate given by DOT about six months ago was $220,000 for the Pedestrian Hybrid Beacon at Melrose at Orange and $200,000 for the same type of signal at Stanley Ave. Once you can get approval from Metro and Streets LA, I can then work with DOT to determine how to get the projects in the queue for design and then included in a bid package. We have about ten other projects that are now at that step in the process and we are waiting to see when each can complete design and be scheduled to go out to bid. Please let me know if you have any questions.

The next step that is needed is to determine how to work with Streets LA and Metro to direct a portion of your grant toward these two projects. The estimate given by DOT about six months ago was $220,000 for the Pedestrian Hybrid Beacon at Melrose at Orange and $200,000 for the same type of signal at Stanley Ave. Once you can get approval from Metro and Streets LA, I can then work with DOT to determine how to get the projects in the queue for design and then included in a bid package. We have about ten other projects that are now at that step in the process and we are waiting to see when each can complete design and be scheduled to go out to bid. Please let me know if you have any questions.

We are all working from home and I needed to find time between my various conference calls to get to my office to grab my file with the key information I need regarding signal projects in the district. Now that I have that file I was able to confirm that the Department of Transportation had approved the Traffic Control Report for each of these projects in Feb. and May of last year. That is our first step and has put these on our list of about forty signal projects in CD 5 waiting to be built. The next step in this process is to attach the funding to the project which is needed in order to get the projects into design and then into a bid package. This all takes time and any expectation that this can all happen within a year would not be realistic. The next step that is needed is to determine how to work with Streets LA and Metro to direct a portion of your grant toward these two projects. The estimate given by DOT about six months ago was $220,000 for the Pedestrian Hybrid Beacon at Melrose at Orange and $200,000 for the same type of signal at Stanley Ave. Once you can get approval from Metro and Streets LA, I can then work with DOT to determine how to get the projects in the queue for design and then included in a bid package. Debbie & Kevin...

Thank you very much for making the time for our MTA Grant planning this morning. Your assistance is invaluable and critical in getting this opportunity focused for optimized benefit of CD5.

Kevin, thank you for a copy of the policy statement, which deals with "seasonal lighting." We don't believe that policy will be appropriate for the festival lighting project that the MBID is contemplating, which will be a permanent installation and cost $100,000 to $150,000. The "seasonal" policy talks about a 90-day permit term, which just doesn't work. Lighting such as MBID is contemplating has been installed on Cahuenga, near Hollywood Boulevard & Sunset Boulevard and was apparently approved pursuant to a different process / agreement. We are trying to get more details. There is also a similar lighting installation if the downtown Arts District, we believe, which would probably not be "seasonal" in nature.

Is there someone at a higher policy making level in BSL that we should reach out to? Or do you still think Enrique is the right guy?

Subject: Melrose Reconfiguration Nextdoor.com Poll Results

---

Good afternoon,

In anticipation of tonight's Uplift Melrose virtual meeting, I have attached the results of my two Nextdoor Polls regarding the reconfiguration of Melrose Ave. Combined, the polls brought in 1205 votes with an average of 75% voting against.

Many feel that the adjacent community hasn't had the opportunity to authentically weigh in, so I hope that these polls, and the over 300 comments, help you to understand the local community's ongoing concerns.

Regarding outreach, the 500 and 600 blocks of Genesee and Spaulding hadn't received any informational flyers as of this morning. These blocks are some of the hardest hit in terms of traffic, safety, and parking during the Sunday flea market. It would be great to make sure they are included in future outreach efforts.

Thank you, and I look forward to joining tonight's discussion.

Nora Wyman
Co-President, Save Beverly Fairfax

I would just add, Debbie, that when I took the survey I was startled to discover there is NO mention of one of the most crucial elements of Uplift Melrose — the reduction of travel lanes from 2 to 1 each way. Nor does it say that 50% of the street parking will be gone.

And the provided image is misleading — it looks like there are two vehicle lanes approaching the crosswalk. The image does NOT telegraph the true intentions of the program. It's as if the proponents did not want to draw attention to something that would elicit resistance, so it was minimized in the marketing materials. That's not transparency in my opinion.

How can the public trust a process that is not forthcoming and honest about what it intends?

My two cents.

I live in Miracle Mile. I admit I would enjoy biking up to this “mall” as a reccreational outing with my son, but believe those who live nearby and have to live with the impacts should carry the most weight in determining the outcome.

Debbie
I am officially going on record to object to this whole project/meeting process. The City of Los Angeles has a settlement agreement with Fix The City Inc. detailing how these meetings would proceed and what information needed to be presented to the public before the meetings were scheduled. I have made that information known and it is being ignored and as a member of Fix The City I object. The Councilman can call it a trial, a grant application or anything he wants to call it but the protocol has been violated.
As a result the neighborhood has been forced to do surveys and comment on a project that may or not happen. What is worse is that the public does not have the information it needs to make an informed decision. The entire agreement was drafted so that the public could be fully informed and then make a decision based on metrics that included neighborhood intrusion studies, EMS data and other safety protocols. Once again the City is breaking its word.

Good afternoon,

I'm following up re Uplift Melrose outreach efforts. It is my understanding that Melrose BID was/is responsible for distributing flyers two blocks above and two below Melrose from Fairfax to Highland. However, the 500 and 600 blocks of Spaulding and Genesee in the Beverly Fairfax Historic District have yet to receive a single flyer.

How is it that homeowners and renters who live SOUTH of Beverly Blvd received flyers on their doors when our area did not?

I am very troubled by the BID's inconsistent outreach efforts, and I hope they will distribute flyers to the areas they have missed as soon as possible.

Regards,

Nora Wyman

Nora
I share your frustration. This is one of the reasons for the Agreement with the City on how to proceed with any project that removes traffic lanes. I realize that the City (LADOT) is saying they are only applying for a grant but this is a flawed process for which the City must be held accountable. This is how corruption begins and becomes systemic. The people deserve better!

Subject: Melrose Streetscape ATP Grant Application and Outreach: August 11th

---

Good Afternoon Isack,
My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.

A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-*

*block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

Hi All... This is and has to be a City project. The Melrose BID will be looking to Alexander's guidance on substance and process. We agree with the idea of opening up the MCWCC meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups. That is also what the Council Office wants. Without Council Office support, there is no project. Let me know how we can help in any way. Thank you.

Good Afternoon Isack,
My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.

A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

Hello, all!

What an exciting project!

Alexander, I just want to make sure you're clear on the organizations involved. Isack sits on both the Melrose BID board and the Mid City West Community Council board (the official neighborhood council for the section of the proposed project between Fairfax and La Brea). I'm the Chair of Mid City West. The meeting on the 11th is Mid City West's monthly board meeting.

As Michael notes, we will be very happy to place the project on our agenda for a presentation, discussion, and potential action on Mid City West supporting the project. We are a publicly funded Brown Act compliant legislative body, so by nature our meetings are open to the whole community, and we do our best to elicit as much engagement as possible. We have one of the most active social media presences of any NC in the city and will leverage that to drive engagement. And we have a robust email list as well (I'm CCing board member Lauren Nichols, who is the lead on our email newsletter, which will go out prior to our board meeting). I'm CCing Melrose BID board member and Greenway Arts Alliance Co-Founder/Artistic Director Pierson

Blaetz as well, who is deeply connected to the Fairfax High School community and hopefully will be able to help engage that community in attending.

Any kind of visuals, project concepts, etc. that we can share on social media and in our newsletter would be very useful in driving engagement.

Best,

Scott Epstein

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

**Subject:** Re: Melrose Streetscape ATP Grant Application and Outreach: August 11th

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.
>
> A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

---

Good Morning All,
See our responses to your questions above.

**Regarding the visuals and any graphic material/project information**

**a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and hearing more information on the proposed project. This flyer will be completed by tomorrow and we will share with the group, for the August 11th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 11th meeting and any subsequent community outreach meeting

**Regarding voting on the concept and gaining general project feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meeting as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**Regarding additional project information, project materials and motion for the board**
The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

If there are other questions in the interim, please let us know.

Thanks, Alexander.

Is it possible to get the 2-3 page project brief to share prior to the meeting? I think those details will be of great interest to our stakeholders, and since this will be Mid City West's only chance to weigh in on the project prior to the application deadline, we want to drive as much engagement to the Tuesday meeting as possible.

Best,

Scott

The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 11th meeting and any subsequent community outreach meeting

**Regarding voting on the concept and gaining general project feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meeting as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**Regarding additional project information, project materials and motion for the board**
The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

If there are other questions in the interim, please let us know.

**Subject:** Re: Melrose Streetscape ATP Grant Application and Outreach: August 11th

Hi Alexander,
I’ve spoken with Scott Epstein (cc’d and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The

meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

> Good Afternoon Isack,
> My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.
>
> A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:
>
> - Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
> - Curb extensions to reduce pedestrian crossing lengths for increased safety
> - Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
> - "Scramble" diagonal pedestrian crossings at major

intersections (Fairfax, La Brea, and Highland)

- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a "Complete Streets" plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

Hi Scott,
Yes we will be able to get the Project Brief over to your group prior to the meeting - likely by Monday morning at the latest.

All - Please disregard the scope item mentioned above:
*"Scramble" diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)*
This has not been fully approved by DOT and may not be at all feasible due to traffic flow issues. To be further studied. Please do not include this in any information sharing efforts.

Thank you,

**Regarding additional project information, project materials and motion for the board**

The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- "Scramble" diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a "Complete Streets" plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

**Subject:** Re: Melrose Streetscape ATP Grant Application and Outreach: August 11th

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited

by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

On Aug 3, 2020, at 5:49 PM, Alexander Caiozzo <Alexander.Caiozzo@lacity.org> wrote:

Good Afternoon Isack,
My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.

A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of**

**this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

Subject: Fwd: Melrose Streetscape ATP Grant Application and Outreach: August 11th

---

Good Morning All Melrose BID Property Owners...

The Melrose BID and StreetsLA, a Los Angeles City Department, have been working together to develop a grant application to fund pedestrian oriented improvements that will support Melrose' return to commercial vitality following the tragedies of Covid-19 and civil unrest that we have experienced. More detailed presentations are being prepared for your review and consideration as this is written. Our ability to be successful with this grant application for significant State funding will, to a large degree, depend upon the support of community members, property owners, business owners, traffic engineers & planners about the proposed improvements. To that end, I'm forwarding an email from StreetsLA which contains an overview of the proposed project. On August 11 at 6:30 PM, the Mid City West Community Council will be conducting a public presentation by Zoom about the project. The purpose of this email is to make you aware of this project and invite you to attend and participate in that Zoom meeting, which you will be separately notified about.

Good Morning All,
See our responses to your questions above.

**Regarding the visuals and any graphic material/project information**

**a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and hearing more information on the proposed project. This flyer will be completed by tomorrow and we will share with the group, for the August 11th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 11th meeting and any subsequent community outreach meeting

**Regarding voting on the concept and gaining general project feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meeting as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**Regarding additional project information, project materials and motion for the board**
The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- "Scramble" diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a "Complete Streets" plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

If there are other questions in the interim, please let us know.

---

Good Afternoon Michael,
The overall vision will include more shade trees and landscape planting.

The Outreach Flyer to be sent over shotly, for the August 11th meeting. Project Brief is still in progress.

Thank you,

**Alexander J. Caiozzo**
***Until further notice, Design-Build staff will be working remotely. Please be assured services to the City and our residents will continue in the safest manner possible.***

On Aug 5, 2020, at 10:45 AM, Alexander Caiozzo <Alexander.Caiozzo@lacity.org> wrote:

Good Morning All,
See our responses to your questions above.

**Regarding the visuals and any graphic material/project information**

**a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and hearing more information on the proposed project. This flyer will be completed by tomorrow and we will share with the group, for the August 11th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 11th meeting and any subsequent community outreach meeting

**Regarding voting on the concept and gaining general project feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post

outreach/Board meeting as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**Regarding additional project information, project materials and motion for the board**

The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- "Scramble" diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a "Complete Streets" plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

If there are other questions in the interim, please let us know.

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials

2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

> My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project  I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded  2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.
>
> A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:
>
> - Separated bikeways at sidewalk grade  - 2035 Mobility Plan (Class 4 Bikeway)
> - Curb extensions to reduce pedestrian crossing lengths for increased safety
> - Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
> - “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
> - Approx. 4 acres of newly delineated pedestrian Public Space
> - New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian

amenities

- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

Alexander, I have another question regarding scope of work.

Will the project include curb extensions into the parking lane at bus stops? With Metro's Next Gen project aiming to improve the efficiency and reliability of the bus system, and the city passing a motion to support enhanced bus infrastructure as well, this would seem a worthwhile investment on Melrose. This design also seems to me to be the best compliment to the cycle track because without the expanded waiting area, the bike path would have to weave around the bus stops.

Best,

Scott

Hi Scott,

I can answer this one. DOT has concerns about in-lane bus stops where there is only one lane of through traffic. I worked on another project where this was proposed, and volumes were lower than Melrose, and still, the concerns were enough that the project was modified after already being funded (and scoped originally by me). The best way I can articulate the concern is that with a bus blocking the far side of the intersection while at a stop, there is speculation that drivers would try to circumvent the bus by driving into oncoming traffic, and/or get stuck if trying to make a left turn from the intersecting street, into the back of the bus so to speak. There could also be gridlock scenarios if the bus is standing for an extended period of time.

> > **a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along

Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and hearing more information on the proposed project. This flyer will be completed by tomorrow and we will share with the group, for the August 11th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 11th meeting and any subsequent community outreach meeting

**Regarding voting on the concept and gaining general project feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meeting as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**Regarding additional project information, project materials and motion for the board**

The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

If there are other questions in the interim, please let us know.

**Subject:** Re: Melrose Streetscape ATP Grant Application and Outreach: August 11th

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

>
> Good Afternoon Isack,
> My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded 2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.
>
> A few months back, in presenting our preliminary

conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant,*

*would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

Gotcha. Thanks, Tim. It seems to me it will be important to work closely with Metro on the consolidated bus stop spacing. It would be desirable to minimize the amount of times that the cycle track has to weave without reducing the quality of the experience for bus riders.

I worked on another project where this was proposed, and volumes were lower than Melrose, and still, the concerns were enough that the project was modified after already being funded (and scoped originally by me). The best way I can articulate the concern is that with a bus blocking the far side of the intersection while at a stop, there is speculation that drivers would try to circumvent the bus by driving into oncoming traffic, and/or get stuck if trying to make a left turn from the intersecting street, into the back of the bus so to speak. There could also be gridlock scenarios if the bus is standing for an extended period of time.

Good Morning All,
See our responses to your questions above.

**Regarding the visuals and any graphic material/project information**

**a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and

hearing more information on the proposed project. This flyer will be completed by tomorrow and we will share with the group, for the August 11th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 11th meeting and any subsequent community outreach meeting

**Regarding voting on the concept and gaining general project feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meeting as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**Regarding additional project information, project materials and motion for the board**

The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of

Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

If there are other questions in the interim, please let us know.

**Subject:** Re: Melrose Streetscape ATP Grant Application and Outreach: August 11th

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

> On Aug 3, 2020, at 5:49 PM, Alexander Caiozzo <Alexander.Caiozzo@lacity.org> wrote:
>
> Good Afternoon Isack,
> My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project  I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded  2015 Metro Call for Projects

grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.

A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts,

eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

>>> I can answer this one. DOT has concerns about in-lane bus stops where there is only one lane of through traffic. I worked on another project where this was proposed, and volumes were lower than Melrose, and still, the concerns were enough that the project was modified after already being funded (and scoped originally by me). The best way I can articulate the concern is that with a bus blocking the far side of the intersection while at a stop, there is speculation that drivers would try to circumvent the bus by driving into

oncoming traffic, and/or get stuck if trying to make a left turn from the intersecting street, into the back of the bus so to speak. There could also be gridlock scenarios if the bus is standing for an extended period of time.

>
> Will the project include curb extensions into the parking lane at bus stops? With Metro's Next Gen project aiming to improve the efficiency and reliability of the bus system, and the city passing a motion to support enhanced bus infrastructure as well, this would seem a worthwhile investment on Melrose. This design also seems to me to be the best compliment to the cycle track because without the expanded waiting area, the bike path would have to weave around the bus stops.

Hi Scott,

I can answer this one. DOT has concerns about in-lane bus stops where there is only one lane of through traffic. I worked on another project where this was proposed, and volumes were lower than Melrose, and still, the concerns were enough that the project was modified after already being funded (and scoped originally by me). The best way I can articulate the concern is that with a bus blocking the far side of the intersection while at a stop, there is speculation that drivers would try to circumvent the bus by driving into oncoming traffic, and/or get stuck if trying to make a left turn from the intersecting street, into the back of the bus so to speak. There could also be gridlock scenarios if the bus is standing for an extended period of time.

With Metro's Next Gen project aiming to improve the efficiency and reliability of the bus system, and the city passing a motion to support enhanced bus infrastructure as well, this would seem a worthwhile investment on Melrose. This design also seems to me to be the best compliment to the cycle track because without the expanded waiting area, the bike path would have to weave around the bus stops.

On Aug 5, 2020, at 10:45 AM, Alexander Caiozzo <Alexander.Caiozzo@lacity.org> wrote:

Good Morning All,
See our responses to your questions above.

**Regarding the visuals and any graphic material/project information**

**a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and hearing more information on the proposed project. This flyer will be completed by tomorrow and we will share with the group, for the August 11th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically

legible for the Tuesday August 11th meeting and any subsequent community outreach meeting

**Regarding voting on the concept and gaining general project feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meeting as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**Regarding additional project information, project materials and motion for the board**
The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this

point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

If there are other questions in the interim, please let us know.

**Alexander J. Caiozzo**

**Subject:** Re: Melrose Streetscape ATP Grant Application and Outreach: August 11th

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

> On Aug 3, 2020, at 5:49 PM, Alexander Caiozzo <Alexander.Caiozzo@lacity.org> wrote:
>
> Good Afternoon Isack,
> My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project  I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded  2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.
>
> A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a

resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant

funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA

now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

On Thu, Aug 6, 2020 at 2:27 PM Tim Fremaux <tim.fremaux@lacity.org> wrote:

Hi Scott,

I can answer this one. DOT has concerns about in-lane bus stops where there is only one lane of through traffic. I worked on another project where this was proposed, and volumes were lower than Melrose, and still, the concerns were enough that the project was modified after already being funded (and scoped originally by me). The best way I can articulate the concern is that with a bus blocking the far side of the intersection while at a stop, there is speculation that drivers would try to circumvent the bus by driving into oncoming traffic, and/or get stuck if trying to make a left turn from the intersecting street, into the back of the bus so to speak. There could also be gridlock scenarios if the bus is standing for an extended period of time.

On Aug 5, 2020, at 10:45 AM, Alexander Caiozzo <Alexander.Caiozzo@lacity.org> wrote:

Good Morning All,
See our responses to your questions above.

**Regarding the visuals and any graphic material/project information**

**a.** A sIngle page pdf flyer is currently being designed by StreetsLA team to be shared for any outreach meetings. This flyer will be the same flyer used for all outreach meetings, with a changed date/time and host name. Flyer will have a flashy graphic of the exciting new proposed improvements along Melrose and basic project information. Intent of this flyer is to get people interested in joining a meeting and hearing more information on the proposed project. This flyer will be completed by tomorrow and we will share with the group, for the August 11th meeting.

**b.** A website tab is being created, likely to be hosted through the City StreetsLA website. Website will have a pdf link with a 2-3 page detailed concept plan, graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 11th meeting and any subsequent community outreach meeting

**Regarding voting on the concept and gaining general project feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meeting as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**Regarding additional project information, project materials and motion for the board**
The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

If there are other questions in the interim, please let us know.

**Subject:** Re: Melrose Streetscape ATP Grant Application and Outreach: August 11th

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting.

The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60% threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

> On Aug 3, 2020, at 5:49 PM, Alexander Caiozzo <Alexander.Caiozzo@lacity.org> wrote:
>
> Good Afternoon Isack,
> My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project  I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded  2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.
>
> A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional

grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.** The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at DOT. The additional scope of work includes:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened

sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th, 2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

graphics and project information (Project Brief). The link is intended for folks who can not join in any meetings, or want to take a closer look at the concept post meeting. Our goal is to have this up and running in time for the Tuesday August 11th meeting.

**c.** The Project presentation is being updated and made graphically legible for the Tuesday August 11th meeting and any subsequent community outreach meeting

**Regarding voting on the concept and gaining general project feedback**

**a.** We are working with our public relations group at StreetsLA on the survey capabilities. The goal is to have a space for folks to vote/comment post outreach/Board meeting as well as through the website tab we are creating. The portal for voting/comments may all end up in the same online space. Will know more in the next day or two.

**Regarding additional project information, project materials and motion for the board**
The scope of the Melrose Avenue Active Transportation Streetscape Project is as follows:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Streetscape Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm

which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

**b.** The community outreach flyer as well as the Project Brief will provide additional project information and graphics.

**Regarding any other groups to be included in meetings or outreach**

**a.** Any additional connections will benefit the holistic and broad outreach process, in this short window of time. However, at this point, we do not have the capabilities of joining or hosting additional meetings, as there are about 6-7 scheduled at this time, and the application due date is September 15th.

If there are other questions in the interim, please let us know.

**Subject:** Re: Melrose Streetscape ATP Grant Application and Outreach: August 11th

Hi Alexander,
I've spoken with Scott Epstein (cc'd and our NC chair) and we can give you guys 15 minutes of presentation time and 15-30 min of Q&A at our August 11 meeting. The meeting begins at 630pm and we estimate that you would be able to present around 715pm. It is all done on Zoom. As I am sure you are aware, anyone can make public comments on any item including this one, and each person has 3 minutes to do so. We are happy to publicize this on our FB, Twitter, and Instagram accounts, and you are welcome to extend the invitation to whoever you'd like to attend. We can also do an email blast publicizing this.

A few questions/points:
1 - can you get me a visual(s) and/or any project 1 sheets or marketing materials
2 - how will you survey people for the 60%

threshold? That would be helpful to understand
3 - I need to prepare a motion for our board to consider after your presentation, so the more detail (and materials) I can get ahead of time, the more accurate I can be in our motion to potentially support the project
4 - I spoke with some people at the Greater Wilshire NC today who are very excited by this project as well (their NC has Melrose between La Brea and Highland), I would be happy to make those connections for you and see how we can expedite their outreach if helpful

Happy to chat live if needed tomorrow as well.

Michael

> Good Afternoon Isack,
> My name is Alexander Caiozzo, Project Manager for the Melrose Avenue Streetscape Project/Melrose Avenue Active Transportation Project  I am including the Project Lead Jeff Palmer on this email as well. The original Melrose Ave. Streetscape Project is a 3.9 million dollar funded  2015 Metro Call for Projects grant., with project limits along Melrose Avenue from Highland to Fairfax. The original scope of work includes bus stop safety lighting, landscape planting, access improvements, wayfinding signage and site furnishings.
>
> A few months back, in presenting our preliminary conceptual plans to the Melrose BID, there was a resounding desire for additional elements to be included along Melrose Ave. that were not included in the 2015 Grant funding. To address the desire for making Melrose a more 'complete street', StreetsLA will now applying for additional grant funding through the Active Transportation Program (ATP Cycle 5) Grant- **Application Due September 15th, 2020.**  The overall concept of roadway changes has been reviewed and coordinated with Tim Fremaux at

DOT. The additional scope of work includes:

- Separated bikeways at sidewalk grade - 2035 Mobility Plan (Class 4 Bikeway)
- Curb extensions to reduce pedestrian crossing lengths for increased safety
- Raised east/west crosswalks on Melrose Ave. for pedestrians walking and on bicycles
- “Scramble” diagonal pedestrian crossings at major intersections (Fairfax, La Brea, and Highland)
- Approx. 4 acres of newly delineated pedestrian Public Space
- New pedestrian lighting throughout the corridor, new wayfinding specific to bicycling, and other new pedestrian amenities
- Modification/realignment/reductions of drive lanes

The proposed Melrose Avenue Active Transportation Project is a “Complete Streets” plan, with a modification of drive lanes 'road diet', that seeks to encourage an increase in active modes of transportation such as bicycling and walking by creating a safe and comfortable pedestrian realm which includes room for bicycles, disincentivizing pass-through vehicular traffic, and increasing the overall square footage of the pedestrian portion of the Public Right of Way. **The approximate cost of this additional scope/grant funding request will be 40-50 million dollars.**

The grant application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed

layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, and introduction of protected bike lanes and widened sidewalks.We do not want to apply for grant funding without the transformative concept being shared with the community first and gaining general positive feedback; with a  minimum 60% 'YES' on the overall concept - otherwise we will can not submit. *Please note that modifications or removal of any of design elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant,  would be contradictory to the criteria of winning the grant funding.* We run the great chance of losing all the 40-50 million dollar funding if there is general negative feedback and scope request changes after the fact.

We are looking to your group to assist StreetsLA now in an expedited community outreach effort, as the deadline for the Grant Application is **September 15th,  2020**, and proof of diligent outreach strengthens the application viability. It is to our understanding that you have a meeting coming up on August 11th. What are your thoughts on opening up that meeting to the local high school and elementary school members, residents south and north of Melrose and the local Orthodox groups; with a 15 minute presentation by our group and 15-30 minutes of questions/comments. Also, what is the format of that meeting (Zoom etc?).

Please let me know how we can assist in coordinating. It is pivotal that we get as much outreach and responses in the next few weeks.

I worked on another project where this was proposed, and volumes were lower than Melrose, and still, the concerns were enough that the project was modified after already being funded (and scoped originally by me). The best way I can articulate the concern is that with a bus blocking the far side of the intersection while at a stop, there is speculation that drivers would try to circumvent the bus by driving into oncoming traffic, and/or get stuck if trying to make a left turn from the intersecting street, into the back of the bus so to speak. There could also be gridlock scenarios if the bus is standing for an extended period of time.

With Metro's Next Gen project aiming to improve the efficiency and reliability of the bus system, and the city passing a motion to support enhanced bus infrastructure as well, this would seem a worthwhile investment on Melrose. This design also seems to me to be the best compliment to the cycle track because without the expanded waiting area, the bike path would have to weave around the bus stops.

Subject: Melrose Streetscape ATP Grant Application and Outreach

---

Good Afternoon Donald,

Thank you for your feedback during yesterday's meeting.
Jeff and I have spent the day working with our Grant's Group to gain a better understanding of the requirements of the ATP grant as well as the necessary outreach for a holistic/competitive application.

Per our conversation with the Grant's Group, it is now understood that the documents included in the grant application are set in stone and should not be modified once we receive funding. The ATP Grant approval committee is quite strict and the grants are not flexible after approval.

The application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, introduction of protected bike lanes and widened sidewalks. Modifications or removal of any of these elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding. We run the great chance of losing all of the funding if scope is modified after award.

The goal for this application is to gain general support for the concept now. As discussed in our meeting yesterday, we need to start on the fast tracked outreach process, with the broadest reach possible. We are not looking for particular feedback on concrete colors, bench materials, tree species etc. just yet and can gain more feedback on these more detailed elements after the potential award of the grant.

Can you please provide a list of the already scheduled group/committee meetings coming up in the next two weeks, noting the type of attendees (business owners, residents, property owners etc). We can discuss further once our team has had a chance to review.

Thank you and have a good weekend.

Good Afternoon Donald,

Thank you for your feedback during yesterday's meeting.
Jeff and I have spent the day working with our Grant's Group to gain a better understanding of the requirements of the ATP grant as well as the necessary outreach for a holistic/competitive application.

Per our conversation with the Grant's Group, it is now understood that the documents included in the grant application are set in stone and should not be modified once we receive funding. The ATP Grant approval committee is quite strict and the grants are not flexible after approval.

The application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, introduction of protected bike lanes and widened sidewalks. Modifications or removal of any of these elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding. We run the great chance of losing all of the funding if scope is modified after award.

The goal for this application is to gain general support for the concept now. As discussed in our meeting yesterday, we need to start on the fast tracked outreach process, with the broadest reach possible. We are not looking for particular feedback on concrete colors, bench materials, tree species etc. just yet and can gain more feedback on these more detailed elements after the potential award of the grant.

Can you please provide a list of the already scheduled group/committee meetings coming up in the next two weeks, noting the type of attendees (business owners, residents, property owners etc). We can discuss further once our team has had a chance to review.

Thank you and have a good weekend.

Good Afternoon Donald and Margaret,
We have had a chance to review the list of upcoming meetings sent by Margaret (thank you). Please see below the list in chronological order, with our comments.

1. **Mid City West Community Council: (Isack taking lead)**
   **Streetscape and Commercial Committee – Thursday August 6th at 7:00 pm**
   We will be reaching out to Michael Schneider, Scott Epstein and Isack Fadlon for StreetsLA to get on this agenda (15 minute presentation and 15 minutes of questions)

2. **Mid City West Community Council: (Isack taking lead)**
   **Board – Tuesday August 11th at 6:30 pm**
   We will be reaching out to Michael Schneider, Scott Epstein and Isack Fadlon for StreetsLA to get on this agenda (15 minute presentation and 15 minutes of questions)

3. **Greater Wilshire Neighborhood Council (Margaret taking lead) - Jeffrey Carpenter contact**
   **General Board Meeting – August 12th at 7:00 pm**
   Please include StreetsLA in the agenda for a 15 minute presentation and 15 minutes of questions.

4. **Melrose BID Board – Don taking lead**
   **Board - Friday August 14th at 10:00 am**
   Please include StreetsLA on the agenda for a 15 minute presentation and 15 minutes of questions. If the Board Approves, we will need a letter of support of the project.

5. **Melrose Action Committee (Don taking lead) - Peter Nichols**
   **Time/Date TBD**
   Please include StreetsLA in the agenda for a 15 minute presentation and 15 minutes of questions.

6. **Business Owners/Business Property Owners (Don/Kim taking lead)**
   **Time/Date TBD**

Please include StreetsLA in the agenda for a 15 minute presentation and 15 minutes of questions.

7. **Transportation Committee**
   **New Time/Date TBD - can a special meeting be held for our presentation? Currently scheduled Sept. 28th meeting will be after the application is due.**

8. **Hollywood Chamber (will not need to meet at this time)**

Let me know if this can be accomodated.

Thank you,

**Alexander J. Caiozzo**

Subject: RE: Melrose Streetscape ATP Grant Application and Outreach

---

Thank you, Alexander,

As an update:

- **Item 1: Mid City West Community Council: (Isack taking lead)**
  Streetscape and Commercial Committee – Thursday August 6th at 7:00 pm
  **This Committee has been dissolved and re-integrated into the Planning and Land Use Management Committee.**
  **So there will be no August 6th meeting.**

  However, Isack Fadlon (added to the email) has advised that the attached Mid City West Board Motion in March already expressed support for:
  - Lane reduction
  - Increased pedestrian sidewalk
  - Protected bicycle path of travel

  **As such, we will be proceeding directly back to the Board August 11th asking them to add the Streetscape ATP Application to the agenda, as a natural furtherance of their March 10th action.**

- **In addition, Alexander, can you please send us all the presentation from the July 30th Zoom Meeting with the Melrose BID?**

Thank you!

**Margaret Taylor**

Good Afternoon Donald,

Thank you for your feedback during yesterday's meeting.
Jeff and I have spent the day working with our Grant's Group to gain a better understanding of the requirements of the ATP grant as well as the necessary outreach for a holistic/competitive application.

Per our conversation with the Grant's Group, it is now understood that the documents included in the grant application are set in stone and should not be modified once we receive funding. The ATP Grant approval committee is quite strict and the grants are not flexible after approval.

The application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, introduction of protected bike lanes and widened sidewalks. Modifications or removal of any of these elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding. We run the great chance of losing all of the funding if scope is modified after award.

The goal for this application is to gain general support for the concept now. As discussed in our meeting yesterday, we need to start on the fast tracked outreach process, with the broadest reach possible. We are not looking for particular feedback on concrete colors, bench materials, tree species etc. just yet and can gain more feedback on these more detailed elements after the potential award of the grant.

Can you please provide a list of the already scheduled group/committee meetings coming up in the next two weeks, noting the type of attendees (business owners, residents, property owners etc). We can discuss further once our team has had a chance to review.

Thank you and have a good weekend.

Good Afternoon Donald,

Thank you for your feedback during yesterday's meeting.
Jeff and I have spent the day working with our Grant's Group to gain a better understanding of the requirements of the ATP grant as well as the necessary outreach for a holistic/competitive application.

Per our conversation with the Grant's Group, it is now understood that the documents included in the grant application are set in stone and should not be modified once we receive funding. The ATP Grant approval committee is quite strict and the grants are not flexible after approval.

The application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, introduction of protected bike lanes and widened sidewalks. Modifications or removal of any of these elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding. We run the great chance of losing all of the funding if scope is modified after award.

The goal for this application is to gain general support for the concept now. As discussed in our meeting yesterday, we need to start on the fast tracked outreach process, with the broadest reach possible. We are not looking for particular feedback on concrete colors, bench materials, tree species etc. just yet and can gain more feedback on these more detailed elements after the potential award of the grant.

Thanks Alexander. Kevin and I were just discussing this this morning. Kevin, can you give Alexander the contacts we have for that last item- including Peter Nichols' group? Our office's education deputy is out of the office at the moment, but we'll do our best to get you those school contacts as soon as possible (unless Kevin has them).

Good Afternoon Donald,

Thank you for your feedback during yesterday's meeting.
Jeff and I have spent the day working with our Grant's Group to gain a better understanding of the requirements of the ATP grant as well as the necessary outreach for a holistic/competitive application.

Per our conversation with the Grant's Group, it is now understood that the documents included in the grant application are set in stone and should not be modified once we receive funding. The ATP Grant approval committee is quite strict and the grants are not flexible after approval.

The application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, introduction of protected bike lanes and widened sidewalks. Modifications or removal of any of these elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding. We run the great chance of losing all of the funding if scope is modified after award.

The goal for this application is to gain general support for the concept now. As discussed in our meeting yesterday, we need to start on the fast tracked outreach process, with the broadest reach possible. We are not looking for particular feedback on concrete colors, bench materials, tree species etc. just yet and can gain more feedback on these more detailed elements after the potential award of the grant.

Can you please provide a list of the already scheduled group/committee meetings coming up in the next two weeks, noting the type of attendees (business owners, residents, property owners etc). We can discuss further once our team has had a chance to review.

Thank you and have a good weekend.

Good Afternoon Donald,

Thank you for your feedback during yesterday's meeting.
Jeff and I have spent the day working with our Grant's Group to gain a better understanding of the requirements of the ATP grant as well as the necessary outreach for a holistic/competitive application.

Per our conversation with the Grant's Group, it is now understood that the documents included in the grant application are set in stone and should not be modified once we receive funding. The ATP Grant approval committee is quite strict and the grants are not flexible after approval.

The application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, introduction of protected bike lanes and widened sidewalks. Modifications or removal of any of these elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding. We run the

great chance of losing all of the funding if scope is modified after award.

The goal for this application is to gain general support for the concept now. As discussed in our meeting yesterday, we need to start on the fast tracked outreach process, with the broadest reach possible. We are not looking for particular feedback on concrete colors, bench materials, tree species etc. just yet and can gain more feedback on these more detailed elements after the potential award of the grant.

Can you please provide a list of the already scheduled group/committee meetings coming up in the next two weeks, noting the type of attendees (business owners, residents, property owners etc). We can discuss further once our team has had a chance to review.

Thank you and have a good weekend.

Good Morning Debbie,
I appreciate you sharing this list. If you can share the website with survey information from your end, that would be great. For those who can't attend any upcoming meetings, the Project Brief on the site clearly explains the Uplift Melrose Proposal.

https://streetsla.lacity.org/melrose

Thanks so much!

Good Afternoon Donald,

Thank you for your feedback during yesterday's meeting.
Jeff and I have spent the day working with our Grant's Group to gain a better understanding of the requirements of the ATP grant as well as the necessary outreach for a holistic/competitive application.

Per our conversation with the Grant's Group, it is now understood that the documents included in the grant application are set in stone and should not be modified once we receive funding. The ATP Grant approval committee is quite strict and the grants are not flexible after approval.

The application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, introduction of protected bike lanes and widened sidewalks. Modifications or removal of any of these elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding. We run the great chance of losing all of the funding if scope is modified after award.

The goal for this application is to gain general support for the concept now. As discussed in our meeting yesterday, we need to start on the fast tracked outreach process, with the broadest reach possible. We are not looking for particular feedback on concrete colors, bench materials, tree species etc. just yet and can gain more feedback on these more detailed elements after the potential award of the grant.

Can you please provide a list of the already scheduled group/committee meetings coming up in the next two weeks, noting the type of attendees (business owners, residents, property owners etc). We can discuss further once our team has had a chance to review.

Thank you and have a good weekend.

Good Afternoon Donald,

Thank you for your feedback during yesterday's meeting.
Jeff and I have spent the day working with our Grant's Group to gain a better understanding of the requirements of the ATP grant as well as the necessary outreach for a holistic/competitive application.

Per our conversation with the Grant's Group, it is now understood that the documents included in the grant application are set in stone and should not be modified once we receive funding. The ATP Grant approval committee is quite strict and the grants are not flexible after approval.

The application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, introduction of protected bike lanes and widened sidewalks. Modifications or removal of any of these elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding. We run the great chance of losing all of the funding if scope is modified after award.

The goal for this application is to gain general support for the concept now. As discussed in our meeting yesterday, we need to start on the fast tracked outreach process, with the broadest reach possible. We are not looking for particular feedback on concrete colors, bench materials, tree species etc. just yet and can gain more feedback on these more detailed elements after the potential award of the grant.

Can you please provide a list of the already scheduled group/committee meetings coming up in the next two weeks, noting the type of attendees (business owners, residents, property owners etc). We can discuss further once our team has had a chance to review.

Thank you and have a good weekend.

Good Afternoon Donald,

Thank you for your feedback during yesterday's meeting.
Jeff and I have spent the day working with our Grant's Group to gain a better understanding of the requirements of the ATP grant as well as the necessary outreach for a holistic/competitive application.

Per our conversation with the Grant's Group, it is now understood that the documents included in the grant application are set in stone and should not be modified once we receive funding. The ATP Grant approval committee is quite strict and the grants are not flexible after approval.

The application will include a plan for the entire corridor of Melrose from Highland to Fairfax, outlining the locations of the new proposed layouts of bumpouts, eliminations of the majority of left turn lanes/pockets, removed drive lanes, introduction of protected bike lanes and widened sidewalks. Modifications or removal of any of these elements, even at particular street corners or mid-block locations, after the award of the potential 40-50 million dollar ATP grant, would be contradictory to the criteria of winning the grant funding. We run the great chance of losing all of the funding if scope is modified after award.

The goal for this application is to gain general support for the concept now. As

discussed in our meeting yesterday, we need to start on the fast tracked outreach process, with the broadest reach possible. We are not looking for particular feedback on concrete colors, bench materials, tree species etc. just yet and can gain more feedback on these more detailed elements after the potential award of the grant.

Can you please provide a list of the already scheduled group/committee meetings coming up in the next two weeks, noting the type of attendees (business owners, residents, property owners etc). We can discuss further once our team has had a chance to review.

Thank you and have a good weekend.

Subject: Melrose Streetscape: ATP Grant Application

---

Good Afternoon,
Our Bureau has been working diligently on preparing a concept plan for the additional scope requested to make Melrose Avenue a more pedestrian friendly corridor, improve safety, and better activate the sidewalk environment. Prior to holding a community meeting/doing community outreach, we would like to present our findings as well as the concept plan to both the BID and the Council Office first. Time is now limited as the grant application is due in September. Support from both the BID and Council on doing the subsequent community outreach will be pivotal to completing the application. We are available next Thursday July 30th.

Please let us know which time would work best for the group - for a video conference presentation:

July 30th
9:00 am
10:00 am
11:00 am
1:00 pm
2:00 pm

Regards,

**Alexander J. Caiozzo**

Subject: MTA Project Details

---

It was nice to talk to you last night. Thank you for spending the time and effort.

I've attached a copy of the MTA Call for Projects Grant Summary that I have. It's published in the Melrose BID Strategic Action Plan document: Melrose Future Vision. I don't really have possession of any additional documents / information about this project. I'm thinking that I've seen paper documents about cash flows / grant disbursement schedules / etc. but didn't keep them. There would be no reason to do so.

It seems appropriate to clarify that this is a City of Los Angeles project. While the concept for a grant application was originated by me, it was handed over to Jeff Jacobberger, the BID's consultant at that time, Jay Greenstein, CD5 Planning Deputy, and other City staff for application preparation. The Melrose BID does not receive any of the funds nor is it in the official chain of command with respect to project details or construction or expenditures. The Melrose BID is an important stakeholder in the project and maintains an open line of communication with City staff in that regard. .

You were asking about project details and disbursement schedules that are really best answered by someone that knows the details. It would seem like Jay Greenstein, Debbie Dyner Harris, or Alexander Caiozzo, all copied above, would be the people for you to talk to. The Melrose BID will, of course, do everything we can to assist you.

As we can assist in any way, please don't hesitate to contact me. Thank you for your efforts to bring peace, truth, and trust into the community.

Thanks for following up so quickly. As you know, I reached out to community members skeptical of Uplift Melrose's potentiel success. I was surprised to learn that their biggest reason for being unsupportive is not the project itself. It is their lack of trust in the data presented and their disbelief that mitigation strategies to manage negative impacts will be implemented. They are afraid this project will backfire and are making comparisons to the Mar Vista project they thought is similar to this. They placed a significant emphasis of their mistrust in officials on their impressions that the $3.9M grant intended for our neighborhood has not been capitalized on yet. They were under the impression that it was the BID's responsibility. It would help extend an olive branch if I could bring clarify to how this grant gets dispersed, what the plan has been for

its usage, and what has been done so far to go towards the Intended plan. Thank you to whoever who can help! Hopefully trust will be a short term issue and we can demonstrate built in mechanisms for accountability somehow. I'm looking forward to keeping this project moving forward. Have a lovely weekend. Hi Donald, I would like to be involved in the $3.9M grant usage at the early stages of planning

for Melrose Village. Is there a formal committee to join? Is there a a specific group of people or department spearheading an overall vision for this neighborhood? If there is not one, I would like to assist in forming one so that the different stakeholders come together to create a unified plan. Thanks for your assistance. Hi Donald,

Can we set up a call with Alex and you to talk through how to get my fellow residents to feel like allies as well as for me to better understand how the grant will be disbursed and used?

Thanks again for your help.

Good Morning Nasim,
My name is Alexander Caiozzo, Landscape Architect and Project Manager for the Bureau of Street Services, StreetsLA. I am including Jeff Palmer, Landscape Architect and Project Lead on this email as well.

Regarding the Metro 2015 Call for Project 3.9 million dollar grant:
We are in the process of identifying the scope and preparing conceptual plans for the Melrose Streetscape Project. Once these are completed, we will be sharing the concept with the neighbors, business owners and surrounding community for feedback and comments. At that time, we will go through how the grant money will be spent, project timeline and description of construction activities.

If you have any questions in the meantime, please let me know. I am happy to clarify anything.

Regards,

**Alexander J. Caiozzo**
***Until further notice, Design-Build staff will be working remotely. Please be assured services to the City and our residents will continue in the safest manner possible.***

Good morning Alex,

I called your office was your voicemail was unclear as to whether or not you are checking messages. Therefore, I am following up with an email.

I am familiar with you and Jeff from the two Uplift Melrose zoom calls I attended. To me, you are the visionaries and gatekeepers to my neighborhood. Your work has shown to be forward

thinking and I am grateful to have you spearheading Melrose's changes.

Unfortunately, regardless of how supportive I am of your work, Uplift Melrose was not well received by a vocal part of the community. After speaking extensively with some of the active members of Melrose Village against the project, one reoccurring theme was not about the work itself but more about how it was presented. The neighbors felt that they were not included or given a voice and were being forced into change. That triggered distrust and fear from them.

Although I do not share the same concerns, I understand that many of the residents have lived here for 20+ years and feel a sense of ownership to their local streets of LA. Justified or not, I am writing to you because I am most interested in protecting you as much as possible from falling into the same pattern and end result.

I would like to suggest involving stakeholders at an earlier part of the process. It seems that you are developing a complete set of schematic designs to present to stakeholders. As much as I trust your work, I would like to suggest that you take a different approach this time. One that would help build the trust back from the neighbors who lobby hard against projects that they fear (and often not fully understand). One that also would gather support ahead of time from stakeholders like the police department.

I am most interested in working with you to create a small group of stakeholders who can provide feedback at this early stage before schematic designs are completed so that your direction is one that will be more likely to be received well. I also would like to help develop your outreach presentation so that it addresses the stakeholders concerns more effectively. I strongly believe that Uplift Melrose's presentation left people confused and in turn did not get the credit it deserved. That is not to say that it would have been fully supported. However, many stakeholders made incorrect assumptions about the impacts and lack of mitigations. That could have been avoided.

The only way to make real change is to challenge old ideas. Your urban planning schemes do just that. Now let's get everyone on the same page so that we can move forward with a new Melrose!

I am happy to tell you in detail my motivations and qualifications beyond being a resident before you commit to including me in any of your work. I just hope you are open to at least setting up a call with me to hear out my ideas.

Thank you for your time.

Regarding the Metro 2015 Call for Project 3.9 million dollar grant:
We are in the process of identifying the scope and preparing conceptual plans for the Melrose Streetscape Project. Once these are completed, we will be sharing the concept with the neighbors, business owners and surrounding community for feedback and comments. At that time, we will go through how the grant money will be spent, project timeline and description of construction activities.

If you have any questions in the meantime, please let me know. I am happy to clarify anything.

Regards,

**Alexander J. Caiozzo**

>>
>> I am familiar with you and Jeff from the two Uplift Melrose zoom calls I attended. To me, you are the visionaries and gatekeepers to my neighborhood. Your work has shown to be forward thinking and I am grateful to have you spearheading Melrose's changes.
>>
>> Unfortunately, regardless of how supportive I am of your work, Uplift Melrose was not well received by a vocal part of the community. After speaking extensively with some of the active members of Melrose Village against the project, one reoccurring theme was not about the work itself but more about how it was presented. The neighbors felt that they were not included or given a voice and were being forced into change. That triggered distrust and fear from them.
>>
>> Although I do not share the same concerns, I understand that many of the residents have lived here for 20+ years and feel a sense of ownership to their local streets of LA. Justified or not, I am writing to you because I am most interested in protecting you as much as possible from falling into the same pattern and end result.
>>
>> I would like to suggest involving stakeholders at an earlier part of the process. It seems that you are developing a complete set of schematic designs to present to stakeholders. As much as I trust your work, I would like to suggest that you take a different approach this time. One that would help build the trust back from the neighbors who lobby hard against projects that they fear (and often not fully understand). One that also would gather support ahead of time from stakeholders like the police department.
>>
>> I am most interested in working with you to create a small group of stakeholders who can

provide feedback at this early stage before schematic designs are completed so that your direction is one that will be more likely to be received well. I also would like to help develop your outreach presentation so that it addresses the stakeholders concerns more effectively. I strongly believe that Uplift Melrose's presentation left people confused and in turn did not get the credit it deserved. That is not to say that it would have been fully supported. However, many stakeholders made incorrect assumptions about the impacts and lack of mitigations. That could have been avoided.

The only way to make real change is to challenge old ideas. Your urban planning schemes do just that. Now let's get everyone on the same page so that we can move forward with a new Melrose!

I am happy to tell you in detail my motivations and qualifications beyond being a resident before you commit to including me in any of your work. I just hope you are open to at least setting up a call with me to hear out my ideas.

Thank you for your time.

Good morning Alex,

I called your office was your voicemail was unclear as to whether or not you are checking messages. Therefore, I am following up with an email.

I am familiar with you and Jeff from the two Uplift Melrose zoom calls I attended. To me, you are the visionaries and gatekeepers to my neighborhood. Your work has shown to be forward thinking and I am grateful to have you spearheading Melrose's changes.

Unfortunately, regardless of how supportive I am of your work, Uplift Melrose was not well received by a vocal part of the community. After speaking extensively with some of the active members of Melrose Village against the project, one reoccurring theme was not about the work itself but more about how it was presented. The neighbors felt that they were not included or given a voice and were being forced into change. That triggered distrust and fear from them.

Although I do not share the same concerns, I understand that many of the residents have lived here for 20+ years and feel a sense of ownership to their local streets of LA. Justified or not, I am writing to you because I am most interested in protecting you as much as possible from falling into the same pattern and end result.

I would like to suggest involving stakeholders at an earlier part of the process. It seems that you are developing a complete set of schematic designs to present to stakeholders. As much as I trust your work, I would like to suggest that you take a different approach this time. One that would help build the trust back from the neighbors who lobby hard against projects that they fear

(and often not fully understand). One that also would gather support ahead of time from stakeholders like the police department.

I am most interested in working with you to create a small group of stakeholders who can provide feedback at this early stage before schematic designs are completed so that your direction is one that will be more likely to be received well. I also would like to help develop your outreach presentation so that it addresses the stakeholders concerns more effectively. I strongly believe that Uplift Melrose's presentation left people confused and in turn did not get the credit it deserved. That is not to say that it would have been fully supported. However, many stakeholders made incorrect assumptions about the impacts and lack of mitigations. That could have been avoided.

Hi Alex,

I wanted to confirm our meeting for this Wednesday at 2pm. I did not receive a calendar invite or call-in details. Please advise.

Thanks,
Nasim

>
> Unfortunately, regardless of how supportive I am of your work, Uplift Melrose was not well received by a vocal part of the community. After speaking extensively with some of the active members of Melrose Village against the project, one reoccurring theme was not about the work itself but more about how it was presented. The neighbors felt that they were not included or given a voice and were being forced into change. That triggered distrust and fear from them.
>
> Although I do not share the same concerns, I understand that many of the residents have lived here for 20+ years and feel a sense of ownership to their local streets of LA. Justified or not, I am writing to you because I am most interested in protecting you as much as possible from falling into the same pattern and end result.
>
> I would like to suggest involving stakeholders at an earlier part of the process. It seems that you are developing a complete set of schematic designs to present to stakeholders. As much as I trust your work, I would like to suggest that you take a different approach this time. One that would help build the trust back from the neighbors who lobby hard against projects that they fear (and often not fully understand). One that also would gather support ahead of time from stakeholders like the police department.
>
> I am most interested in working with you to create a small group of stakeholders who can provide feedback at this early stage before schematic designs are completed so that your direction is one that will be more likely to be received well. I also would like to help develop your outreach presentation so that it addresses the stakeholders concerns more effectively. I strongly believe that Uplift Melrose's presentation left people confused and in turn did not get the credit it deserved. That is not to say that it would have been fully supported. However, many stakeholders made incorrect assumptions about the impacts and lack of mitigations. That could have been avoided.

The only way to make real change is to challenge old ideas. Your urban planning schemes do just that. Now let's get everyone on the same page so that we can move forward with a new Melrose!

I am happy to tell you in detail my motivations and qualifications beyond being a resident before you commit to including me in any of your work. I just hope you are open to at least setting up a call with me to hear out my ideas.

Thank you for your time.

I don't really have possession of any additional documents / information about this project. I'm thinking that I've seen paper documents about cash flows / grant disbursement schedules / etc. but didn't keep them. There would be no reason to do so.
> >
> > It seems appropriate to clarify that this is a City of Los Angeles project. While the concept for a grant application was originated by me, it

was handed over to Jeff Jacobberger, the BID's consultant at that time, Jay Greenstein, CD5 Planning Deputy, and other City staff for application preparation. The Melrose BID does not receive any of the funds nor is it in the official chain of command with respect to project details or construction or expenditures. The Melrose BID is an important stakeholder in the project and maintains an open line of communication with City staff in that regard. .
>
> You were asking about project details and disbursement schedules that are really best answered by someone that knows the details. It would seem like Jay Greenstein, Debbie Dyner Harris, or Alexander Caiozzo, all copied above, would be the people for you to talk to. The Melrose BID will, of course, do everything we can to assist you.
>

Hi Scott,
Hope you're doing well, and thanks for your quick response. In your email you say the flyers are one part of outreach, In my opinion it's a large part regarding this project. Nobody I have spoken to just North or South of Melrose received a flyer, or knows anything about them. And those are the people, That really should know what's going on. I do know of several people that received flyers on their doors on the south side of Beverly Blvd. . Something sounds strange to me regarding the flyers. I think the BID does a great job representing the landlords on Melrose but I don't think they represent the residence or the people that rent the stores at all. Can you please tell me what the outreach was besides the flyers? I personally don't know if I'm for Uplift Melrose or against it, but I do feel everybody should be informed about it before a decision is made
Thank you,
Dale Kendall

Hi, Dale.

Always great to be connected! Hope you and your loved ones are safe and healthy in these challenging times. I greatly appreciate your assistance on outreach for the Mid City Neighborhood Greenway project, which I think is going to be a wonderful improvement for Beverly Fairfax.

Dale, my understanding is that the flyering done by the BID included 2 blocks north and south of Melrose. I'm not sure why anyone south of Beverly would have received a flyer. That being said, the flyering is of course only one piece of the overall engagement strategy, and all community members can fill out the survey, provide feedback and opinions to Councilmember Koretz and StreetsLA, etc. As for Save Beverly Fairfax and the Greater Fairfax Residents Association, I'm unsure of whether the BID was aware of the organizations, although I know that Nora has been in very active communication with various decision-makers and I appreciate her engagement. I just became aware of the Greater Fairfax Residents Association very recently so perhaps the BID didn't know of its recent formation. In any case, I'm happy to make introductions, and also I'd be happy to chat with you about the various streetscape projects, Dale.

Very best,
Scott

Hi, Dale.

Debbie Dyner Harris who is on this email would be better positioned than me to speak to the outreach efforts. The official outreach strategy has been implemented by StreetsLA, which is the lead city agency developing the plan and potentially applying for the grant funds, and by the Melrose BID. It's true of course that Mid City West voted to support the project, and we have been doing our best as a neighborhood council to engage our stakeholders around the preojct, including use of our social media and email list to promote participation in the different meetings and with the survey on the project website.

Again, StreetsLA could speak better to the elements of the outreach plan, but from where I've

sat, it has included the project website, project survey, attendance at Mid City West, Melrose BID, and Greater Wilshire meetings, the town hall, and the postcards. There may very well be other efforts that I am not aware of.

Best,
Scott

Hi scott,
Thanks for the quick reply. I guess my  hunch is correct there hasn’t been very much out reach to the community. It seems that the Melrose BID thinks this is good for the landlords on melrose so there pushing for it. If you could please let the Melrose BID know that they need to do a lot more outreach for the residence I would appreciate it, and I know our community would as well.

I talk to a lot of people and when I mention it they haven't heard anything about it. And some of them have lived here for 15 to 20 years.
Thanks,
Dale
I know like me you want the best for our community.

Hi, Dale.

We can certainly agree that we both want what is best for the community! I don't personally agree that there hasn't been very much outreach, but I respect your opinion on the matter. I've CCed Don Duckworth of the Melrose BID so that he is aware of your concerns.

There's no question that there are a diverse range of opinions on this project. But I will take issue with the implication that the project is exclusively supported by property owners. Mid City West has heard from many homeowners, renters, business owners, and others who strongly support the project.

Best,
Scott

Hi Scott,
I guess there is some kind of a miscommunication. I guess because of Save Beverly Fairfax I get a lot of calls texts and emails from people in our area. At this point it's over 50 people that have contacted me and they are confused and just finding out about it. So I guess I'm just getting people that don't know what is going on and are concerned. As I said I'm not sure if I think it's good or bad idea. But the one thing I do know is a lot of people in our area don't even know it's been proposed. I called several of my tenants and asked what they thought about Uplift Melrose and they don't even know what I'm talking about.
Thanks,
Dale
Also I am for more trees, bike paths, and a greener city to fight Climate Change, that's something that's very important to me.

Neighborhood Greenway, and he'll be helping us out there by providing contact info for interested folks that we can share with Babak and Charlie.

Separate from that though, I wanted to connect him with you since you've been helping MCW outreach help for Uplift Melrose so that they were connected for that. Dale mentioned that folks in his area didn't receive fliers but folks south of Beverly did, and that the BID did not reach out to Save Beverly Fairfax or Greater Fairfax Res. Assoc. It is conceivable that the BID does not have these contacts or there is some sort of disconnect. But in our role, we can help bridge that disconnect and make sure people are connected and in the know!

I'll let you two take it from here.

Thanks,

M

> I've chatted with him and Nora about the Mid City Neighborhood Greenway, and he'll be helping us out there by providing contact info for interested folks that we can share with Babak and Charlie.
>
> Separate from that though, I wanted to connect him with you since you've been helping MCW outreach help for Uplift Melrose so that they were connected for that. Dale mentioned that folks in his area didn't receive fliers but folks south of Beverly did, and that the BID did not reach out to Save Beverly Fairfax or Greater Fairfax Res. Assoc. It is conceivable that the BID does not have these contacts or there is some sort of disconnect. But in our role, we can help bridge that disconnect and make sure people are connected and in the know!

The Melrose BID notified all residents between Fairfax and Highland, 2 blocks north and 2 blocks south about Wednesday's community meeting with StreetsLA . (Kim can fine tune that area description, if needed.) The Melrose BID printed flyers including a virtual meeting link and then had the flyers hand distributed to every residence on the morning of August 24, 2020. Hopefully we'll have a great turn out for Wednesday's meeting.

That is extremely impressive! Especially in this heat. I hope it went well. Thank you so much for doing that groundwork for the project.

Good Afternoon All...

Question re this evening's meeting format. A number of Melrose business and property owners and other stakeholders are on tight timelines and might have to leave the meeting early. Will those individuals be able to record their input in a Chat Box for GWNC Committee consideration? If not, what do you suggest? Would you want emails sent to a particular address? Please advise. Thank you.

Don et al,

We generally don't like to receive emails. They have a tendency to 'go under.' A physical:voice presence is much preferred.

That said, we also don't disregard emails outright. We do accept them. They're just not as persuasive.

The address is: landuse@greaterwilshire.org

Cheers
Philip

Thank you Philip. Is it possible to move this significant public participation item ahead on the Agenda to minimize the loss of individuals that do want to be involved? Some of the Agendized "internal" business items could be conducted after the Uplift Melrose item, appointment of a new member, for example. It's so great to have dedicated community members such as yourself that spend untold hours at these meetings. It is very much appreciated. Thank you. Some of the folks I talked to are dealing with conflicting personal and professional commitments, yet they want to have input. Is there anything we can do to facilitate here?

Subject: Re: HSIP GRANT AVAILABLE FOR SUBMISSION

---

Good Afternoon Joan & Debbie...

Deny Weintraub has found another State Grant that reportedly would be a good fit for Melrose Avenue. Since the purpose of the grant would be improving City infrastructure it seems like Council Office support would be required. Can you provide some guidance here?

Also, Deny's email raises the question of a 2022 ATP funding cycle for an Uplift Melrose type of project. Deny and the entire Melrose BID Board would like to continue working with the residential and business community now, so that an appropriate application would be complete by 2022. Deny and Peter Nichols have talked and apparently agreed to such a strategy. Would the Council Office support such an effort?

Please let us know your thoughts. If you'd like we can schedule a Zoom meeting for this week or next.

Subject: Re: HSIP GRANT AVAILABLE FOR SUBMISSION

---

Hi Don. The Councilmember is very supportive of ongoing opportunities for the various stakeholders to meet and find opportunities to work together. Whether in support of a grant like this one, or in support of other opportunities and even just general good relationships. However, I want to make very clear his position that unless the issue of public safety is resolved to the satisfaction of LAFD and LAPD, he won't be able to support any grant that reduces lanes on Melrose.

Regarding HSIP grants, it appears that Deny is suggesting we submit something for this October deadline. Given that the above public safety issue has not yet been resolved, the Councilmember won't be able to support another grant application. In

addition, HSIP grants are done through LADOT and we would need to have a conversation with them as to whether or not this would even make sense on Melrose. We have a lot of work to do with the various stakeholders and first responders before we head off on another grant application.

If I am mistaken on the timeline Deny is proposing, please let me know,
Debbie

Thanks Jeff. This will be very helpful. Debbie & I have already discussed the MTA Grant and the Melrose BID's interests. We look forward to connecting with Kevin and fleshing out a realistic and effective program for the City, Melrose BID, and MTA as soon as possible.

The Melrose BID Board is discussing this subject at their Board Meeting tomorrow.

Subject: Melrose BID MTA Grant
To: Jeff Jacobberger <jeff.jacobberger@gmail.com>

We are getting ready to try to negotiate some refinements / clarifications for incorporation into the MTA Grant. Maybe you even have some ideas for us here.

Who did you work with @ CD5 in preparing the application? Wasn't the understanding always that there would be an openness to improved line items that made good sense and met "1st mile, last mile" needs?

Since Ferdie Chan retired, we are not sure who to contact on the BSS staff about this grant. Do you have any idea?

We really want to get 2 Cobra style new crosswalks installed asap (@ Stanley and @ Orange Grove) that we have obtained TCR approvals for, possibly through the Grant. We'd also like to see some "festival lighting" installed along the street. And there are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery.

I've attached a copy of a budget summary as well as the Future Vision Plan section you wrote about the MTA Grant.

Let me know your thoughts. Thank you.

Hello Donald,

I'm generally overseeing the program which this project falls under and can work with you on the process to evaluate whether scope changes could be made. Alexander Caiozzo cc'd is the assigned project manager who's been working on the project design and is in the process of putting together some concept plans. He should be able to meet with you and the BID to discuss any specific scope items, including what you've discussed below. Some of these improvements may require additional investigation by LADOT and the Bureau of Street Lighting, but Alexander can help coordinate that effort.

**Kevin Minne, P.E.**

We are getting ready to try to negotiate some refinements / clarifications for incorporation into the MTA Grant. Maybe you even have some ideas for us here.

Who did you work with @ CD5 in preparing the application? Wasn't the understanding always that there would be an openness to improved line items that made good sense and met "1st mile, last mile" needs?

> Since Ferdie Chan retired, we are not sure who to contact on the BSS staff about this grant. Do you have any idea?
>

And of course, CD5 staff is here to assist in any way we can.

(Debbie and Kevin: I worked with the Melrose Avenue BID in preparing this grant application several years ago before I started with the City.)

I know that, for other grants, the State has allowed the City to change elements in the proposal. Kevin should be able to help walk you through the process.

If any of you need any other info, please let me know.

Thanks!

Jeff

Thank you for your email Kevin. Now that we are into a fresh new year we should plan to get together as soon as possible to discuss how best to proceed.

We really want to install 2 Cobra style new crosswalks (@ Stanley and @ Orange Grove), which have received LADOT TCR approvals. We'd also like to see some "festival lighting" installed along the street, which will enhance first mile / last mile pedestrian activity. There are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery. There are also a number of sections of sidewalk along the street that are missing or very damaged that we would ask to be repaired.

We've seen recent news articles that discussed plans with CD13 to re-vitalize Hollywood Boulevard through enhanced pedestrian measures, a center turning lane, and bicycle lane additions (as I understand it). If there is anything we can do through this MTA Grant to seek future grant funding from the City or MTA to further study the feasibility of implementing such a plan on Melrose Avenue, we would like to discuss that too.

I've attached a full copy of the Melrose BID's Future Vision Plan, which was prepared with the intent of guiding MTA grant expenditures.

My telephone is 818-515-2159 and we'll be making this MTA Grant the Melrose BID's highest priority. How can we get started?

Hi Don,

Since there are so many items to discuss, I think we should set up a meeting and follow an agenda so that we can move the needle a little bit on each item. I have information about sidewalk repairs, decorative street lighting, and the Hollywood Blvd improvements, and I am sure Jay (copied here) can help with the crosswalks. I am open to meeting some time the week of the 17th or the week of the 24th. I look forward to hearing from you folks.

We are getting ready to try to negotiate some refinements / clarifications for incorporation into the MTA Grant. Maybe you even have some ideas for us here.

Who did you work with @ CD5 in preparing the application? Wasn't the understanding always that there would be an openness to improved line items that made good sense and met "1st mile, last mile" needs?

Since Ferdie Chan retired, we are not sure who to contact on the BSS staff about this grant. Do you have any idea?

We really want to get 2 Cobra style new crosswalks installed asap (@ Stanley and @ Orange Grove) that we have obtained TCR approvals for, possibly through the Grant. We'd also like to see some "festival lighting" installed along the street. And there are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery.

I've attached a copy of a budget summary as well as the Future Vision Plan section you wrote about the MTA Grant.

Let me know your thoughts. Thank you.

There are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery. There are also a number of sections of sidewalk along the street that are missing or very damaged that we would ask to be repaired.

We've seen recent news articles that discussed plans with CD13 to re-vitalize Hollywood Boulevard through enhanced pedestrian measures, a center turning lane, and bicycle lane additions (as I understand it). If there is anything we can do through this MTA Grant to seek future grant funding from the City or MTA to further study the feasibility of implementing such a plan on Melrose Avenue, we would like to discuss that too.

I've attached a full copy of the Melrose BID's Future Vision Plan, which was prepared with the intent of guiding MTA grant expenditures.

My telephone is 818-515-2159 and we'll be making this MTA Grant the Melrose BID's highest priority. How can we get started?

Good Morning All,
My name is Alexander Caiozzo, the Bureau of Street Services Project Manager for the MTA grant funded Melrose Streetscape Project. Copied on this email is Jeff Palmer, the Project Lead. I would like to circle back on the request to meet and discuss the scope of work for the project as well as discuss the Melrose Future Vision. Our project team has assessed the Melrose Streetscape limits of work (from Highland to Fairfax) and will provide updates on current sidewalk conditions, tree conditions and the current overall scope of the MTA grant during our meeting.

We are available to meet at the following days/times:

Tuesday 2/25 - 9:00 am-12:00 pm
Wednesday 2/26 - 1:00 pm-3:00 pm
Thursday 2/27 - 9:00 am - 3:00 pm

Once a day/time is determined, we are happy to meet at any determined location.

Regards,

Thank you Alexander....

I was able to confirm our BID President's availability on Wednesday at 1 PM. Let's schedule that day and see how many we can get to attend. We liked Debbie's idea of having the meeting in the Wilshire Boulevard offices of CD5. Debbie / Kevin, can we still meet in your conference room that day / time?

We are getting ready to try to negotiate some refinements / clarifications for incorporation into the MTA Grant. Maybe you even have some ideas for us here.

Who did you work with @ CD5 in preparing the application? Wasn't the understanding always that there would be an openness to improved line items that made good sense and met "1st mile, last mile" needs?

Since Ferdie Chan retired, we are not sure who to contact on the BSS staff about this grant. Do you have any idea?

We really want to get 2 Cobra style new crosswalks installed asap (@

Stanley and @ Orange Grove) that we have obtained TCR approvals for, possibly through the Grant. We'd also like to see some "festival lighting" installed along the street. And there are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery.

I've attached a copy of a budget summary as well as the Future Vision Plan section you wrote about the MTA Grant.

Let me know your thoughts. Thank you.

Hello Donald et al,

Would Thursday morning next week work for you? say 9:30am maybe somewhere in city Hall CD5 offices?

On Thu, Feb 6, 2020 at 3:43 PM Kevin Nahai <kevin.nahai@lacity.org> wrote:

Hi Don,

Since there are so many items to discuss, I think we should set up a meeting and follow an agenda so that we can move the needle a little bit on each item. I have information about sidewalk repairs, decorative street lighting, and the Hollywood Blvd improvements, and I am sure Jay (copied here) can help with the crosswalks. I am open to meeting some time the week of the 17th or the week of the 24th. I look forward to hearing from you folks.

On Wed, Feb 5, 2020 at 1:58 PM Donald Duckworth <duckworth.donald@gmail.com> wrote:

When can we schedule a meeting? We'll ask CD5 to join us as well.

On Wed, Feb 5, 2020 at 1:56 PM Donald Duckworth <duckworth.donald@gmail.com> wrote:

Thank you for your email Kevin. Now that we are into a fresh new year we should plan to get together as soon as possible to discuss how best to proceed.

We really want to install 2 Cobra style new crosswalks (@ Stanley and @ Orange Grove), which have received LADOT TCR approvals. We'd also like to see some "festival lighting" installed along the street, which will enhance first mile / last mile pedestrian activity. There are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery. There are also a number of sections of sidewalk along the street that are missing or very damaged that we would ask to be repaired.

We've seen recent news articles that discussed plans with CD13 to re-vitalize Hollywood Boulevard through enhanced pedestrian measures, a center turning lane, and bicycle lane additions (as I understand it). If there is anything we can do through this MTA Grant to seek future grant funding from the City or MTA to further study the feasibility of implementing such a plan on Melrose Avenue, we would like to discuss that too.

I've attached a full copy of the Melrose BID's Future Vision Plan, which was prepared with the intent of guiding MTA grant expenditures.

My telephone is 818-515-2159 and we'll be making this MTA Grant the Melrose BID's highest priority. How can we get started?

On Fri, Nov 8, 2019 at 7:10 AM Kevin Minne <kevin.minne@lacity.org> wrote:

Hello Donald,

I'm generally overseeing the program which this project falls under and can work with you on the process to evaluate whether scope changes could be made. Alexander Caiozzo cc'd is the assigned project manager who's been working on the project design and is in the process of putting together some concept plans. He should be able to meet with you and the BID to discuss any specific scope items, including what you've discussed below. Some of these improvements may require additional investigation by LADOT and the Bureau of Street Lighting, but Alexander can help coordinate that effort.

We are getting ready to try to negotiate some refinements / clarifications for incorporation into the MTA Grant. Maybe you even have some ideas for us here.

Who did you work with @ CD5 in preparing the application? Wasn't the understanding always that there would be an openness to improved line items that made good sense and met "1st mile, last mile" needs?

Since Ferdie Chan retired, we are not sure who to contact on the BSS staff about this grant. Do you have any idea?

We really want to get 2 Cobra style new crosswalks installed asap (@ Stanley and @ Orange Grove) that we have obtained TCR approvals for, possibly through the Grant. We'd also like to see some "festival lighting" installed along the street. And there are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery.

I've attached a copy of a budget summary as well as the Future Vision Plan section you wrote about the MTA Grant.

Let me know your thoughts. Thank you.

---

Good Morning Alexander...

We concluded our last in-person meeting to prepare for the Melrose MTA Grant implementation by agreeing that the full Melrose BID Board would be brought into the discussion at their April 10 Regular Board Meeting at 10 AM. It was our intention to devote much of the entire meeting to your presentation, questions & answers, and discussions. With the latest turn of events given COVID-19, we'd like to arrange for this work to continue online via Zoom or some other screen sharing application. We can arrange for whatever medium you prefer; please let us know your preferences.

MTA Grant implementation will be an important element of getting the Melrose small business community back to normal as soon as possible. We are fortunate to have this opportunity to focus upon it.

We are getting ready to try to negotiate some refinements / clarifications for incorporation into the MTA Grant. Maybe you even have some ideas for us here.

Who did you work with @ CD5 in preparing the application? Wasn't the understanding always that there would be an openness to improved line items that made good sense and met "1st mile, last mile" needs?

Since Ferdie Chan retired, we are not sure who to contact on the BSS staff about this grant. Do you have any idea?

We really want to get 2 Cobra style new crosswalks installed asap (@ Stanley and @ Orange Grove) that we have obtained TCR approvals for, possibly through the Grant. We'd also like to see some "festival lighting" installed along the street. And there are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery.

I've attached a copy of a budget summary as well as the Future Vision Plan section you wrote about the MTA Grant.

Let me know your thoughts. Thank you.

> We concluded our last in-person meeting to prepare for the Melrose MTA Grant implementation by agreeing that the full Melrose BID Board would be brought into the discussion at their April 10 Regular Board Meeting at 10 AM. It was our intention to devote much of the entire meeting to your presentation, questions & answers, and discussions. With the latest turn of events given COVID-19, we'd like to arrange for this work to continue online via Zoom or some other screen sharing application. We can arrange for whatever medium you prefer; please let us know your preferences.

MTA Grant implementation will be an important element of getting the Melrose small business community back to normal as soon as possible.  We are fortunate to have this opportunity to focus upon it.

Hi Donald,

I apologize for my delayed response. Playing a bit of catch up here with everything that has been going on. We are still working and making every effort to continue to deliver projects. Hope you are well and staying healthy.

Jeff and I are still looking forward to presenting to the board on April 10, and will work with you on whatever remote/virtual method of presentation via video etc. We will convene in the left few days and get back to you on the best presentation method.

And yes, we very much understand that this project will revitalize this corridor immensely, especially after these difficult times pass.

We will be in touch soon.

Regards,
Alexander

If there is anything we can do through this MTA Grant to seek future grant funding from

the City or MTA to further study the feasibility of implementing such a plan on Melrose Avenue, we would like to discuss that too.

I've attached a full copy of the Melrose BID's Future Vision Plan, which was prepared with the intent of guiding MTA grant expenditures.

My telephone is 818-515-2159 and we'll be making this MTA Grant the Melrose BID's highest priority. How can we get started?

We are getting ready to try to negotiate some refinements / clarifications for incorporation into the MTA Grant. Maybe you even have some ideas for us here.

Who did you work with @ CD5 in preparing the application? Wasn't the understanding always that there would be an openness to improved line items that made good sense and met "1st mile, last mile" needs?

Since Ferdie Chan retired, we are not sure who to contact on the BSS staff about this grant. Do you have any idea?

We really want to get 2 Cobra style new crosswalks installed asap (@ Stanley and @ Orange Grove) that we have obtained TCR approvals for, possibly through the Grant. We'd also like to see some "festival lighting" installed along the street. And there are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery.

I've attached a copy of a budget summary as well as the Future Vision Plan section you wrote about the MTA Grant.

Let me know your thoughts. Thank you.

> > > Since there are so many items to discuss, I think we should set up a meeting and follow an agenda so that we can move the needle a little bit on each item. I have information about sidewalk repairs, decorative street lighting, and the Hollywood Blvd improvements, and I am sure Jay (copied here) can help with the crosswalks. I am open to meeting some time the week of the 17th or the week of the 24th. I look forward to hearing from you folks.

We'd also like to see some "festival lighting" installed along the street, which will enhance first mile / last mile pedestrian activity. There are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery. There are also a number of sections of sidewalk along the street that are missing or very damaged that we would ask to be repaired.

We've seen recent news articles that discussed plans with CD13 to re-vitalize Hollywood Boulevard through enhanced pedestrian measures, a center turning lane, and bicycle lane additions (as I understand it). If there is anything we can do through this MTA Grant to seek future grant funding from the City or MTA to further study the feasibility of implementing such a plan on Melrose Avenue, we would like to discuss that too.

I've attached a full copy of the Melrose BID's Future Vision Plan, which was prepared with the intent of guiding MTA grant expenditures.

My telephone is 818-515-2159 and we'll be making this MTA Grant the Melrose BID's highest priority. How can we get started?

> Hello Donald,
>
> I'm generally overseeing the program which this project falls under and can work with you on the process to evaluate whether scope changes could be made. Alexander Caiozzo cc'd is the assigned project manager who's been working on the project design and is in the process of putting together some concept plans. He should be able to meet with you and the BID to discuss any specific scope items, including what you've discussed below. Some of these improvements may require additional investigation by LADOT and the Bureau of Street Lighting, but Alexander can help coordinate that effort.

Harris, and Street Services' Kevin Minne, into the conversation.

(Debbie and Kevin: I worked with the Melrose Avenue BID in preparing this grant application several years ago before I started with the City.)

I know that, for other grants, the State has allowed the City to change elements in the proposal. Kevin should be able to help walk you through the process.

If any of you need any other info, please let me know.

Thanks!

Jeff

We are getting ready to try to negotiate some refinements / clarifications for incorporation into the MTA Grant. Maybe you even have some ideas for us here.

Who did you work with @ CD5 in preparing the application? Wasn't the understanding always that there would be an openness to improved line items that made good sense and met "1st mile, last mile" needs?

Since Ferdie Chan retired, we are not sure who to contact on the BSS staff about this grant. Do you have any idea?

We really want to get 2 Cobra style new crosswalks installed asap (@ Stanley and @ Orange Grove) that we have obtained TCR approvals for, possibly through the Grant. We'd also like to see some "festival lighting" installed along the street. And there are design needs that require specialized capabilities that are congruent with the Melrose Arts District Marketing & Promotions branding / imagery.

I've attached a copy of a budget summary as well as the Future Vision Plan section you wrote about the MTA Grant.

Let me know your thoughts. Thank you.

Good Evening Scott...

In reviewing your MCWCC Agenda today, it seemed to me that it would be best and most user friendly for most people attending the meeting, if you took the StreetsLA item out of order and let it go first. The LAPD and other office holder reps will understand. The individuals attending for the purpose of the StreetsLA presentation will appreciate your thoughtfulness. We want to make participation energizing and easy, not drudgery, right?

Yes, we can document participants, and in particular public commenters. Michael, maybe you can take screenshots of our attendees list so we know how many folks are on the call.

I'm also CCing our administrator, Amanda, and our board secretary, Vilma. Amanda and Vilma: it will be useful to have good documentation of our public commenters' names for the Melrose project.

Alexander, I'd like to share the website on our social media prior to the meeting if possible to help drive people to attend. I also want to make sure you understand that we need to take public comment on the item. I am leaning toward having your team present first so that public commenters can see the details before commenting.

Don, to your earlier email, I agree that we want to get to the item as soon as possible, and will work to get there as soon as we can. There are things, however, we need to do prior to the item, like appoint a new member.

Best,

Scott

Good Evening Scott...

In reviewing your MCWCC Agenda today, it seemed to me that it would be best and most user friendly for most people attending the meeting, if you took the StreetsLA item out of order and let it go first. The LAPD and other office holder reps will understand. The individuals attending for the purpose of the StreetsLA presentation will appreciate your thoughtfulness. We want to make participation energizing and easy, not drudgery, right?

Hi Alexander
I think we probably shouldn't have Isack Fadlon's personal gmail account on there. Can you give me context for why we need an email address on there, so we can provide one for you to use? Also, I'm not able to tap on "click here to join" from my phone; it might be a better idea to put the actual zoom link on there or put a link to our website where they can get the information on how to join.

Thanks, Alexander. I just tried taking the survey and got errors after I tried to submit. Maybe it's not ready for prime time yet but just wanted to let you know. Very much looking forward to tonight.

Scott and Michael,
Thanks for your quick response. Prior to the meeting tonight, it would be best to share the Project Brief only (see attached pdf). This is still pretty 'flashy' and should hopefully get folks interested in attending.

We can share the website link with survey information after the meeting. I want to be sure attendees have a chance to fully understand the project from our presentation, prior to having the opportunity to take the survey. In addition, that will give us a chance to ensure the survey is properly functioning - per Michael's email above.

Thank you,

**Alexander J. Caiozzo**

Good Morning Kim,
Hope you are well and staying healthy. I wanted to check in to see if there has been any progress in regards to selecting new graphics for the Melrose Arts District? We are working on the concept layout and would like to start to incorporate some of the graphics where possible. Considering everything that is happening with Covid-19, if there has not been much progress, we can just use previous graphics as place holders.

Regards,

**Alexander J. Caiozzo**

Good Morning Kim,
Thanks for reaching out. I apologize for my delayed response as I have been out of the office the past week. I am including Jeff Palmer on the email as well, as he is the Project Lead. We are available for a quick call today if you are available.
Does 2:00 pm or 3:00 pm work for you?

Let us know and which is the best number to reach you.

Thanks,

**Alexander J. Caiozzo**

**Subject:** MTA Grant Wayfinding Signage, Street Furniture, & Entry Features

The MTA Grant may provide funding for some or all of the subject improvements in the Melrose BID area. Because these improvements should reflect Melrose' unique brand, style, and graphic image, we have asked the City staff to work with us on design input. This email will introduce you to Mr. Alexander Caiozzo, the Melrose MTA Grant Project Manager. We should probably start working up some designs / thoughts here for Board consideration. Let me know as I may assist further. Thank you.

Hi Alexander:

We had a Board meeting a few weeks ago where new concepts were presented but we didn't have a quorum to approve. I've attached the logo we're leaning toward, but it is not approved. I'm not sure if you'd rather use our old one for this particular layout, also attached.

Let me know…

Best,
Kim

Good Morning Kim,
Hope you are well and staying healthy. I wanted to check in to see if there has been any progress in regards to selecting new graphics for the Melrose Arts District? We are working on the concept layout and would like to start to incorporate some of the graphics where possible. Considering everything that is happening with Covid-19, if there has not been much progress, we can just use previous graphics as place holders.

Regards,

**Alexander J. Caiozzo**

Subject: Re: Thank You - MTA Grant Melrose Ave

---

Good Afternoon Daniel,
Per the Grant, approximately 20 bus stops (Bus Stop/Transit Safety Improvements) along Melrose, are required to receive 2-3 pedestrian scale LED lights at each location. The light fixtures and locations have not yet been determined, however, we will be working with your group as well as the community to determine the most appropriate light fixture models from the Bureau of Street Lighting pre-approved fixtures.

Grant funding included the design of the system, materials and installation of lighting within bus zones. Pedestrian scale lighting within bus zones (Bus Stop Safety Lighting) is considered a general benefit and additional funding is not required to power the lights on a daily basis. Depending on the configuration of the bus stop and existing infrastructure, stand alone type poles (approximately 14-15 ' tall) and/or 'clamp on' lights that attach to larger roadway lights (similar to the image you shared), are implemented.

The 'clamp on' type lights serve the same purpose as the stand alone poles (see attached photo example), in that they output light focused on the sidewalk side of the street, benefiting pedestrians at night. The 'clamp on light' does come in different models and can match the stand alone pole light fixtures. The 'clamp on light' is typically implemented when there is no room within the parkway zone for a new pole, and an existing roadway light fixture exists; or if the placement of the light on an existing pole meets the lighting calculation for that particular sidewalk area. The Bureau of Street Lighting determines the layout, quantity, and pattern of lights to meet code requirements, lighting requirements, avoid large existing trees as best as possible and to minimize clutter within the sidewalk zone.

For the Melrose Streetscape Project, design of any additional lighting systems, materials and installation outside of a bus zone is not part of the Grant or included in the $3.9 million funding. In addition, the implementation of this type of 'clamp on' light as well as the stand alone pole require an approval process (Prop 218) and funding (BID/Business owners) to pay for the electricity to power the lights on a daily basis. They are not considered a general benefit.

Per our conversation on Friday, it was recommended that the BID work with the Bureau of Street Lighting on the possibility of getting approval for the 'Cafe/Market' style lights, similar to Cahuenga Blvd in Hollywood (see photo). Let us know if you have any additional questions.

Regards,

Subject: Re: Thank You - MTA Grant Melrose Ave

---

Thank you Alexander and Daniel...

We look forward to discussing various design options going forward. We really have the potential to make a tremendous positive impact on Melrose! I'm thinking that will reflect very well on the City Council Office too. Given that the Melrose BID is an assessment district, it may be able to facilitate any needed Proposition 218 vote. We can carefully consider that as our process unfolds.

We have initiated discussions with BSL about the possibility of adding "Cafe / Market / Festival" lighting along Melrose. We have the applications, permits, policy, etc. We have talked with Enrique Sanchez @ BSL who seems to be the right guy. We are awaiting a cost proposal from the vendor that installed the Cahuenga lighting. Alexander, I hope that you and Jeff might collaborate with us as we consider alternative lighting installation designs. Your expertise is so valuable.

Based on our last meeting and subsequent discussions, it seems to me that the BID Board might well want to consider bulb out options in conjunction with installation of the new crosswalks. They seem to have the added benefit of slowing traffic, which is a priority for the Mid City West Neighborhood Council, as I understand it. This might well be true even if some parking were lost. If bulb outs were incorporated at Stanley and Orange, that might establish a pattern for repetition with subsequent City or grant funding over time.

Alexander, we were going to schedule a meeting to discuss how we can work to facilitate the MTA Grant with crosswalk installation. Maybe we could use a small amount off Grant funding to pay for design or some other aspect of the crosswalks that would advance their priority for City Gas Tax or other funding. What do you think? Can we set that up for a specific time next week?

Also, Alexander was going to inquire as to how we might be able to quickly apply for additional MTA Call for Projects funds in the current cycle. Hoping that we can take advantage of the work we are doing together now that will need future funding to complete. Let me know if we need to

act, Alexander.  Thank you.

Looking forward to hearing from you next week.  Thank you again.

Have a good weekend.  Stay safe!!

---

Good Afternoon Donald,
Please see the attached draft meeting minutes per the presentation/conference call on 4.17.2020. If there are any comments or clarifications, please let me know.

We look forward to working with the BID, the Council Office and the Community on this project. We are truly excited to be a part of the process and the enhancement of the Melrose Arts District! Also happy to hear that you are working with Bureau of Street Lighting on the possible implementation of the 'cafe/festival' lighting. It really is very successful in other neighborhoods. Beyond the 'cafe/festival' lighting and pedestrian scale lighting, what other 'alternative lighting' was the BID considering?

Jeff and I have now reached out to our Grants Section, and have discussed your desire for bulbouts, crosswalk enhancements, Prop 218 lighting and other items not covered in the original 3.9 million grant. We will be having a follow up internal meeting next week regarding any possibilities or opportunities for additional grant funds and any possible methods on how the BID can gain the desired scope items. Once we have some more definitive answers, we will update the BID and Council Office via conference call. Until we have some more answers in regards to grant funding, we will hold off on setting up a meeting with DOT to discuss additional crosswalk enhancements.

In the interim, we would still like to identify priority corridors for enhancements along Melrose; whether or not additional funding is obtained. Do you have any availability Thursday or Friday (4/30 or 5/1) of this week to have a conference call to do a 'walk through' of the corridor and site plans via google/screenshare. At that time we can discuss in further detail our findings/assessments of the sidewalk conditions and overall existing site conditions, block by block. Let us know what day and time works best and we can send a calendar invite.

Regards,

**Alexander J. Caiozzo**

Thank you Alexander and Daniel...

We look forward to discussing various design options going forward. We really have the potential to make a tremendous positive impact on Melrose! I'm thinking that will reflect very well on the City Council Office too. Given that the Melrose BID is an assessment district, it may be able to facilitate any needed Proposition 218 vote. We can carefully consider that as our process unfolds.

We have initiated discussions with BSL about the possibility of adding "Cafe / Market / Festival" lighting along Melrose. We have the applications, permits, policy, etc. We have talked with Enrique Sanchez @ BSL who seems to be the right guy. We are awaiting a cost proposal from the vendor that installed the Cahuenga lighting. Alexander, I hope that you and Jeff might collaborate with us as we consider alternative lighting installation designs. Your expertise is so valuable.

Based on our last meeting and subsequent discussions, it seems to me that the BID Board might well want to consider bulb out options in conjunction with installation of the new crosswalks. They seem to have the added benefit of slowing traffic, which is a priority for the Mid City West Neighborhood Council, as I understand it. This might well be true even if some parking were lost. If bulb outs were incorporated at Stanley and Orange, that might establish a pattern for repetition with subsequent City or grant funding over time.

Alexander, we were going to schedule a meeting to discuss how we can work to facilitate the MTA Grant with crosswalk installation. Maybe we could use a small amount off Grant funding to pay for design or some other aspect of the crosswalks that would advance their priority for City Gas Tax or other funding. What do you think? Can we set that up for a specific time next week?

Also, Alexander was going to inquire as to how we might be able to quickly apply for additional MTA Call for Projects funds in the current cycle. Hoping that we can take advantage of the work we are doing together now that will need future funding to complete. Let me know if we need to act, Alexander. Thank you.

Looking forward to hearing from you next week. Thank you again.

Have a good weekend. Stay safe!!

Good Morning Donald,
Per our discussion last week, StreetsLA is looking into the additional grant possibilities and studying the corridor for possible increase in scope to be included in an ATP Grant.

Did you and the BID Group have a chance to identify key/focus corners within the Melrose corridor - from Highland to Fairfax? In addition, were there any comments to the meeting minutes, if not we will issue the final minutes.
Please let us know.

Thank you,

**Alexander J. Caiozzo**

Subject: RE: TIME SENSITIVE! Please Respond! Hancock Park Streets—Urgent

---

Hello, Debbie,

Thank you for the information!
We appreciate your keeping us informed on feedback and concerns from your constituents.

We will monitor this 4th Street item, including the GWNC Board meeting and community comments.

There are clear differences between the 2 proposals. Some that immediately pop out:

- Street types –Melrose is a Modified Avenue II Arterial Street, 4th is a Standard Local Street
- Uses – Melrose has a retail base that requires pedestrian activity to survive, 4th is all residential
- Access – Melrose proposal does not limit access from local residential streets, only reduces the number of left turns from Melrose
- Local traffic mitigation – Melrose proposal includes traffic slowing funding for local streets
- Residential zoning – Hancock Park is a preservation-focused district with an HPOZ. Our project area is commercial C2/C4 as well as residential in the R1V2 – 0 zones or multi-family zoning.
- Walkability to retail – Melrose residents love Melrose Boulevard and have supported efforts to keep small unique businesses viable that they can also walk to instead of driving outside the area
- Funding – Melrose proposal is State Funded

We also see there are some similar factors, especially making sure we reach out and engage with neighbors as we work our way through this process.
For that reason, we will take a close and careful look at community comments and plan a strong outreach engagement as we continue.

Thank you for the conversation and consideration.

Sincerely,

**Margaret Taylor**

Hi folks. Please see below for an email flyer relating to an action being taken by a committee of the Greater Wilshire NC, which is being opposed by the Hancock Park HOA. While this is not the same thing as what we are proposing, it is not that dissimilar. This community is directly to the east of our project, and I presume that this is the type of response we could be getting. Just wanted to give you as much information as possible,
Debbie

# TIME SENSITIVE!
# Please Respond!  Hancock Park Streets

Dear Hancock Park Residents,

* If you haven't had a chance to reply yet!

Please **hit REPLY to this email and copy** president@greaterwilshire.org vicepresident@greaterwilshire.org and snorekel@gmail.com

We urge residents and neighbors to **OPPOSE** the GWNC Traffic Committee Motion to install Bike/Traffic Light Treatments and Restricted Turns onto Highland and Rossmore from 4th and WOULD PROHIBIT cars from crossing over Highland or Rossmore at 4th at any time.

We also urge **SUPPORT** for the proposed HPHA'48 4th Mobility Plan Motion:

1) Require LADOT conduct a comprehensive study, *with community involvement and input,* to determine possible future needs for 4th Street
2) Investigate adding painted crosswalks at 4th and Highland and 4th and Rossmore.
3) Install needed ADA compliant curbs on 4th street,
4) Repair sidewalks and street sections using designs that preserve our mature tree canopy,
5) That no stop signs will be removed from 4th street in Hancock Park
6) That no Bike Traffic Lights or Restricted Turns will be installed at the intersections of 4th and Rossmore and 4th and Highland.
7) Require the City and GWNC include the Hancock Park community and Hancock Park Homeowners Association in any future discussions regarding 4th Street.

Your opinion is essential

the HPHA'48

For Context:

Earlier this year, hundreds of Hancock Park residents and neighbors expressed opposition to bike traffic light treatments and installation of restrictive turns on 4th Street at both Highland and Rossmore proposed by the GWNC Traffic Committee. The same bike plan for 4th street had already been opposed by the GWNC, the City and the Hancock Park community in 2011. The community had also been guaranteed no changes would be made without our HP community involvement. In violation of that agreement, the GWNC Traffic Committee has now voted to bypass the community, rescind the motion to oppose and instead revive the bike traffic light treatments, further prohibiting cars on 4th Street from ever crossing Highland and Rossmore at any time. This will drive traffic onto neighborhood side streets, and play havoc with Hancock Park. In addition, the proposed changes are prohibitively expensive— about $1.5 million total— when the city has no money to spare. The proposed bike plan is impractical, unrealistic, and strongly opposed by the community.

HPHA'48 made an alternate proposal, economically feasible, that would promote all forms of mobility and preserve the current traffic arrangement on 4th Street. The GWNC Traffic committee refused to consider this alternative so it can not be presented to the full GWNC Board for a vote. Details of both plans are outlined below. We urge residents and neighbors to OPPOSE the 4th Street bike lane changes by replying to this email. We also urge support for the proposed 4th Street mobility plan. Your opinion is essential so the GWNC Board votes and the city do not impose damaging changes on Hancock Park.

Hi Kevin and Peter,
We are actually preparing an invitation for a virtual community meeting on Wednesday August 26th at 6:30 pm. The invite will go out this evening or tomorrow morning. In addition, we will be presenting to the Greater Wilshire Land Use Committee on Tuesday August 25th. At this point, we might actually be running out of options for other days/times to present, as our initial outreach will be completing next week. Would you like to be included in the August 26th meeting? I am also happy to discuss the project with you as well over the phone if you have any immediate questions.

Please let us know.

Subject: Recovery Assistance Needs Melrose Property & Business Owners

---

Councilmember Koretz & CD5 Staff...

The Melrose BID Board and staff very much appreciate your reaching out to our business community with the question: "how can we help Melrose recover?" We have prepared and attached a new "recovery assistance needs letter" to guide our telephone conversation today (June 26 @ 4:00 PM). This letter closely follows our June 2 letter to the Mayor's Office and our letter to the CPC re the Restaurant Beverage Program, which are also attached. Please contact me as I can answer any questions or assist in any way.

We look forward to talking later today. Thank you.

Note to MBIA Board Members and others: CD5 provided the following conference call contact information:

If you can accommodate his request, I would like to offer **Friday, June 26th** at **4 p.m.** using the following to connect:
**Phone Number: +1 650-735-3011**
**PIN: 598 186 716#**

Subject: Small Business Need for Property Tax Payment Deferrment

---

Good Morning CD5! We hope this email finds you all well and safe!

The Melrose BID Board has requested that we reach out to you to determine the feasibility of a property tax payment deferment akin to that enacted by the Federal Government for income taxes. During the coming months all of the small business and property owners on Melrose and throughout CD5 and the City will be experiencing sever economic pain. Cash flows will be crushed! How could a tax payment deferment be arranged to provide short term relief?

We appreciate your thoughts and assistance.

Dear Don,

We hope you and the Board are all safe and healthy.

Please find County Assessor Jeff Prang's brief press release on behalf of the State Tax Collector addressing your very question. Essentially, property taxes are still due April 10th, however you may have the option to have late penalties waived. I hope this helps!

On Mon, Mar 23, 2020 at 11:15 AM Donald Duckworth <duckworth.donald@gmail.com> wrote:

Thanks Kevin...

The link did not work but we understand the Assessor's message. Frankly, it's not helpful.

We'd like to suggest a bigger picture perspective. We have a lot of Federal money coming in. It needs to be prioritized and spent to meet the biggest needs of the largest number of those suffering. Let's prioritize grants / loans to pay property taxes, which will help with the flow of essential government services, and / or compensate for lost rents and allow property owners to make their mortgage payments. The City should use it's available finding to hire case workers to help property and business owners avail themselves of obtuse / elusive governmental processes. The BID could arrange telephone / computer interviews with "pre-qualified" applicants. That would make a difference quickly. And helps move us back to normal.

These are good suggestions, and we can keep them in mind. this situation is fluid, and we will continue to fine tune how we can provide assistance to those who will need it. He should bring this to the Economic workforce development team. Copying Jasmine who may have some thoughts as well

We at this time have a hiring freeze. We don't deal with property taxes, County does and other parts of government. He will probably need to work through them. My two cents

We hope you and the Board are all safe and healthy.

Please find County Assessor Jeff Prang's brief press release on behalf of the State Tax Collector addressing your very question. Essentially, property taxes are still due April 10th, however you may have the option to have late penalties waived. I hope this helps!

This was one of the requests we asked the Mayor's office to look into- to extend their micro loan program to include assistance in paying for rent, etc. not just paying employees. They most likely are going to have a second phase for the microloan program, so hopefully it will be more expansive... I'll have an update on this next week.

Subject: The Proposed Uplift Melrose project

---

Dear Councilman Koretz ,

Last week, I attended the zoom meeting of the MCCW in order to learn more about the proposed Uplift Melrose project. As a long term resident of the area, I wanted to know what it was all about and how it could affect this neighborhood. The proposal design as shown was lovely, and I wish I could wake up magically one morning and find that Melrose now looked like that. However, I also realize that this project could equally mean that I wake up one day to a nightmare of finding that my residential neighborhood streets are now far noisier, jammed with traffic , and full of parked cars from commercial customers and commuters looking for alternative ways to travel east and west. As they say, the devil is in the details. There were precious few of them in the presentation at that meeting, other than some pretty renderings.

- I think it is extraordinary that the August 11th meeting was the first public presentation for a proposal of this magnitude, where a main traffic artery is going to be reduced by 50% and a loss of parking by apparently about the same percentage. AND, that the deadline to apply for this 40- 50 million dollar grant is a month away – seriously?! What private sector business would even consider spending that kind of money without a good plan - why would local government? Is spending close to $50 million on a less than a two mile stretch of street really a good use of taxpayer funds? I wonder how many miles of street paving could be done all over the City for that amount. Plus, it would seem logical that StreetsLA should consider repaving the section of Fairfax Avenue between Beverly Blvd. and Santa Monica Blvd. which is in absolutely terrible condition**, before** implementing a reduction of traffic at the intersection of Fairfax & Melrose.

- The late notification of this proposal to the public is unacceptable and sufficient outreach to area residents has not been done, has been overlooked or just plain ignored. The StreetsLA survey asks questions about sidewalks and bikeways, but nothing about traffic or parking problems. This gives the distinct impression that the MCCW, StreetsLA and Melrose BID are doing an end run around area residents & businesses to push this proposal and apply for the grant. It is my understanding that once a grant such as this is approved, no changes are allowed, so it is even more important for better consideration and deliberation of any plan. The Brown Act requires that bodies like MCCW take their actions and conduct their deliberations openly. It also further states that "**The people insist on remaining informed** so that they may retain control over the instruments they have created." I do not believe that the people have been sufficiently informed in this case and that a single zoom meeting with a small segment of the public (many of whom did not profess to be residents, just bike riding enthusiasts) does not constitute reasonable community input and was not sufficient for MCCW to even vote on the issue.

This lack of public outreach can surely be considered non transparent government. Melrose BID had email contact with many area residents last year in relation to the Stanley Plaza proposal, so they could easily have emailed many residents information about this. Flyers should have been posted and mailings done. On the Stanley Plaza project proposal, which was considerably smaller than Uplift Melrose, there were public meetings over many months to allow for public input. This needs to be done on Uplift Melrose as well. The September 15th deadline simply does not allow sufficient time for proper evaluation of this proposal, especially given the restrictions of Covid -19 and inability of people to congregate in person to ask questions and hold back and forth discussions. To the best of my knowledge, no further public outreach such as flyers or emails have been done since the August 11th meeting.

- As far as I am concerned, it is inconceivable to ask neighborhood residents or area merchants to make an informed decision on such a large project without pertinent facts, such as a traffic plan,

parking plan, estimated construction time for the project, how merchant clients access their businesses during construction, will dockless mobility riders use the bike lane, who is responsible for ongoing maintenance and many, many more. If these plans exist, no mention was made of them at the zoom meeting. If such plans do not exist, that alone should be enough reason to demand that the parties proposing Uplift Melrose put in the work, do the research and planning, offer solutions and present it to the public. Only then can a plan be agreed to by all parties.

· If LADOT has not done a study of the impact of traffic flow regarding the loss of two lanes of traffic from Fairfax to Highland and the surrounding area, it is beyond crazy, is poor planning and in my opinion, negligent. Melrose is one of the more narrow traffic arteries in the area. Clearly, fifty percent of traffic is not going to magically disappear once it hits this stretch of Melrose and there will be significant impact all along Melrose and surrounding streets, but especially bottlenecks at the major intersections. While I understand that one of the objects of this proposal is to reduce and slow traffic and encourage walking along this stretch of Melrose, I think everyone needs to be realistic about what a reasonable expectation of "reduced traffic" is.

The Uplift Melrose proposal design wants to make Melrose the type of area that will draw more people when completed, which means there is a distinct potential of increased traffic from outside to the neighborhood, even if through commuter traffic somehow gets diverted elsewhere. Melrose BID's own study last year showed that over 90% of people coming to shop on Melrose Avenue came by car or UBER. I surmise that while the percentage of alternate transportation users might increase, it is improbable that the majority of persons frequenting the type of shops on Melrose will come by bike, public transportation or on foot in the future. The spread of Los Angeles is simply not going to change.

· Given the recent looting and burned buildings on Melrose, it seems prudent to ask for an explanation of how this plan will impact emergency vehicles, including ambulances and fire engines. Have emergency services been asked for and given their input on this proposal?

· The Melrose BID, your own office, area merchants and residents already know that parking for Melrose shoppers has ALWAYS been a serious problem for the area. Uplift Melrose as presented, makes an already bad problem worse, and offers ZERO options of how to solve it. I am shocked that Melrose BID would accept a plan with decreased parking. The Melrose Avenue shopping district is a single commercial street situated in the middle of a much larger residential area along with two schools. The residents do not much impact the businesses, but the businesses certainly impact the residents. Residential streets absorb the parking overflow for restaurants, valet parking, retail stores and The Melrose Trading Post etc. Additionally, there are several blocks – Stanley, Curson and Sierra Bonita – that are not in any PPD, so these blocks would disproportionately bear the further burden of parking from this project, since they have no recourse to setting up parking restrictions.

· I want to state that I am not against improving Melrose. I would love to see it be a much nicer street for pedestrians and I think that many of the improvements shown in the renderings would be wonderful. If a good plan that solves the traffic and parking and various other issues created by the project is presented, I believe the neighborhood residents and merchants might support it. Residents, who are the majority stakeholders in the area, deserve to be presented with a comprehensive plan that they can live with. Shame on StreetsLA and LADOT for presenting a plan that offers no solutions to the problems it creates and shame on MCCW for failing to perform due diligence and ask for those solutions on behalf of the residents they purportedly represent.

· I would urge you to reject this very rushed and poorly considered proposal at this time and until such time as needed outreach to the neighborhood and appropriate studies have been done. I would suggest that StreetsLA, MCCW and Melrose BID all step back and take the time to come up with a comprehensive plan that offers solutions to the problems the plan creates, present it to the area residents with plenty of time to receive input and then apply for a Caltrans grant. That is the only logical, fair and sensible way to proceed at this time.

Best regards,
Angela Lightfoot

Subject: Re: The Proposed Uplift Melrose project

Hello Angela, thank you for this thoughtful email. First, I'd like to invite you to attend a community zoom meeting that StreetsLA will be hosting this Wednesday, August 26th. I have attached the flyer here, and you can learn more and take a survey by clicking on this link: https://streetsla.lacity.org/covid. You'll have an opportunity to learn more of the details and ask questions at that time. Some of the things you mention, including the potential for cut-through traffic and parking impacts, will be addressed at that presentation.

The grant the City would apply for is a State transportation grant for projects like these, designed to provide alternate modes of transportation and create pedestrian- and bike-friendly communities. You are correct, that there has been a limited opportunity to do outreach so far- however, StreetsLA and other stakeholders have already begun significant outreach beginning this weekend and next week, with thousands of flyers, door knocking, and store visits. We have already had thousands of people take the survey on our website, so word is spreading and will continue to do so. As I said above, we have a community meeting this Wednesday, and smaller meetings to specific groups will continue. If the City does apply for the grant, and it is awarded, we would do much wider and long term outreach on the project, as we are required and want to do.

Thank you again for your email,
Debbie

> Last week, I attended the zoom meeting of the MCCW in order to learn more about the proposed Uplift Melrose project. As a long term resident of the area, I wanted to know what it was all about and how it could affect this neighborhood. The proposal design as shown was lovely, and I wish I could wake up magically one morning and find that Melrose now looked like that. However, I also realize that this project could equally mean that I wake up one day to a nightmare of finding that my residential neighborhood streets are now far noisier, jammed with traffic , and full of parked cars from commercial customers and commuters looking for alternative ways to travel east and west. As they say, the devil is in the details. There were precious few of them in the presentation at that meeting, other than some pretty renderings.
>
> - I think it is extraordinary that the August 11th meeting was the first public presentation for a

proposal of this magnitude, where a main traffic artery is going to be reduced by 50% and a loss of parking by apparently about the same percentage. AND, that the deadline to apply for this 40-50 million dollar grant is a month away – seriously?! What private sector business would even consider spending that kind of money without a good plan - why would local government? Is spending close to $50 million on a less than a two mile stretch of street really a good use of taxpayer funds? I wonder how many miles of street paving could be done all over the City for that amount. Plus, it would seem logical that StreetsLA should consider repaving the section of Fairfax Avenue between Beverly Blvd. and Santa Monica Blvd. which is in absolutely terrible condition**, before** implementing a reduction of traffic at the intersection of Fairfax & Melrose.

· The late notification of this proposal to the public is unacceptable and sufficient outreach to area residents has not been done, has been overlooked or just plain ignored. The StreetsLA survey asks questions about sidewalks and bikeways, but nothing about traffic or parking problems. This gives the distinct impression that the MCCW, StreetsLA and Melrose BID are doing an end run around area residents & businesses to push this proposal and apply for the grant. It is my understanding that once a grant such as this is approved, no changes are allowed, so it is even more important for better consideration and deliberation of any plan. The Brown Act requires that bodies like MCCW take their actions and conduct their deliberations openly. It also further states that "**The people insist on remaining informed** so that they may retain control over the instruments they have created." I do not believe that the people have been sufficiently informed in this case and that a single zoom meeting with a small segment of the public (many of whom did not profess to be residents, just bike riding enthusiasts) does not constitute reasonable community input and was not sufficient for MCCW to even vote on the issue.

This lack of public outreach can surely be considered non transparent government. Melrose BID had email contact with many area residents last year in relation to the Stanley Plaza proposal, so they could easily have emailed many residents information about this. Flyers should have been posted and mailings done. On the Stanley Plaza project proposal, which was considerably smaller than Uplift Melrose, there were public meetings over many months to allow for public input. This needs to be done on Uplift Melrose as well. The September 15th deadline simply does not allow sufficient time for proper evaluation of this proposal, especially given the restrictions of Covid -19 and inability of people to congregate in person to ask questions and hold back and forth discussions. To the best of my knowledge, no further public outreach such as flyers or emails have been done since the August 11th meeting.

· As far as I am concerned, it is inconceivable to ask neighborhood residents or area merchants to make an informed decision on such a large project without pertinent facts, such as a traffic plan, parking plan, estimated construction time for the project, how merchant clients access their businesses during construction, will dockless mobility riders use the bike lane, who is responsible for ongoing maintenance and many, many more. Subject: Re: The Proposed Uplift Melrose project

---

Hi Debbie,

I think one of the big issues is that the proponents of Melrose Uplift seem to be trying to minimize the fact that travel lanes will be removed.

All kinds of euphemisms have been used. The MCWCC agenda description buried a vague reference to road re-design in its description of the project. The flyer for the Aug. 26 public meeting refers opaquely to “Road reconfiguration.” What do those words mean to ordinary laypeople? Why didn’t the City come right out and say, “Removal of travel lanes down to 1 in each direction to make way for bike lanes”?

The image itself is confusing visually — it appears to show two vehicles approaching the crosswalk. You have to look closely to see that one of those vehicles is parked. Or is it? The visual doesn’t telegraph the impact to the driving lanes.

People who glance at this might think “Wow, it looks beautiful," and not realize that the City wants to reduce the # of vehicle lanes.

If Upift Melrose is truly the greatest thing since sliced bread, then everyone concerned with promoting it needs to be absolutely honest and transparent. And with this flyer I don’t see that.

Hi Debbie,

Thanks for your response. I did receive an email from Mr. Duckworth of Melrose BID regarding the zoom meeting for August 26th. I hope the meeting will allow a good amount of time for a question and answer session.
I have already taken the survey which is pretty nonsensical in my opinion. As I said in my email, it does not even mention reduction in traffic lanes or loss of parking.

Best regards,
Angela Lightfoot

If such plans do not exist, that alone should be enough reason to demand that the parties proposing Uplift Melrose put in the work, do the research and planning, offer solutions and present it to the public. Only then can a plan be agreed to by all parties.

· If LADOT has not done a study of the impact of traffic flow regarding the loss of two lanes of traffic from Fairfax to Highland and the surrounding area, it is beyond crazy, is poor planning and in my opinion, negligent. Melrose is one of the more narrow traffic arteries in the area. Clearly, fifty percent of traffic is not going to magically disappear once it hits this stretch of Melrose and there will be significant impact all along Melrose and surrounding streets, but especially bottlenecks at the major intersections. While I understand that one of the objects of this proposal is to reduce and slow traffic and encourage walking along this stretch of Melrose, I think everyone needs to be realistic about what a reasonable expectation of "reduced traffic" is.

The Uplift Melrose proposal design wants to make Melrose the type of area that will draw more people when completed, which means there is a distinct potential of increased traffic from outside to the neighborhood, even if through commuter traffic somehow gets diverted elsewhere. Melrose BID's own study last year showed that over 90% of people coming to shop on Melrose Avenue came by car or UBER. I surmise that while the percentage of alternate transportation users might increase, it is improbable that the majority of persons

frequenting the type of shops on Melrose will come by bike, public transportation or on foot in the future. The spread of Los Angeles is simply not going to change.

· Given the recent looting and burned buildings on Melrose, it seems prudent to ask for an explanation of how this plan will impact emergency vehicles, including ambulances and fire engines. Have emergency services been asked for and given their input on this proposal?

· The Melrose BID, your own office, area merchants and residents already know that parking for Melrose shoppers has ALWAYS been a serious problem for the area. Uplift Melrose as presented, makes an already bad problem worse, and offers ZERO options of how to solve it. I am shocked that Melrose BID would accept a plan with decreased parking. The Melrose Avenue shopping district is a single commercial street situated in the middle of a much larger residential area along with two schools. The residents do not much impact the businesses, but the businesses certainly impact the residents. Residential streets absorb the parking overflow for restaurants, valet parking, retail stores and The Melrose Trading Post etc. Additionally, there are several blocks – Stanley, Curson and Sierra Bonita – that are not in any PPD, so these blocks would disproportionately bear the further burden of parking from this project, since they have no recourse to setting up parking restrictions.

· I want to state that I am not against improving Melrose. I would love to see it be a much nicer street for pedestrians and I think that many of the improvements shown in the renderings would be wonderful. If a good plan that solves the traffic and parking and various other issues created by the project is presented, I believe the neighborhood residents and merchants might support it. Residents, who are the majority stakeholders in the area, deserve to be presented with a comprehensive plan that they can live with. Shame on StreetsLA and LADOT for presenting a plan that offers no solutions to the problems it creates and shame on MCCW for failing to perform due diligence and ask for those solutions on behalf of the residents they purportedly represent.

· I would urge you to reject this very rushed and poorly considered proposal at this time and until such time as needed outreach to the neighborhood and appropriate studies have been done. I would suggest that StreetsLA, MCCW and Melrose BID all step back and take the time to come up with a comprehensive plan that offers solutions to the problems the plan creates, present it to the area residents with plenty of time to receive input and then apply for a Caltrans grant. That is the only logical, fair and sensible way to proceed at this time.

Best regards,
Angela Lightfoot
Stanley Avenue Resident

>> Hello Angela, thank you for this thoughtful email. First, I'd like to invite you to attend a community zoom meeting that StreetsLA will be hosting this Wednesday, August 26th. I have

attached the flyer here, and you can learn more and take a survey by clicking on this link: https://streetsla.lacity.org/covid. You'll have an opportunity to learn more of the details and ask questions at that time. Some of the things you mention, including the potential for cut-through traffic and parking impacts, will be addressed at that presentation.

The grant the City would apply for is a State transportation grant for projects like these, designed to provide alternate modes of transportation and create pedestrian- and bike-friendly communities. You are correct, that there has been a limited opportunity to do outreach so far-however, StreetsLA and other stakeholders have already begun significant outreach beginning this weekend and next week, with thousands of flyers, door knocking, and store visits. We have already had thousands of people take the survey on our website, so word is spreading and will continue to do so. As I said above, we have a community meeting this Wednesday, and smaller meetings to specific groups will continue. If the City does apply for the grant, and it is awarded, we would do much wider and long term outreach on the project, as we are required and want to do.

Thank you again for your email,
Debbie

> Dear Councilman Koretz ,
>
> Last week, I attended the zoom meeting of the MCCW in order to learn more about the proposed Uplift Melrose project. As a long term resident of the area, I wanted to know what it was all about and how it could affect this neighborhood. The proposal design as shown was lovely, and I wish I could wake up magically one morning and find that Melrose now looked like that. However, I also realize that this project could equally mean that I wake up one day to a nightmare of finding that my residential neighborhood streets are now far noisier, jammed with traffic , and full of parked cars from commercial customers and commuters looking for alternative ways to travel east and west. As they say, the devil is in the details. There were precious few of them in the presentation at that meeting, other than some pretty renderings.
>
> · I think it is extraordinary that the August 11th meeting was the first public presentation for a proposal of this magnitude, where a main traffic artery is going to be reduced by 50% and a loss of parking by apparently about the same percentage. AND, that the deadline to apply for this 40- 50 million dollar grant is a month away – seriously?! What private sector business would even consider spending that kind of money without a good plan - why would local government? Is spending close to $50 million on a less than a two mile stretch of street really a good use of taxpayer funds? I wonder how many miles of street paving could be done all over the City for that amount. Plus, it would seem logical that StreetsLA should consider repaving the section of Fairfax Avenue between Beverly Blvd. and Santa Monica Blvd. which is in absolutely terrible condition**,** **before** implementing a reduction of traffic at the intersection of Fairfax & Melrose.
>
> · The late notification of this proposal to the public is unacceptable and sufficient outreach to area residents has not been done, has been overlooked or just plain ignored. The StreetsLA survey asks questions about sidewalks and bikeways, but nothing about traffic or parking problems. This gives the distinct impression that the MCCW, StreetsLA and Melrose BID are doing an end run around area residents & businesses to push this proposal and apply for the grant. It is my understanding that once a grant such as this is approved, no changes are allowed, so it is even more important for better consideration and deliberation of any plan. The Brown Act requires that bodies like MCCW take their actions and conduct their deliberations openly. It also further states that "**The people insist on remaining informed**so that they may retain control over the instruments they have created." I do not believe that the people have been sufficiently informed in this case and that a single zoom meeting with a small segment of the public (many of whom did not profess to be residents, just bike riding enthusiasts) does not constitute reasonable community input and was not sufficient for MCCW to even vote on the issue.

This lack of public outreach can surely be considered non transparent government. Melrose BID had email contact with many area residents last year in relation to the Stanley Plaza proposal, so they could easily have emailed many residents information about this. Flyers should have been posted and mailings done. On the Stanley Plaza project proposal, which was considerably smaller than Uplift Melrose, there were public meetings over many months to allow for public input. This needs to be done on Uplift Melrose as well. The September 15th deadline simply does not allow sufficient time for proper evaluation of this proposal, especially given the restrictions of Covid -19 and inability of people to congregate in person to ask questions and hold back and forth discussions. To the best of my knowledge, no further public outreach such as flyers or emails have been done since the August 11th meeting.

· As far as I am concerned, it is inconceivable to ask neighborhood residents or area merchants to make an informed decision on such a large project without pertinent facts, such as a traffic plan, parking plan, estimated construction time for the project, how merchant clients access their businesses during construction, will dockless mobility riders use the bike lane, who is responsible for ongoing maintenance and many, many more. If these plans exist, no mention was made of them at the zoom meeting. If such plans do not exist, that alone should be enough reason to demand that the parties proposing Uplift Melrose put in the work, do the research and planning, offer solutions and present it to the public. Only then can a plan be agreed to by all parties.

· If LADOT has not done a study of the impact of traffic flow regarding the loss of two lanes of traffic from Fairfax to Highland and the surrounding area, it is beyond crazy, is poor planning and in my opinion, negligent. Debbie
You have been extremely helpful and for that I am most grateful but this response is beyond frustrating. At the bottom of page 1 (of 5) of the Exhibit A it lays out what outreach SHALL include. It continues on the next page and this is supposed to be done before you get to meetings. I realize in this age of COVID that meetings will be online but the attached survey is meaningless for a MP 2035 bike lane reconfiguration project.

The Brown Act requires that bodies like MCCW take their actions and conduct their deliberations openly. It also further states that "**The people insist on remaining informed** so that they may retain control over the instruments they have created." I do not believe that the people have been sufficiently informed in this case and that a single zoom meeting with a small segment of the public (many of whom did not profess to be residents, just bike riding enthusiasts) does not constitute reasonable community input and was not sufficient for MCCW to even vote on the issue.

This lack of public outreach can surely be considered non transparent government. Melrose BID had email contact with many area residents last year in relation to the Stanley Plaza proposal, so they could easily have emailed many residents information about this. Flyers should have been posted and mailings done. On the Stanley Plaza project proposal, which was considerably smaller than Uplift Melrose, there were public meetings over many months to allow for public input. This needs to be done on Uplift Melrose as well. The September 15th deadline simply does not allow sufficient time for proper evaluation of this proposal, especially given the restrictions of Covid -19 and inability of people to congregate in person to ask questions and hold back and forth discussions. To the best of my knowledge, no

further public outreach such as flyers or emails have been done since the August 11th meeting.

· As far as I am concerned, it is inconceivable to ask neighborhood residents or area merchants to make an informed decision on such a large project without pertinent facts, such as a traffic plan, parking plan, estimated construction time for the project, how merchant clients access their businesses during construction, will dockless mobility riders use the bike lane, who is responsible for ongoing maintenance and many, many more. If these plans exist, no mention was made of them at the zoom meeting. If such plans do not exist, that alone should be enough reason to demand that the parties proposing Uplift Melrose put in the work, do the research and planning, offer solutions and present it to the public. Only then can a plan be agreed to by all parties.

· If LADOT has not done a study of the impact of traffic flow regarding the loss of two lanes of traffic from Fairfax to Highland and the surrounding area, it is beyond crazy, is poor planning and in my opinion, negligent. Melrose is one of the more narrow traffic arteries in the area. Clearly, fifty percent of traffic is not going to magically disappear once it hits this stretch of Melrose and there will be significant impact all along Melrose and surrounding streets, but especially bottlenecks at the major intersections. While I understand that one of the objects of this proposal is to reduce and slow traffic and encourage walking along this stretch of Melrose, I think everyone needs to be realistic about what a reasonable expectation of "reduced traffic" is.

The Uplift Melrose proposal design wants to make Melrose the type of area that will draw more people when completed, which means there is a distinct potential of increased traffic from outside to the neighborhood, even if through commuter traffic somehow gets diverted elsewhere. Melrose BID's own study last year showed that over 90% of people coming to shop on Melrose Avenue came by car or UBER. I surmise that while the percentage of alternate transportation users might increase, it is improbable that the majority of persons frequenting the type of shops on Melrose will come by bike, public transportation or on foot in the future. The spread of Los Angeles is simply not going to change.

· Given the recent looting and burned buildings on Melrose, it seems prudent to ask for an explanation of how this plan will impact emergency vehicles, including ambulances and fire engines. Have emergency services been asked for and given their input on this proposal?

· The Melrose BID, your own office, area merchants and residents already know that parking for Melrose shoppers has ALWAYS been a serious problem for the area. Uplift Melrose as presented, makes an already bad problem worse, and offers ZERO options of how to solve it. I am shocked that Melrose BID would accept a plan with decreased parking. The Melrose Avenue shopping district is a single commercial street situated in the middle of a much larger residential area along with two schools. The residents do not much impact the businesses, but the businesses certainly impact the residents. Residential streets absorb the parking overflow for restaurants, valet parking, retail stores and The Melrose Trading Post etc. Additionally, there are several blocks – Stanley, Curson and Sierra Bonita – that are not in any PPD, so these blocks would disproportionately bear the further burden of parking from this project, since they have no recourse to setting up parking restrictions.

· I want to state that I am not against improving Melrose. I would love to see it be a much nicer street for pedestrians and I think that many of the improvements shown in the renderings would be wonderful. If a good plan that solves the traffic and parking and various other issues created by the project is presented, I believe the neighborhood residents and merchants might support it. Residents, who are the majority stakeholders in the area, deserve to be presented with a comprehensive plan

that they can live with. Shame on StreetsLA and LADOT for presenting a plan that offers no solutions to the problems it creates and shame on MCCW for failing to perform due diligence and ask for those solutions on behalf of the residents they purportedly represent.

· I would urge you to reject this very rushed and poorly considered proposal at this time and until such time as needed outreach to the neighborhood and appropriate studies have been done. I would suggest that StreetsLA, MCCW and Melrose BID all step back and take the time to come up with a comprehensive plan that offers solutions to the problems the plan creates, present it to the area residents with plenty of time to receive input and then apply for a Caltrans grant. That is the only logical, fair and sensible way to proceed at this time.

Best regards,
Angela Lightfoot
Stanley Avenue Resident

This is one more example of "we the people don't matter" coming from the City Family. I was hoping that the agreement negotiated in good faith with the City would be honored but I guess not. On to plan B.

You'll have an opportunity to learn more of the details and ask questions at that time. Some of the things you mention, including the potential for cut-through traffic and parking impacts, will be addressed at that presentation.
>>>
>>> The grant the City would apply for is a State transportation grant for projects like these, designed to provide alternate modes of transportation and create pedestrian- and bike-friendly communities. You are correct, that there has been a limited opportunity to do outreach so far- however, StreetsLA and other stakeholders have already begun significant outreach beginning this weekend and next week, with thousands of flyers, door knocking, and store visits. We have already had thousands of people take the survey on our website, so word is spreading and will continue to do so. As I said above, we have a community meeting this Wednesday, and smaller meetings to specific groups will continue. If the City does

apply for the grant, and it is awarded, we would do much wider and long term outreach on the project, as we are required and want to do.

Thank you again for your email,
Debbie

On Fri, Aug 21, 2020 at 11:41 AM Angela Lightfoot <moneypennyla@gmail.com> wrote:

Dear Councilman Koretz ,

Last week, I attended the zoom meeting of the MCCW in order to learn more about the proposed Uplift Melrose project. As a long term resident of the area, I wanted to know what it was all about and how it could affect this neighborhood. The proposal design as shown was lovely, and I wish I could wake up magically one morning and find that Melrose now looked like that. However, I also realize that this project could equally mean that I wake up one day to a nightmare of finding that my residential neighborhood streets are now far noisier, jammed with traffic , and full of parked cars from commercial customers and commuters looking for alternative ways to travel east and west. As they say, the devil is in the details. There were precious few of them in the presentation at that meeting, other than some pretty renderings.

- I think it is extraordinary that the August 11th meeting was the first public presentation for a proposal of this magnitude, where a main traffic artery is going to be reduced by 50% and a loss of parking by apparently about the same percentage. AND, that the deadline to apply for this 40- 50 million dollar grant is a month away – seriously?! What private sector business would even consider spending that kind of money without a good plan - why would local government? Is spending close to $50 million on a less than a two mile stretch of street really a good use of taxpayer funds? I wonder how many miles of street paving could be done all over the City for that amount. Plus, it would seem logical that StreetsLA should consider repaving the section of Fairfax Avenue between Beverly Blvd. and Santa Monica Blvd. which is in absolutely terrible condition**, before** implementing a reduction of traffic at the intersection of Fairfax & Melrose.

- The late notification of this proposal to the public is unacceptable and sufficient outreach to area residents has not been done, has been overlooked or just plain ignored. The StreetsLA survey asks questions about sidewalks and bikeways, but nothing about traffic or parking problems. This gives the distinct impression that the MCCW, StreetsLA and Melrose BID are doing an end run around area residents & businesses to push this proposal and apply for the grant. It is my understanding that once a grant such as this is approved, no changes are allowed, so it is even more important for better consideration and deliberation of any plan. The Brown Act requires that bodies like MCCW take their actions and conduct their deliberations openly. It also further states that "**The people insist on remaining informed** so that they may retain control over the instruments they have created." I do not believe that the people have been sufficiently informed in this case and that a single zoom meeting with a small segment of the public (many of whom did not profess to be residents, just bike riding enthusiasts) does not constitute reasonable community input and was not sufficient for MCCW to even vote on the issue.

Subject: Re: The Proposed Uplift Melrose project

---

James,
I'm hoping that Plan B is forceful and will nip this project as it is being presented at this time.
It is being thrown on us with not enough time to get residents and community input. Many residents are old and their voices will not be heard due to how the meeting will be facilitated.
Even for those who are quite familiar with how zoom works, a zoom meeting will be a challenge.
The back and forth dialogue will be absent.
There has been zero transparency from the onset of this project. Which we all know has been in the making for over a year.
I do agree with many of the ideas but also question a number of the details. Unfortunately, there's not enough time before the proposal is due on September 15th to hammer out a great idea and resolve the sticky features.
Those powers that are ruling this plan should have involved us earlier on so that we could have all come up with a proposal that would be wonderful for Melrose and takes into consideration the neighboring residents. They selected not to include us... I wonder why?
How many people actually now know about this project and how many will know about it before the meeting next week? Will they understand that the current plan removes 2 lanes of traffic? The current information dances around this with fancy terminology. Do they understand that pedestrians will share the sidewalk with Lime and Byrd Scooters? Do they know that ALL the detoured traffic will be on the residential streets?
Way too many unanswered questions.
Too bad StreetsLA, Melrose BID, LADOT and MCW didn't want to include the community in the first place. Could it be they wanted to pass this through without community input? Sure sounds

that way!
Sincerely,
Karen

>>>> The grant the City would apply for is a State transportation grant for projects like these, designed to provide alternate modes of transportation and create pedestrian- and bike-friendly communities. You are correct, that there has been a limited opportunity to do outreach so far- however, StreetsLA and other stakeholders have already begun significant outreach

beginning this weekend and next week, with thousands of flyers, door knocking, and store visits. We have already had thousands of people take the survey on our website, so word is spreading and will continue to do so. As I said above, we have a community meeting this Wednesday, and smaller meetings to specific groups will continue. If the City does apply for the grant, and it is awarded, we would do much wider and long term outreach on the project, as we are required and want to do.

Thank you again for your email,
Debbie

On Fri, Aug 21, 2020 at 11:41 AM Angela Lightfoot <moneypennyla@gmail.com> wrote:

Dear Councilman Koretz ,

Last week, I attended the zoom meeting of the MCCW in order to learn more about the proposed Uplift Melrose project. As a long term resident of the area, I wanted to know what it was all about and how it could affect this neighborhood. The proposal design as shown was lovely, and I wish I could wake up magically one morning and find that Melrose now looked like that. However, I also realize that this project could equally mean that I wake up one day to a nightmare of finding that my residential neighborhood streets are now far noisier, jammed with traffic , and full of parked cars from commercial customers and commuters looking for alternative ways to travel east and west. As they say, the devil is in the details. There were precious few of them in the presentation at that meeting, other than some pretty renderings.

- I think it is extraordinary that the August 11th meeting was the first public presentation for a proposal of this magnitude, where a main traffic artery is going to be reduced by 50% and a loss of parking by apparently about the same percentage. AND, that the deadline to apply for this 40- 50 million dollar grant is a month away – seriously?! What private sector business would even consider spending that kind of money without a good plan - why would local government? Is spending close to $50 million on a less than a two mile stretch of street really a good use of taxpayer funds? I wonder how many miles of street paving could be done all over the City for that amount. Plus, it would seem logical that StreetsLA should consider repaving the section of Fairfax Avenue between Beverly Blvd. and Santa Monica Blvd. which is in absolutely terrible condition**, before** implementing a reduction of traffic at the intersection of Fairfax & Melrose.

- The late notification of this proposal to the public is unacceptable and sufficient outreach to area residents has not been done, has been overlooked or just plain ignored. The StreetsLA survey asks questions about sidewalks and bikeways, but nothing about traffic or parking problems. This gives the distinct impression that the MCCW, StreetsLA and Melrose BID are doing an end run around area residents & businesses to push this proposal and apply for the grant. It is my understanding that once a grant such as this is approved, no changes are allowed, so it is even more important for better consideration and deliberation of any plan. The Brown Act requires that bodies like MCCW take their actions and conduct their deliberations openly. It also further states that "**The people insist on remaining informed** so that they may retain control over the instruments they have created." I do not believe that the people have been sufficiently informed in this case and that a single zoom meeting with a small segment of the public (many of whom did not profess to be residents, just bike riding

enthusiasts) does not constitute reasonable community input and was not sufficient for MCCW to even vote on the issue.

This lack of public outreach can surely be considered non transparent government. Melrose BID had email contact with many area residents last year in relation to the Stanley Plaza proposal, so they could easily have emailed many residents information about this. Flyers should have been posted and mailings done. On the Stanley Plaza project proposal, which was considerably smaller than Uplift Melrose, there were public meetings over many months to allow for public input. This needs to be done on Uplift Melrose as well. The September 15th deadline simply does not allow sufficient time for proper evaluation of this proposal, especially given the restrictions of Covid -19 and inability of people to congregate in person to ask questions and hold back and forth discussions. To the best of my knowledge, no further public outreach such as flyers or emails have been done since the August 11th meeting.

· As far as I am concerned, it is inconceivable to ask neighborhood residents or area merchants to make an informed decision on such a large project without pertinent facts, such as a traffic plan, parking plan, estimated construction time for the project, how merchant clients access their businesses during construction, will dockless mobility riders use the bike lane, who is responsible for ongoing maintenance and many, many more. If these plans exist, no mention was made of them at the zoom meeting. If such plans do not exist, that alone should be enough reason to demand that the parties proposing Uplift Melrose put in the work, do the research and planning, offer solutions and present it to the public. Only then can a plan be agreed to by all parties.

· If LADOT has not done a study of the impact of traffic flow regarding the loss of two lanes of traffic from Fairfax to Highland and the surrounding area, it is beyond crazy, is poor planning and in my opinion, negligent. Melrose is one of the more narrow traffic arteries in the area. Clearly, fifty percent of traffic is not going to magically disappear once it hits this stretch of Melrose and there will be significant impact all along Melrose and surrounding streets, but especially bottlenecks at the major intersections. While I understand that one of the objects of this proposal is to reduce and slow traffic and encourage walking along this stretch of Melrose, I think everyone needs to be realistic about what a reasonable expectation of “reduced traffic” is.

The Uplift Melrose proposal design wants to make Melrose the type of area that will draw more people when completed, which means there is a distinct potential of increased traffic from outside to the neighborhood, even if through commuter traffic somehow gets diverted elsewhere. Melrose BID’s own study last year showed that over 90% of people coming to shop on Melrose Avenue came by car or UBER. I surmise that while the percentage of alternate transportation users might increase, it is improbable that the majority of persons frequenting the type of shops on Melrose will come by bike, public transportation or on foot in the future. The spread of Los Angeles is simply not going to change.

· Given the recent looting and burned buildings on Melrose, it seems prudent to ask for an explanation of how this plan will impact emergency vehicles, including ambulances and fire engines. Have

emergency services been asked for and given their input on this proposal?

· The Melrose BID, your own office, area merchants and residents already know that parking for Melrose shoppers has ALWAYS been a serious problem for the area. Uplift Melrose as presented, makes an already bad problem worse, and offers ZERO options of how to solve it. I am shocked that Melrose BID would accept a plan with decreased parking. The Melrose Avenue shopping district is a single commercial street situated in the middle of a much larger residential area along with two schools. The residents do not much impact the businesses, but the businesses certainly impact the residents. Residential streets absorb the parking overflow for restaurants, valet parking, retail stores and The Melrose Trading Post etc. Additionally, there are several blocks – Stanley, Curson and Sierra Bonita – that are not in any PPD, so these blocks would disproportionately bear the further burden of parking from this project, since they have no recourse to setting up parking restrictions.

· I want to state that I am not against improving Melrose. I would love to see it be a much nicer street for pedestrians and I think that many of the improvements shown in the renderings would be wonderful. If a good plan that solves the traffic and parking and various other issues created by the project is presented, I believe the neighborhood residents and merchants might support it. Residents, who are the majority stakeholders in the area, deserve to be presented with a comprehensive plan that they can live with. Shame on StreetsLA and LADOT for presenting a plan that offers no solutions to the problems it creates and shame on MCCW for failing to perform due diligence and ask for those solutions on behalf of the residents they purportedly represent.

· I would urge you to reject this very rushed and poorly considered proposal at this time and until such time as needed outreach to the neighborhood and appropriate studies have been done. I would suggest that StreetsLA, MCCW and Melrose BID all step back and take the time to come up with a comprehensive plan that offers solutions to the problems the plan creates, present it to the area residents with plenty of time to receive input and then apply for a Caltrans grant. That is the only logical, fair and sensible way to proceed at this time.

Best regards,
Angela Lightfoot
Stanley Avenue Resident

Subject: Re: The Proposed Uplift Melrose project

---

Angela's email was so well put and echos many of my concerns.

Regarding the flyers, I walked from Spaulding to Fuller along Melrose and did not see a single one. There are none on my block - I live directly off Melrose to the south - and I haven't seen any within the Beverly Fairfax Historic District or the surrounding blocks.

This is very troubling, compounded by the fact that the flyer and survey leave out information regarding the lane reduction.

On Aug 21, 2020, at 7:31 PM, Karen Hebert <hebertmgt@aol.com> wrote:

James,
I'm hoping that Plan B is forceful and will nip this project as it is being presented at this time.
It is being thrown on us with not enough time to get residents and community input.
Many residents are old and their voices will not be heard due to how the meeting will

be facilitated. Even for those who are quite familiar with how zoom works, a zoom meeting will be a challenge. The back and forth dialogue will be absent.
There has been zero transparency from the onset of this project. Which we all know has been in the making for over a year.
I do agree with many of the ideas but also question a number of the details. Unfortunately, there's not enough time before the proposal is due on September 15th to hammer out a great idea and resolve the sticky features.
Those powers that are ruling this plan should have involved us earlier on so that we could have all come up with a proposal that would be wonderful for Melrose and takes into consideration the neighboring residents. They selected not to include us... I wonder why?
How many people actually now know about this project and how many will know about it before the meeting next week? Will they understand that the current plan removes 2 lanes of traffic? The current information dances around this with fancy terminology. Do they understand that pedestrians will share the sidewalk with Lime and Byrd Scooters? Do they know that ALL the detoured traffic will be on the residential streets?
Way too many unanswered questions.
Too bad StreetsLA, Melrose BID, LADOT and MCW didn't want to include the community in the first place. Could it be they wanted to pass this through without community input? Sure sounds that way!
Sincerely,
Karen

Subject: Re: The Proposed Uplift Melrose project

---

Karen
Plan B is actually a part of the settlement agreement but not labeled as such. For any Settlement Agreements with any government to work there has to be provisions to enforce as well as to evaluate the project if installed to determine if any problems have arisen. Should that be the case the project could be reversed which is why all of the outreach and metrics need to be employed before a decision is made.
To understand why this agreement contains what it contains it is important to understand what happened prior, during and just after we signed the agreement. The impetus was probably the Rowena Road diet in Silver lake. It was installed as a temporary lane reduction by Tom LaBonge and somehow it morphed into permanent lane closures which pitted the community against each other. As it turned out there was no study of the roads that flanked Rowena and the closure of lanes caused massive auto intrusion into the neighborhood. One of those streets didn't have sidewalks so people walked on the shoulder of the road.
Just as that was heating up the City installed bike lanes on Vista Del Mar in Mike Bonin's district. The battle that ensued was classic and brought residents and business owners together to challenge it and at one point they even waged a recall effort of Bonin. They were very organized and posted photo's and video's of the traffic impacts and the businesses started losing customers so eventually the bike lanes (which were billed as temporary) were pulled out. Never accept temporary. So in the midst of all this there were calls for bike lanes on Westwood Boulevard and also 6th street. Fix The City was involved in both and the lessons learned from all of the battles were put into the settlement agreement. Eventually Rowena stayed and Vista

was pulled.
Here are a couple of articles but there are more on the web.

https://la.curbed.com/2019/4/12/18308149/rowena-road-diet-report-cut-through-traffic

https://la.curbed.com/2017/10/18/16501128/playa-del-rey-road-diet-lane-reduction

Is spending close to $50 million on a less than a two mile stretch of street really a good use of taxpayer funds? I wonder how many miles of street paving could be done all over the City for that amount. Plus, it would seem logical that StreetsLA should consider repaving the section of Fairfax Avenue between Beverly Blvd. and Santa Monica Blvd. which is in absolutely terrible condition**, before** implementing a reduction of traffic at the intersection of Fairfax & Melrose.

· The late notification of this proposal to the public is unacceptable and sufficient outreach to area residents has not been done, has been overlooked or just plain ignored. The StreetsLA survey asks questions about sidewalks and bikeways, but nothing about traffic or parking problems. This gives the distinct impression that the MCCW, StreetsLA and Melrose BID are doing an end run around area residents & businesses to push this proposal and apply for the grant. It is my understanding that once a grant such as this is approved, no changes are allowed, so it is even more important for better consideration and deliberation of any plan. The Brown Act requires that bodies like MCCW take their actions and conduct their deliberations openly. It also further states that "**The people insist on remaining informed** so that they may retain control over the instruments they have created." I do not believe that the people have been sufficiently informed in this case and that a single zoom meeting with a small segment of the public (many of whom did not profess to be residents, just bike riding enthusiasts) does not constitute reasonable community input and was not sufficient for MCCW to even vote on the issue.

This lack of public outreach can surely be considered non transparent government. Melrose BID had email contact with many area residents last year in relation to the Stanley Plaza proposal, so they could easily have emailed many residents information about this. Flyers should have been posted and mailings done. On the Stanley Plaza project proposal, which was considerably smaller than Uplift Melrose, there were public meetings over many months to allow for public input. This needs to be done on Uplift Melrose as well. The September 15th deadline simply does not allow sufficient time for proper evaluation of this proposal, especially given the restrictions of Covid -19 and inability of people to congregate in person to ask questions and hold back and forth discussions. To the best of my knowledge, no further public outreach such as flyers or emails have been done since the August 11th meeting.

· As far as I am concerned, it is inconceivable to ask

neighborhood residents or area merchants to make an informed decision on such a large project without pertinent facts, such as a traffic plan, parking plan, estimated construction time for the project, how merchant clients access their businesses during construction, will dockless mobility riders use the bike lane, who is responsible for ongoing maintenance and many, many more. If these plans exist, no mention was made of them at the zoom meeting. If such plans do not exist, that alone should be enough reason to demand that the parties proposing Uplift Melrose put in the work, do the research and planning, offer solutions and present it to the public. Only then can a plan be agreed to by all parties.

· If LADOT has not done a study of the impact of traffic flow regarding the loss of two lanes of traffic from Fairfax to Highland and the surrounding area, it is beyond crazy, is poor planning and in my opinion, negligent. Melrose is one of the more narrow traffic arteries in the area. Clearly, fifty percent of traffic is not going to magically disappear once it hits this stretch of Melrose and there will be significant impact all along Melrose and surrounding streets, but especially bottlenecks at the major intersections. While I understand that one of the objects of this proposal is to reduce and slow traffic and encourage walking along this stretch of Melrose, I think everyone needs to be realistic about what a reasonable expectation of "reduced traffic" is.

The Uplift Melrose proposal design wants to make Melrose the type of area that will draw more people when completed, which means there is a distinct potential of increased traffic from outside to the neighborhood, even if through commuter traffic somehow gets diverted elsewhere. Melrose BID's own study last year showed that over 90% of people coming to shop on Melrose Avenue came by car or UBER. I surmise that while the percentage of alternate transportation users might increase, it is improbable that the majority of persons frequenting the type of shops on Melrose will come by bike, public transportation or on foot in the future. The spread of Los Angeles is simply not going to change.

· Given the recent looting and burned buildings on Melrose, it seems prudent to ask for an explanation of how this plan will impact emergency vehicles, including ambulances and fire engines. Have emergency services been asked for and given their input on this proposal?

· The Melrose BID, your own office, area merchants and residents already know that parking for Melrose shoppers has ALWAYS been a serious problem for the area. Uplift Melrose as presented, makes an already bad problem worse, and offers ZERO options of how to solve it. I am shocked that Melrose BID would accept a plan with decreased parking. The Melrose Avenue shopping district is a single commercial street situated in the middle of a much larger residential area along with two schools. The residents do not much impact the businesses, but the businesses certainly impact the residents. Residential streets absorb the parking overflow for restaurants, valet parking, retail stores and The Melrose Trading Post etc. Additionally, there are several blocks – Stanley, Curson and Sierra Bonita – that are not in any PPD, so these blocks would disproportionately bear the further burden of parking from this project, since they have no recourse to setting up parking restrictions.

· I want to state that I am not against improving Melrose. I would love to see it be a much nicer street for pedestrians and I think that

many of the improvements shown in the renderings would be wonderful. If a good plan that solves the traffic and parking and various other issues created by the project is presented, I believe the neighborhood residents and merchants might support it. Residents, who are the majority stakeholders in the area, deserve to be presented with a comprehensive plan that they can live with. Shame on StreetsLA and LADOT for presenting a plan that offers no solutions to the problems it creates and shame on MCCW for failing to perform due diligence and ask for those solutions on behalf of the residents they purportedly represent.

· I would urge you to reject this very rushed and poorly considered proposal at this time and until such time as needed outreach to the neighborhood and appropriate studies have been done. I would suggest that StreetsLA, MCCW and Melrose BID all step back and take the time to come up with a comprehensive plan that offers solutions to the problems the plan creates, present it to the area residents with plenty of time to receive input and then apply for a Caltrans grant. That is the only logical, fair and sensible way to proceed at this time.

Best regards,
Angela Lightfoot

Subject: Re: The Proposed Uplift Melrose project

---

*Thank you for your detailed explanation. Sounds like we have a very similar situation here with Uplift Melrose.*
*I'm not sure that a traffic impact study has been done as I have asked to see one to no avail. Considering that we live in this area, it amazes me that we were not contacted when this project was first initiated. Anyone of the city government people who says it "just came about, or they only heard very recently" is not being truthful.*
*It would have been very easy to have a representative group of merchants and residents contribute ideas and hash out a great design that would work for the masses. Obviously, the local governments decided not to include us until it was almost too late. That's very telling!*

In a message dated 8/21/2020 8:47:52 PM Pacific Standard Time, jamesos907@gmail.com writes:

> Karen
> Plan B is actually a part of the settlement agreement but not labeled as such. For any Settlement Agreements with any government to work there has to be provisions to enforce as well as to evaluate the project if installed to determine if any problems have arisen. Should that be the case the project could be reversed which is why all of the outreach and metrics need to be employed before a decision is made.
> To understand why this agreement contains what it contains it is important to understand what happened prior, during and just after we signed the agreement. The impetus was probably the Rowena Road diet in Silver lake. It was installed as a temporary lane reduction by Tom LaBonge and somehow it morphed into permanent lane closures which pitted the community against each other. As it turned out there was no study of the roads that flanked Rowena and the closure of lanes caused massive auto intrusion into the neighborhood. One of those streets didn't have sidewalks so people walked on the shoulder of the road.
> Just as that was heating up the City installed bike lanes on Vista Del Mar in Mike Bonin's district. The battle that ensued was classic and brought residents and business owners together to challenge it and at one point they even waged a recall effort of Bonin. They were very organized and posted photo's and video's of the traffic impacts and the businesses started losing customers so eventually the bike lanes (which were billed as

temporary) were pulled out. Never accept temporary. So in the midst of all this there were calls for bike lanes on Westwood Boulevard and also 6th street. Fix The City was involved in both and the lessons learned from all of the battles were put into the settlement agreement. Eventually Rowena stayed and Vista was pulled.
Here are a couple of articles but there are more on the web.

>> Hello Angela, thank you for this thoughtful email. First, I'd like to invite you to attend a community zoom meeting that StreetsLA will be hosting this Wednesday, August 26th. I have attached the flyer here, and you can learn more and take a survey by clicking on this link: https://streetsla.lacity.org/covid. You'll have an opportunity to learn more of the details and ask questions at that time. Some of the things you mention, including the potential for cut-through traffic and parking impacts, will be addressed at that presentation.
>>
>> The grant the City would apply for is a State transportation grant for projects like these, designed to provide alternate modes of transportation and create pedestrian- and bike-friendly communities. You are correct, that there has been a limited opportunity to do outreach so far- however, StreetsLA and other stakeholders have already begun significant outreach beginning this weekend and next week, with thousands of flyers, door knocking, and store visits. We have already had thousands of people take the survey on our website, so word is spreading and will continue to do so. As I said above, we have a community meeting this Wednesday, and smaller meetings to specific groups will continue. If the City does apply for the grant, and it is awarded, we would do much wider and long term outreach on the project, as we are required and want to do.

Thank you again for your email,
Debbie

On Fri, Aug 21, 2020 at 11:41 AM Angela Lightfoot <moneypennyla@gmail.com> wrote:

Dear Councilman Koretz ,

Last week, I attended the zoom meeting of the MCCW in order to learn more about the proposed Uplift Melrose project. As a long term resident of the area, I wanted to know what it was all about and how it could affect this neighborhood. The proposal design as shown was lovely, and I wish I could wake up magically one morning and find that Melrose now looked like that. However, I also realize that this project could equally mean that I wake up one day to a nightmare of finding that my residential neighborhood streets are now far noisier, jammed with traffic , and full of parked cars from commercial customers and commuters looking for alternative ways to travel east and west. As they say, the devil is in the details. There were precious few of them in the presentation at that meeting, other than some pretty renderings.

- I think it is extraordinary that the August 11th meeting was the first public presentation for a proposal of this magnitude, where a main traffic artery is going to be reduced by 50% and a loss of parking by apparently about the same percentage. AND, that the deadline to apply for this 40- 50 million dollar grant is a month away – seriously?! What private sector business would even consider spending that kind of money without a good plan - why would local government? Is spending close to $50 million on a less than a two mile stretch of street really a good use of taxpayer funds? I wonder how many miles of street paving could be done all over the City for that amount. Plus, it would seem logical that StreetsLA should consider repaving the section of Fairfax Avenue between Beverly Blvd. and Santa Monica Blvd. which is in absolutely terrible condition**, before** implementing a reduction of traffic at the intersection of Fairfax & Melrose.

- The late notification of this proposal to the public is unacceptable and sufficient outreach to area residents has not been done, has been overlooked or just plain ignored. The StreetsLA survey asks questions about sidewalks and bikeways, but nothing about traffic or parking problems. This gives the distinct impression that the MCCW, StreetsLA and Melrose BID are doing an end run around area residents & businesses to push this proposal and apply for the grant. Karen
I don't know what local government knew and when but I do know that the squeaky wheel theory has never been truer than it is today. The reason for the explanation and links (especially in CD 11) was to show what can be done when people organize and push back to save their

neighborhoods. There are advocacy groups that believe in a different vision for Los Angeles than most of us and they are organized. They are working to get politicians elected and they have connections all across the State. They are not playing around and you have to organize to save your neighborhood.
To that end we all have to keep talking to each other and the elected official but we also have to go offline and organize, which I would encourage you to do. Find a core group of like minded neighbors and start there. I think you have that already. Drop anyone connected with the City or Neighborhood Council and get to work. I realize both groups are on this email which is why I am saying this in the clear. They have their job to do and you have yours. Keep me in the loop and I will do what I can to help. Every group starts small. Not all groups remain that way. If service to your neighborhood is your guiding light that will carry you a long way.

>>> Dear Councilman Koretz ,

Last week, I attended the zoom meeting of the MCCW in order to learn more about the proposed Uplift Melrose project. As a long term resident of the area, I wanted to know what it was all about and how it could affect this neighborhood. The proposal design as shown was lovely, and I wish I could wake up magically one morning and find that Melrose now looked like that. However, I also realize that this project could equally mean that I wake up one day to a nightmare of finding that my residential neighborhood streets are now far noisier, jammed with traffic , and full of parked cars from commercial customers and commuters looking for alternative ways to travel east and west. As they say, the devil is in the details. There were precious few of them in the presentation at that meeting, other than some pretty renderings.

· I think it is extraordinary that the August 11th meeting was the first public presentation for a proposal of this magnitude, where a main traffic artery is going to be reduced by 50% and a loss of parking by apparently about the same percentage. AND, that the deadline to apply for this 40- 50 million dollar grant is a month away – seriously?! What private sector business would even consider spending that kind of money without a good plan - why would local government? Is spending close to $50 million on a less than a two mile stretch of street really a good use of taxpayer funds? I wonder how many miles of street paving could be done all over the City for that amount. Plus, it would seem logical that StreetsLA should consider repaving the section of Fairfax Avenue between Beverly Blvd. and Santa Monica Blvd. which is in absolutely terrible condition**, before** implementing a reduction of traffic at the intersection of Fairfax & Melrose.

· The late notification of this proposal to the public is unacceptable and sufficient outreach to area residents has not been done, has been overlooked or just plain ignored. The StreetsLA survey asks questions about sidewalks and bikeways, but nothing about traffic or parking problems. This gives the distinct impression that the MCCW, StreetsLA and Melrose BID are doing an end run around area residents & businesses to push this proposal and apply for the grant. It is my understanding that once a grant such as this is approved, no changes are allowed, so it is even more important for better consideration and deliberation of any plan. The Brown Act requires that bodies like MCCW take their actions and conduct their deliberations openly. It also further states that "**The people insist on remaining informed** so that they may retain control over the instruments they have created." I do not believe that the people have been sufficiently informed in this case and that a single zoom meeting with a small segment of the public (many of whom did not profess to be residents, just bike riding enthusiasts) does not constitute reasonable community input and was not sufficient for MCCW to even vote on the issue.

This lack of public outreach can surely be considered non transparent government. Melrose BID had email contact with many area residents last year in relation to the Stanley Plaza proposal, so they could easily have emailed many residents information about this. Flyers should have been posted and mailings done. On the Stanley Plaza

project proposal, which was considerably smaller than Uplift Melrose, there were public meetings over many months to allow for public input. This needs to be done on Uplift Melrose as well. The September 15th deadline simply does not allow sufficient time for proper evaluation of this proposal, especially given the restrictions of Covid -19 and inability of people to congregate in person to ask questions and hold back and forth discussions. To the best of my knowledge, no further public outreach such as flyers or emails have been done since the August 11th meeting.

· As far as I am concerned, it is inconceivable to ask neighborhood residents or area merchants to make an informed decision on such a large project without pertinent facts, such as a traffic plan, parking plan, estimated construction time for the project, how merchant clients access their businesses during construction, will dockless mobility riders use the bike lane, who is responsible for ongoing maintenance and many, many more. If these plans exist, no mention was made of them at the zoom meeting. If such plans do not exist, that alone should be enough reason to demand that the parties proposing Uplift Melrose put in the work, do the research and planning, offer solutions and present it to the public. Only then can a plan be agreed to by all parties.

· If LADOT has not done a study of the impact of traffic flow regarding the loss of two lanes of traffic from Fairfax to Highland and the surrounding area, it is beyond crazy, is poor planning and in my opinion, negligent. Melrose is one of the more narrow traffic arteries in the area. Clearly, fifty percent of traffic is not going to magically disappear once it hits this stretch of Melrose and there will be significant impact all along Melrose and surrounding streets, but especially bottlenecks at the major intersections. While I understand that one of the objects of this proposal is to reduce and slow traffic and encourage walking along this stretch of Melrose, I think everyone needs to be realistic about what a reasonable expectation of “reduced traffic” is.

The Uplift Melrose proposal design wants to make Melrose the type of area that will draw more people when completed, which means there is a distinct potential of increased traffic from outside to the neighborhood, even if through commuter traffic somehow gets diverted elsewhere. Melrose BID’s own study last year showed that over 90% of people coming to shop on Melrose Avenue came by car or UBER. I surmise that while the percentage of alternate transportation users might increase, it is improbable that the majority of persons frequenting the type of shops on Melrose will come by bike, public transportation or on foot in the future. The spread of Los Angeles is simply not going to change.

· Given the recent looting and burned buildings on Melrose, it seems prudent to ask for an explanation of how this plan will impact emergency vehicles, including ambulances and fire engines. Have emergency services

been asked for and given their input on this proposal?

· The Melrose BID, your own office, area merchants and residents already know that parking for Melrose shoppers has ALWAYS been a serious problem for the area. Uplift Melrose as presented, makes an already bad problem worse, and offers ZERO options of how to solve it. I am shocked that Melrose BID would accept a plan with decreased parking. The Melrose Avenue shopping district is a single commercial street situated in the middle of a much larger residential area along with two schools. The residents do not much impact the businesses, but the businesses certainly impact the residents. Residential streets absorb the parking overflow for restaurants, valet parking, retail stores and The Melrose Trading Post etc. Additionally, there are several blocks – Stanley, Curson and Sierra Bonita – that are not in any PPD, so these blocks would disproportionately bear the further burden of parking from this project, since they have no recourse to setting up parking restrictions.

· I want to state that I am not against improving Melrose. I would love to see it be a much nicer street for pedestrians and I think that many of the improvements shown in the renderings would be wonderful. If a good plan that solves the traffic and parking and various other issues created by the project is presented, I believe the neighborhood residents and merchants might support it. Residents, who are the majority stakeholders in the area, deserve to be presented with a comprehensive plan that they can live with. Shame on StreetsLA and LADOT for presenting a plan that offers no solutions to the problems it creates and shame on MCCW for failing to perform due diligence and ask for those solutions on behalf of the residents they purportedly represent.

· I would urge you to reject this very rushed and poorly considered proposal at this time and until such time as needed outreach to the neighborhood and appropriate studies have been done. I would suggest that StreetsLA, MCCW and Melrose BID all step back and take the time to come up with a comprehensive plan that offers solutions to the problems the plan creates, present it to the area residents with plenty of time to receive input and then apply for a Caltrans grant. That is the only logical, fair and sensible way to proceed at this time.

Best regards,
Angela Lightfoot
Stanley Avenue Resident

Subject: Re: The Proposed Uplift Melrose project

---

Hi everyone,

It has been very informative to hear so many constructive comments about the Uplift Melrose project. I hope many of you will attend the Zoom meeting on Wednesday. Before the meeting it might be interesting to watch this well made and well balanced video on many of the same topics we are discussing. It is by Bloomberg and Citylab. It is very current and considers the impacts from Covid-19.

In trying to find healthy solutions to dangerous traffic and economic and climate concerns there are a lot of best practices being implemented around our city, state and the country. It is possible, if done correctly and with constructive input from stakeholders, Uplift Melrose could be a model for how our wonderful neighborhood can meet the future.

https://www.youtube.com/watch?v=b2HvW2iGNRk

The video is about 14 minutes long but well worth it for all the information explained. I look forward to us all working together to keep Mid City an amazing place to live and raise a family.

Sincerely,

Taylor Nichols

> I don't know what local government knew and when but I do know that the squeaky wheel theory has never been truer than it is today. The reason for the explanation and links (especially in CD 11) was to show what can be done when people organize and push back to save their neighborhoods. There are advocacy groups that believe in a different vision for Los Angeles than most of us and they are organized. They are working to get politicians elected and they have connections all across the State. They are not playing around and you have to organize to save your neighborhood.
> To that end we all have to keep talking to each other and the elected official but we also have to go offline and organize, which I would encourage you to do. Find a core group of like minded neighbors and start there. I think you have that already. Drop anyone connected with the City or Neighborhood Council and get to work. I realize both groups are on this email which is why I am saying this in the clear. They have their job to do and you have yours. Keep me in the loop and I will do what I can to help. Every group starts small. Not all groups remain that way. If service to your neighborhood is your guiding light that will carry you a long way.

> Karen
> Plan B is actually a part of the settlement agreement but not labeled as such. For any Settlement Agreements with any government to work there has to be provisions to enforce as well as to evaluate the project if installed to determine if any problems have arisen. Should that be the case the project could be reversed which is why all of the outreach and metrics need to be employed before a decision is made.
> To understand why this agreement contains what it contains it is important to understand what happened prior, during and just after we signed the agreement. The impetus was probably the Rowena Road diet in Silver lake. It was installed as a temporary lane reduction by Tom LaBonge and somehow it morphed into permanent lane closures which pitted the community against each other. As it turned out there was no study of the roads that flanked Rowena and the closure of lanes caused massive auto intrusion into the neighborhood. One of those streets didn't have sidewalks so people walked on the shoulder of the road.
> Just as that was heating up the City installed bike lanes on Vista Del Mar in Mike Bonin's district. The battle that ensued was classic and brought residents and business owners together to challenge it and at one point they even waged a recall effort of Bonin. They were very organized and posted photo's and video's of the traffic impacts and the businesses started losing customers so eventually the bike lanes (which were billed as temporary) were pulled out. Never accept temporary. So in the midst of all this there were calls for bike lanes on Westwood Boulevard and also 6th street. Fix The City was involved in both and the lessons learned from all of the battles were put into the settlement agreement. Eventually Rowena stayed and Vista was pulled.

Is spending close to $50 million on a less than a two mile stretch of street really a good use of taxpayer funds? I wonder how many miles of street paving could be done all over the City for that amount. Plus, it would seem logical that StreetsLA should consider repaving the section of Fairfax Avenue between Beverly Blvd. and Santa Monica Blvd. which is in absolutely terrible condition**, before** implementing a reduction of traffic at the intersection of Fairfax & Melrose.

· The late notification of this proposal to the public is unacceptable and sufficient outreach to area residents has not been done, has been overlooked or just plain ignored. The StreetsLA survey asks questions about sidewalks and bikeways, but nothing about traffic or parking problems. This gives the distinct impression that the MCCW, StreetsLA and Melrose BID are doing an end run around area residents & businesses to push this proposal and apply for the grant. It is my understanding that once a grant such as this is approved, no changes are allowed, so it is even more important for better consideration and deliberation of any plan. The Brown Act requires that bodies like MCCW take their actions and conduct their deliberations openly. It also further states that "**The people insist on remaining informed** so that they may retain control over the instruments they have created." I do not believe that the people have been sufficiently informed in this case and that a single zoom meeting with a small segment of the public (many of whom did not profess to be residents, just bike riding enthusiasts) does not constitute reasonable community input and was not sufficient for MCCW to even vote on the issue.

This lack of public outreach can surely be considered non transparent government. Melrose BID had email contact with many area residents last year in relation to the Stanley Plaza proposal, so they could easily have emailed many residents information about this. Flyers should have been posted and mailings done. On the Stanley Plaza project proposal, which was considerably smaller than Uplift Melrose, there were public meetings over many months to allow for public input. This needs to be done on Uplift Melrose as well. The September 15th deadline simply does not allow sufficient time for proper evaluation of this proposal, especially given the restrictions of Covid -19 and inability of people to congregate in person to ask questions and hold back and forth discussions. To the best of my knowledge, no further public outreach such as flyers or emails have been done since the August 11th meeting.

· As far as I am concerned, it is inconceivable to ask neighborhood residents or area merchants to make an informed decision on such a large project without pertinent facts, such as a traffic plan, parking plan, estimated construction time for the project, how merchant clients access their businesses during construction, will dockless mobility riders use the bike lane, who is responsible for ongoing maintenance and many, many more. If these plans exist, no mention was made of them at the zoom meeting. If such plans do not exist, that alone should be enough reason to demand that the parties proposing Uplift Melrose put in the work, do the research and planning, offer solutions and present it to the public. Only then can a plan be agreed to by all parties.

· If LADOT has not done a study of the impact of traffic flow regarding the loss of two lanes of traffic from Fairfax to Highland and the surrounding area, it is beyond crazy, is poor planning and in my opinion, negligent. Melrose is one of the more narrow traffic arteries in the area. Clearly, fifty percent of traffic is not going to magically disappear once it hits this stretch of Melrose and there will be significant impact all along Melrose and surrounding streets, but especially bottlenecks at the major intersections. While I understand that one of the objects of this proposal is to reduce and slow traffic and encourage walking along this stretch of Melrose, I think everyone needs to be realistic about what a reasonable expectation of "reduced traffic" is.

The Uplift Melrose proposal design wants to make Melrose the type of area that will draw more people when completed, which means there is a distinct potential

of increased traffic from outside to the neighborhood, even if through commuter traffic somehow gets diverted elsewhere. Melrose BID's own study last year showed that over 90% of people coming to shop on Melrose Avenue came by car or UBER. I surmise that while the percentage of alternate transportation users might increase, it is improbable that the majority of persons frequenting the type of shops on Melrose will come by bike, public transportation or on foot in the future. The spread of Los Angeles is simply not going to change.

· Given the recent looting and burned buildings on Melrose, it seems prudent to ask for an explanation of how this plan will impact emergency vehicles, including ambulances and fire engines. Have emergency services been asked for and given their input on this proposal?

· The Melrose BID, your own office, area merchants and residents already know that parking for Melrose shoppers has ALWAYS been a serious problem for the area. Uplift Melrose as presented, makes an already bad problem worse, and offers ZERO options of how to solve it. I am shocked that Melrose BID would accept a plan with decreased parking. The Melrose Avenue shopping district is a single commercial street situated in the middle of a much larger residential area along with two schools. The residents do not much impact the businesses, but the businesses certainly impact the residents. Residential streets absorb the parking overflow for restaurants, valet parking, retail stores and The Melrose Trading Post etc. Additionally, there are several blocks – Stanley, Curson and Sierra Bonita – that are not in any PPD, so these blocks would disproportionately bear the further burden of parking from this project, since they have no recourse to setting up parking restrictions.

· I want to state that I am not against improving Melrose. I would love to see it be a much nicer street for pedestrians and I think that many of the improvements shown in the renderings would be wonderful. If a good plan that solves the traffic and parking and various other issues created by the project is presented, I believe the neighborhood residents and merchants might support it. Residents, who are the majority stakeholders in the area, deserve to be presented with a comprehensive plan that they can live with. Shame on StreetsLA and LADOT for presenting a plan that offers no solutions to the problems it creates and shame on MCCW for failing to perform due diligence and ask for those solutions on behalf of the residents they purportedly represent.

· I would urge you to reject this very rushed and poorly considered proposal at this time and until such time as needed outreach to the neighborhood and appropriate studies have been done. I would suggest that StreetsLA, MCCW and Melrose BID all step back and take the time to come up with a comprehensive plan that offers solutions to the problems the plan creates, present it to the area residents with plenty of time to receive input and then apply for a Caltrans grant. That is the only logical, fair and sensible way to proceed at this time.

Best regards,
Angela Lightfoot
Stanley Avenue Resident

<debbie.dynerharris@lacity.org> wrote:

Hello Angela, thank you for this thoughtful email. First, I'd like to invite you to attend a community zoom meeting that StreetsLA will be hosting this Wednesday, August 26th. I have attached the flyer here, and you can learn more and take a survey by clicking on this link: https://streetsla.lacity.org/covid. You'll have an opportunity to learn more of the details and ask questions at that time. Some of the things you mention, including the potential for cut-through traffic and parking impacts, will be addressed at that presentation.

The grant the City would apply for is a State transportation grant for projects like these, designed to provide alternate modes of transportation and create pedestrian- and bike-friendly communities. You are correct, that there has been a limited opportunity to do outreach so far- however, StreetsLA and other stakeholders have already begun significant outreach beginning this weekend and next week, with thousands of flyers, door knocking, and store visits. We have already had thousands of people take the survey on our website, so word is spreading and will continue to do so. As I said above, we have a community meeting this Wednesday, and smaller meetings to specific groups will continue. If the City does apply for the grant, and it is awarded, we would do much wider and long term outreach on the project, as we are required and want to do.

Thank you again for your email,
Debbie

Subject: Uplift Melrose - Building a Better Community

---

Good Afternoon Pastor Mark...

We've missed not seeing you around in these difficult times. I hope you and your family, friends, and parishioners are all well.

I'm writing about the newest project that the Melrose BID and the City of Los Angeles have collaborated on. It's called Uplift Melrose. Please click on the link below and learn about the project. It would make substantial improvements to Melrose and the Hope Lutheran Church environment / neighborhood. And take the survey too.

https://streetsla.lacity.org/melrose

We'd like to arrange a presentation to Hope Lutheran Church and its members. Whether or not this project happens will depend upon community support. that's part of the reason website visits are so important. Matthew Needleman is doing the same at Melrose elementary School. Pierson Blaetz is doing the same thing with Fairfax HS. Time is extremely short. Is there a day / time we could schedule that 1 hour Zoom meeting this week or next? What can we do to encourage the support of Hope Lutheran church and its members?

I'm at 818-515-2159 if you want to talk. Thank you.

Good Afternoon Pastor Mark...

We've missed not seeing you around in these difficult times. I hope you and your family, friends, and parishioners are all well.

I'm writing about the newest project that the Melrose BID and the City of Los Angeles have collaborated on. It's called Uplift Melrose. Please click on the link below and learn about the project. It would make substantial improvements to Melrose and the Hope Lutheran Church

environment / neighborhood. And take the survey too.

https://streetsla.lacity.org/melrose

We'd like to arrange a presentation to Hope Lutheran Church and its members. Whether or not this project happens will depend upon community support. that's part of the reason website visits are so important. Matthew Needleman is doing the same at Melrose elementary School. Pierson Blaetz is doing the same thing with Fairfax HS. Time is extremely short. Is there a day / time we could schedule that 1 hour Zoom meeting this week or next? What can we do to encourage the support of Hope Lutheran church and its members?

I'm at 818-515-2159 if you want to talk. Thank you.

Good Afternoon Phillip,
Thank you for your interest and support in the Bureau of Street Services (StreetsLA) seeking grant funding for this exciting project.

In addition to your letter of support to the Council Office; we kindly request you please provide a letter of support using the attached Word Document template. In order to have a complete grant application, a minimum of 10 letters of support are required and a letter from your organization will make an even stronger chance of StreetsLA winning the grant funding.

**Instructions:**
1. Add any header, logo or title of your group/organization(your typical letterhead)
2. Letter shall be addressed to Mr. Mitch Weiss, Executive Director
California Transportation Commission (as shown on template).
3. Feel free to add any language in the body of the letter, that may be specific to your organization and the direct benefits this project will have
4. Remove all yellow highlighted areas
5. Sign letter
6. Please email a pdf copy to Alexander Caiozzo - **no later than Friday September 4, 2020**

*alexander.caiozzo@lacity.org*

Thank you again for your support.

**Alexander J. Caiozzo**

***Until further notice, Design-Build staff will be working remotely. Please be assured services to the City and our residents will continue in the safest manner possible.***

Subject: UPLIFT MELROSE PROPOSAL - Letter of Support Needed (From Other Organizations)

---

Don,
In addition to a letter of support from the BID, can you please request letters of support from the school contacts (Melrose Elementary and Fairfax High) and churches/temples in the area.
Thank you -
**Use the request format below:**

We kindly request you please provide a letter of support using the attached Word Document template. In order to have a complete grant application, a minimum of 10 letters of support are required and a letter from your organization will make an even stronger chance of StreetsLA winning the grant funding.

**Instructions:**
1. Add any header, logo or title of your group/organization(your typical letterhead)
2. Letter shall be addressed to Mr. Mitch Weiss, Executive Director
California Transportation Commission (as shown on template).
3. Feel free to add any language in the body of the letter, that may be specific to your organization and the direct benefits this project will have
4. Remove all yellow highlighted areas
5. Sign letter
6. Please email a pdf copy to Alexander Caiozzo - **no later than Friday September 4, 2020**

*alexander.caiozzo@lacity.org*

Thank you again for your support.

Good Afternoon...

Attached is the MBID revised letter.

I will have the Friends of Fairfax High School Letter tomorrow night. I'll send it to you Sunday. It's been completed , just needs to be run through the scanner.

Melrose Elementary School Principal is in process on his letter. I may have to pick it up Tuesday, September 8 and transmit it that day.

Hope Lutheran Church letter is in process. Details to follow.

Jewish community letter is in process with Isack Fadlon. Details to follow.

Mid City West Community Council letter is in process with Isack Fadlon. Details to follow.

Let me know as I can assist further in any way. Thank you.

Subject: Uplift Melrose Proposal: Melrose Avenue Offsite Parking Opportunities

---

Good Afternoon Donald,

StreetsLA was happy to have good feedback and support at the Mid City West Community Council Meeting last night. The Board/public comments regarding the proposed safety improvements (protected bike lanes, lane reductions, wider sidewalks etc) were overall positive. However, as you heard there was some concern with the potential 40-50% loss of parking along Melrose Avenue.

In past conversations with you and the BID, the Melrose Vision Plan already touched on these types of proposed safety improvements as well as the effect on parking.

Prior to our preparation of this transformative proposal, It is to our understanding that the BID has been preemptively working on plans for mitigating these types of parking losses. Can you please share the BIDs plan for any off site parking mitigations. This information will be very beneficial for future community events as well as our grant application. We can discuss further if necessary.

Thank you,

**Alexander J. Caiozzo**

Subject: Uplift Melrose Support and Opposition Documentation

---

Hi Debbie,
I have summarized all of the 'official' support and opposition we have received for Uplift Melrose, mainly through formal letters and emails. See the attached *'List of Official Support and Opposition'*

In addition, for your reference, I have compiled the letters of support, emails of support (and opposition),letters of support addressed to the grantor at CalTrans and the StreetsLA website survey results.

Let us know if you need us to go through anything with you.

Thanks,

**Alexander J. Caiozzo**

Subject: Uplift Melrose Virtual Community Meeting: Wednesday August 26th 6:30 pm

---

Good Afternoon All,
Please join the Bureau of Street Services (StreetsLA) on **Wednesday, August 26th at 6:30 pm** - for a **Virtual Community Meeting** to learn more about the Uplift Melrose Proposal.

Working with neighbors, business owners, tenants, Council District 5, and others in the community around Melrose Avenue, StreetsLA has identified exciting and transformative improvements to the streetscape between Fairfax and Highland Avenues, to Uplift Melrose and activate safe public space on the streets of LA.This will be your opportunity to gain a better understanding of the project proposal and have your voice heard. If the Uplift Melrose Proposal is approved by the community, StreetsLA will be submitting a competitive grant application in September, for State funding in the amount of approximately 50 million dollars.

**See attached Virtual Community Meeting flyer**

**Or go directly to our website here**
https://streetsla.lacity.org/melrose

We would appreciate it if the BID, Council Office, and Neighborhood Councils can share this attached flyer invitation with other constituents, business owners, residents etc. StreetsLA, Mid City West and the BID canvassed Melrose Avenue today, informing tenants of the upcoming meeting. Informational flyers will also be dropped at 5,000 residences north and south of Melrose as early as Monday.

Thank you and we look forward to seeing you all at the virtual community meeting on Wednesday August 26th.

Regards,

**Alexander J. Caiozzo**

Alex,

Please be sure to send us the latest flyers and any information you would consider helpful.

I would like to email a number of them out so I can personally drum up neighborhood engagement for the GWNC Land Use meeting on Tuesday 8/25/2020 at 6:30pm. I have already been speaking to various neighbors and businesses about it and am excited to hopefully get some valuable feedback.

Hi Philip,
In addition to the August 26th Virtual Community Meeting, we can create a separate flyer for the August 25th Land Use Committee Meeting and send back to you tomorrow. Is the Land Use Committee Meeting open to all and something you would like to publicly advertise?

In addition, we have been directing people to our project website, which has the project brief (attached). Thank you again for your assistance and support.

It is indeed a public and open meeting and, yes, we do advertise it!
In addition to some physical postings in permitted areas, we also have a Facebook and an instagram presence as well as a new Social Media manager.

I will get in touch with you directly tomorrow.

Subject: Uplift Melrose

---

Hi everyone. I am sorry to do this via email, but I tried calling Don's cell but it was full. This way, I can reach out to all of you at once. (If I've left out some key BID leaders, please forward my apologies.)

After taking a lot of time and doing a lot of research, the Councilmember has decided not to support submitting the grant application for Uplift Melrose. While he felt there were a lot of great things about it, he still had a list of concerns which he felt could not be meaningfully addressed. We'll be sharing a letter he has drafted shortly that will explain his decision in greater detail.

I am sure this is very disappointing, as I know how much you and your co-owners and BID members wanted to see this happen. You put so much effort and work into this process, I am sorry it didn't turn out as you were hoping. However, I know that we will still be able to do some great things with the Metro grant and Kevin and I very much look forward to those meetings and brain-storming sessions, and their positive outcomes.

Melrose will still succeed and we will all be the better for it.

All my best,
Debbie

Hi Debbie,

This is utterly shocking in so many ways. We really need to understand how he reached this

decision, given the level of support that was presented.

Thank you,

Isack Fadlon

---

As a 20-year resident and homeowner in West Hollywood, I write to express my strong support for the Uplift Melrose project. Melrose Avenue is one of our most unique and vibrant streets. I often eat and socialize there. My gym (Phoenix Effect) is on Melrose. My daily bike commute takes me parallel to Melrose — though I now use a side-street because it's not bike-friendly. In fact I've always thought it dangerous both to bikes and pedestrians. Over the years the through-traffic in particular has gotten more and more aggressive. Recently I passed a memorial to a pedestrian who was hit by a drunk driver near Melrose and Martel. It's an area that cries out for a greater unity between indoor (retail, food, drink) and outdoor spaces, that is more hospitable to the people that walk the street. In that context, the plan for Uplift Melrose strikes me as a wonderful solution, prioritizing those who live work and play in the area and surrounding neighborhoods, rather than those passing through. And I think it will attract more people to make a positive contribution to the area, rather than just using it as an urban freeway on their way to somewhere else. Please count this homeowner and longtime resident and fan of Melrose as a vote in favor of the project. Sincerely, H. Seth Resnik 1247 N Vista Street W Hollywood, CA

Subject: Uplift Melrose

---

*Dear Councilman Koretz,*

*On Tuesday, August 11th, I attended a virtual Mid City West meeting. This is the very first time that I had heard anything about "Uplift Melrose". Since then I have visited the Uplift Melrose detailed website and it seems that plans have been in discussion for quite some time. I'm extremely disappointed that there has been zero public outreach to keep us informed. Not one neighborhood person I have spoken with knows anything about this. There has not been a community meeting allowing people to voice their opinions let alone being kept informed of these potential plans.*

*In theory, Uplift Melrose appears to be a great idea. However, in execution it is greatly flawed. There is zero need for a bike path on Melrose Avenue. As much as people would like to think...LA is not a bike town. Very few people travel to work on a bicycle and there are far better places to ride a bike for enjoyment other than on a city street. I don't see people driving to Melrose with their bikes on a bike rack to ride the 20 or so blocks this involves and there are no connecting bike paths to allow for a substantial ride. If they did drive here, those additional cars will park on our already congested side streets.*

*When BID wanted to put the Plaza on North Stanley Avenue, they did a questionnaire and the percentage of people who wanted a bike path was next to nil.*

*To suggest having a bike path on the same level as pedestrians is a very dangerous idea. There have already been numerous accidents that I know of involving scooters and pedestrians. A designated bike path will only be over-run with scooters.*

*There is an existing bike path on Fairfax Avenue and I have never seen anyone actually use it. Beverly Hills spent a great deal of money to install a bike path on Santa Monica Blvd which is also never used.*

*Melrose is a well traveled street. People use it to go to and from their homes, to work and to visit. It is a relatively narrow street and already overwhelmed with traffic. The mere thought of removing one lane of traffic in each direction is, in my opinion, a very poor plan. The street comes to a standstill when waiting for someone to parallel park their car or exit a parked space. With only one lane of traffic, people will become irate and speed into oncoming traffic just to keep moving. Even currently with two lanes in each direction, Melrose Avenue is often at a standstill.*

*Permanently not allowing any left turns off Melrose between Fairfax and Highland will put a considerable amount of additional traffic on our already burdened local neighborhood streets. It will take forever trying to make a left turn from Beverly Blvd. onto Fairfax in order to use Waring or Willoughby to travel East. And I suppose the same would be true on Highland Avenue.*

*This plan also calls for a reduction in parking. Parking on Melrose is currently extremely difficult, already burdening the local neighborhood streets and with a reduction, this will hinder existing business even further. Parking has always been the number one complaint from merchants and residence.*

*The existing sidewalks are in terrible shape. They are broken, have pieces of missing cement and are uneven and cracked. I personally tripped on an uneven sidewalk and hit my head. An*

*ambulance was called since I was unconscious for a few seconds.*

*The idea of additional lighting and landscape is great. The trees will beautify the area and the lights may have a positive impact on safety. I would like to support these changes along with much needed sidewalk repair.*

*I think that the following items need to be considered prior to moving ahead with this reckless idea:*

1. *traffic impact study for surrounding neighborhood streets*
2. *traffic impact study for Melrose itself when one lane is removed in each direction*
3. *the removal of parking spaces will cause an already bad situation to be worse*
4. *number of people who use bike paths in surrounding areas*
5. *Community/neighborhood meeting*

*Seems to me that encouraging/allowing the city the spend 40-50 million dollars on this project is absurd. We sadly have not seen the fallout from the Covid 19 pandemic. People will be jobless, evicted and hungry. Not the time to proceed with an unneeded vanity project considering the scope of the crisis we will be facing.*

*I would like to know where the Councilman's office stands on this project.*
*Please feel free to forward my comments to LA DOT and Streets LA as I do not have an email address to include.*

*Sincerely,*

*Karen Hebert*
*849 North Stanley Avenue*
*Los Angeles, CA 90046*

Hello Karen, thank you very much for your email. I appreciate your feedback, and I hope that you'll be submitting your thoughts to the online survey. Here is the link if you do not have it: https://streetsla.lacity.org/melrose. Scroll to the bottom to click on the survey link.

You asked what the Councilmember's position on this project is, and I am happy to

share. At this time he is open minded to the concept, but he and his staff have made very clear to the proponents that he wanted to see significant community outreach to as many folks as possible before he would feel comfortable taking a position. He understands that this would be a significant project with a long-lasting impact on the community, so he wants to be thoughtful about the process. Once he has an understanding of where community feelings lie, he'll be able to make an informed decision on whether to be supportive or not. As of yesterday, approximately 2,000 had already submitted responses to the survey.

The community outreach did not really begin until just last week, when the City's StreetsLA (also known as Bureau of Street Services) presented the concept at the MCWNC. However, since then more outreach has occurred, and more will continue through the next few weeks. I hope you'll share the survey with your friends and neighbors in the Melrose area as every response helps.

I am very sorry that you tripped on a City sidewalk. One of the benefits this project would bring is sidewalk repair to improve pedestrian safety so no one else would experience what you went through.

Thank you again, and please let me know if you have additional questions or concerns,
Debbie

>> *On Tuesday, August 11th, I attended a virtual Mid City West meeting. This is the very first time that I had heard anything about "Uplift Melrose". Since then I have visited the Uplift Melrose detailed website and it seems that plans have been in discussion for quite some time. I'm extremely disappointed that there has been zero public outreach to keep us informed. Not one neighborhood person I have spoken with knows anything about this. There has not been a community meeting allowing people to voice their opinions let alone*

*being kept informed of these potential plans.*

*In theory, Uplift Melrose appears to be a great idea. However, in execution it is greatly flawed. There is zero need for a bike path on Melrose Avenue. As much as people would like to think...LA is not a bike town. Very few people travel to work on a bicycle and there are far better places to ride a bike for enjoyment other than on a city street. I don't see people driving to Melrose with their bikes on a bike rack to ride the 20 or so blocks this involves and there are no connecting bike paths to allow for a substantial ride. If they did drive here, those additional cars will park on our already congested side streets.*

*When BID wanted to put the Plaza on North Stanley Avenue, they did a questionnaire and the percentage of people who wanted a bike path was next to nil.*

*To suggest having a bike path on the same level as pedestrians is a very dangerous idea. There have already been numerous accidents that I know of involving scooters and pedestrians. A designated bike path will only be over-run with scooters.*

*There is an existing bike path on Fairfax Avenue and I have never seen anyone actually use it. Beverly Hills spent a great deal of money to install a bike path on Santa Monica Blvd which is also never used.*

*Melrose is a well traveled street. People use it to go to and from their homes, to work and to visit. It is a relatively narrow street and already overwhelmed with traffic. The mere thought of removing one lane of traffic in each direction is, in my opinion, a very poor plan. The street comes to a standstill when waiting for someone to parallel park their car or exit a parked space. With only one lane of traffic, people will become irate and speed into oncoming traffic just to keep moving. Even currently with two lanes in each direction, Melrose Avenue is often at a standstill.*

*Permanently not allowing any left turns off Melrose between Fairfax and Highland will put a considerable amount of additional traffic on our already burdened local neighborhood streets. It will take forever trying to make a left turn from Beverly Blvd. onto Fairfax in order to use Waring or Willoughby to travel East. And I suppose the same would be true on Highland Avenue.*

*This plan also calls for a reduction in parking. Parking on Melrose is currently extremely difficult, already burdening the local neighborhood streets and with a reduction, this will hinder existing business even further. Parking has always been the number one complaint from merchants and residence.*

*The existing sidewalks are in terrible shape. They are broken, have pieces of missing cement and are uneven and cracked. I personally tripped on an uneven sidewalk and hit my head. An ambulance was called since I was unconscious for a few seconds.*

*The idea of additional lighting and landscape is great. The trees will beautify the area and the lights may have a positive impact on safety. I would like to support these changes along with much needed sidewalk repair.*

*I think that the following items need to be considered prior to moving ahead with this reckless idea:*

1. *traffic impact study for surrounding neighborhood streets*
2. *traffic impact study for Melrose itself when one lane is removed in each direction*
3. *the removal of parking spaces will cause an already bad situation to be worse*
4. *number of people who use bike paths in surrounding areas*
5. *Community/neighborhood meeting*

*Seems to me that encouraging/allowing the city the spend 40-50 million dollars on this*

*project is absurd. We sadly have not seen the fallout from the Covid 19 pandemic. People will be jobless, evicted and hungry. Not the time to proceed with an unneeded vanity project considering the scope of the crisis we will be facing.*

*I would like to know where the Councilman's office stands on this project.*
*Please feel free to forward my comments to LA DOT and Streets LA as I do not have an email address to include.*

*Sincerely,*

*Karen Hebert*

Hello Debbie,

2,000 reponses to the LADOT Uplift Melrose survey already and nobody in the Melrose neighborhood has heard about it? You don't hear alarm bells going off?

We need the councilmember to realize that Scott Epstein and Michael Schneider have amassed a huge outreach email list over time that is used to further their personal ambitions for our city, drawing on behind the scenes alliances with special interest groups including Michael's own Political Action Committee "Streets for All," the real estate industry-backed Abundant Housing LA, and others. They have also captured the emails from stakeholders who contacted Mid City West but were not aware their emails were being passed on to private interest groups like Street for All —and political campaigns backed by Streets for All.

Click on this link and scroll down to 6 days ago to see what Michael posted on his PAC's FB page 6 days ago. https://www.facebook.com/streetsforall How is this not a conflict of interest under state conflict of interest law that includes any form of personal benefit accruing to the board member, not merely financial gain.

MCWCC can generate 2,000, 3,000, 5,000 emails or even more this way--without a single person in the Melrose community knowing what is going on.

We look to the councilmember to vet for the survey respondents' addresses, and to assure beyond a reasonable doubt that the City has used very best efforts to ensure every resident of the Melrose adjacent neighborhoods is aware of this proposal and has a means of providing their opinion. Not to mention following all of the other protocols of the 2019 Settlement Agreement.

LADOT's posted survey does not do that.

Subject: Re: Uplift Melrose

---

*Dear Barbara,*
*Thank you so much for your immediate response and support.*

*We appreciate you pointing out the nuances that as a local resident in the Melrose area, I knew nothing about. This definitely does seem like a "self serving" plan with NO consideration as to the ramifications for the merchants and residents.*

*I'm shocked to hear that there have been 2000 responses to the survey. I walk a small dog daily and NOT ONE local person that I have bumped into knows anything about the pending proposal nor the survey.*

*To my knowledge, there has been ZERO community outreach since my first encounter with this project on August 11th. I have heard nothing since that evening meeting. I would be very curious to know if the people to spoke at the MCWCC meeting on the 11th were actual local residents! I personally did not recognize anyone.*

*We are currently facing a situation that due to the pandemic, we are virtually unable to go door to door and inform locals as we did for the Stanley Plaza. There is no way that we can work to secure a petition putting a stop to this costly project.*

*Please don't let a few dictate an outcome that we do not want.*

*Thanks again,*
*Karen Hebert*

With only one lane of traffic, people will become irate and speed into oncoming traffic just to keep moving. Even currently with two lanes in each direction, Melrose Avenue is often at a standstill.*

*Permanently not allowing any left turns off Melrose between Fairfax and Highland will put a considerable amount of additional traffic on our already burdened local neighborhood streets. It will take forever trying to make a left turn from Beverly Blvd. onto Fairfax in order to use Waring or Willoughby to travel East. And I suppose the same would be true on Highland Avenue.*

*This plan also calls for a reduction in parking. Parking on Melrose is currently extremely difficult, already burdening the local neighborhood*

*streets and with a reduction, this will hinder existing business even further. Parking has always been the number one complaint from merchants and residence.*

*The existing sidewalks are in terrible shape. They are broken, have pieces of missing cement and are uneven and cracked. I personally tripped on an uneven sidewalk and hit my head. An ambulance was called since I was unconscious for a few seconds.*

*The idea of additional lighting and landscape is great. The trees will beautify the area and the lights may have a positive impact on safety. I would like to support these changes along with much needed sidewalk repair.*

*I think that the following items need to be considered prior to moving ahead with this reckless idea:*

1. *traffic impact study for surrounding neighborhood streets*
2. *traffic impact study for Melrose itself when one lane is removed in each direction*
3. *the removal of parking spaces will cause an already bad situation to be worse*
4. *number of people who use bike paths in surrounding areas*
5. *Community/neighborhood meeting*

*Seems to me that encouraging/allowing the city the spend 40-50 million dollars on this project is absurd. We sadly have not seen the fallout from the Covid 19 pandemic. People will be jobless, evicted and hungry. Not the time to proceed with an unneeded vanity project considering the scope of the crisis we will be facing.*

*I would like to know where the Councilman's office stands on this project. Please feel free to forward my comments to LA DOT and Streets LA as I do not have an email address to include.*

*Sincerely,*

*Karen Hebert*

Subject: Re: Uplift Melrose

---

Hi folks,

I'd just like to reiterate that we are still waiting for a *significant amount of additional community outreach* to be conducted before we arrive at any conclusions, as we have not yet heard the voices of all the people who would be potentially affected. Councilmember Koretz' priority has always been first to gain a clear understanding of how his constituents feel about a certain project or idea, and then to make an informed decision in terms of supporting or opposing. Debbie and I hear your concerns and we will be sure to pass them along to the Councilmember for his consideration.

Thank you and have a great week!

>
> You asked what the Councilmember's position on this project is, and I am happy to share. At this time he is open minded to the concept, but he and his staff have made very clear to the proponents that he wanted to see significant community outreach to as many folks as possible before he would feel comfortable taking a position. He understands that this would be a significant project with a long-lasting impact on the community, so he wants to be thoughtful about the process. Once he has an understanding of where community feelings lie, he'll be able to make an informed decision on whether to be supportive or not. As of yesterday, approximately 2,000 had already submitted responses to the survey.

The community outreach did not really begin until just last week, when the City's StreetsLA (also known as Bureau of Street Services) presented the concept at the MCWNC. However, since then more outreach has occurred, and more will continue through the next few weeks. I hope you'll share the survey with your friends and neighbors in the Melrose area as every response helps.

I am very sorry that you tripped on a City sidewalk. One of the benefits this project would bring is sidewalk repair to improve pedestrian safety so no one else would experience what you went through.

Thank you again, and please let me know if you have additional questions or concerns,
Debbie

On Tue, Aug 18, 2020 at 3:02 PM Karen Hebert <hebertmgt@aol.com> wrote:

*Dear Councilman Koretz,*

*On Tuesday, August 11th, I attended a virtual Mid City West meeting. This is the very first time that I had heard anything about "Uplift Melrose". Since then I have visited the Uplift Melrose detailed website and it seems that plans have been in discussion for quite some time. I'm extremely disappointed that there has been zero public outreach to keep us informed. Not one neighborhood person I have spoken with knows anything about this. There has not been a community meeting allowing people to voice their opinions let alone being kept informed of these potential plans.*

*In theory, Uplift Melrose appears to be a great idea. However, in execution it is greatly flawed. There is zero need for a bike path on Melrose Avenue. As much as people would like to think...LA is not a bike town. Very few people travel to work on a bicycle and there are far better places to ride a bike for enjoyment other than on a city street. I don't see people driving to Melrose with their bikes on a bike rack to ride the 20 or so blocks this involves and there are no connecting bike paths to allow for a substantial ride. If they did drive here, those additional cars will park on our already congested side streets.*

*When BID wanted to put the Plaza on North Stanley Avenue, they did a questionnaire and the percentage of people who wanted a bike path was next to nil.*

*To suggest having a bike path on the same level as pedestrians is a very dangerous idea. There have already been numerous accidents that I know of involving scooters and pedestrians. A designated bike path will only be over-run with scooters.*

*There is an existing bike path on Fairfax Avenue and I have never seen anyone actually use it. Beverly Hills spent a great deal of money to install a bike path on Santa Monica Blvd which is also never used.*

*Melrose is a well traveled street. People use it to go to and from their homes, to work and to visit. It is a relatively narrow street and already overwhelmed with traffic. The mere thought of removing one lane of traffic in each direction is, in my opinion, a very poor plan. The street comes to a standstill when waiting for someone to parallel park their car or exit a parked space. With only one lane of traffic, people will become irate and speed into oncoming traffic just to keep moving. Even currently with two lanes in each direction, Melrose Avenue is often at a standstill.*

*Permanently not allowing any left turns off Melrose between Fairfax and Highland will put a considerable amount of additional traffic on our already burdened local neighborhood streets. It will take forever trying to make a left turn from Beverly Blvd. onto Fairfax in order to use Waring or Willoughby to travel East. And I suppose the same would be true on Highland Avenue.*

Subject: UPLIFT MELROSE: Letter of Support Request (Other Organizations)

---

Hi Debbie and Don,
I have put together a spreadsheet of all the letters of support we still need. Please see attached as well as the letter template. Can you both assist us in obtaining these letters?

**See the language below that I have been using in my requests.**

We kindly request you please provide a letter of support using the attached Word Document template. In order to have a complete grant application, a minimum of 10 letters of support are required and a letter from your organization will make an even stronger chance of StreetsLA winning the grant funding.

**Instructions:**
1. Add any header, logo or title of your group/organization(your typical letterhead)
2. Letter shall be addressed to Mr. Mitch Weiss, Executive Director
California Transportation Commission (as shown on template).
3. Feel free to add any language in the body of the letter, that may be specific to your organization and the direct benefits this project will have
4. Remove all yellow highlighted areas
5. Sign letter
6. Please email a pdf copy to Alexander Caiozzo - **no later than Friday September 4, 2020**

*alexander.caiozzo@lacity.org*

Thank you again for your support.

**Alexander J. Caiozzo**
***Until further notice, Design-Build staff will be working remotely. Please be assured services to the City and our residents will continue in the safest manner possible.***

Subject: Uplift Melrose

---

*Thank you Debbie for your immediate and detailed response.*

*The Uplift Melrose proposal was included on the Mid City West agenda back in their March 10th meeting. The minutes (pages 6-8) state that...*
"Mid City West supports this project and **aims to engage with residents**, businesses, and the Melrose BID to gain broad community support for the project." *To this day, there has been zero outreach...no flyers, no mass emails and no public meetings/hearings.*

*My husband and I have* owned *our home on North Stanley Avenue for over 30 years and have lived here for over 20. We know many of our neighbors which was evident when the community took action against the proposed Stanley Plaza. To say that MCW aims to engage with residents is absurd. I bumped into 3 friends/neighbors this morning while walking my dog and 3 out of 3 knew nothing about this proposal.*

*As I stated in my previous email, this plan did not happen overnight and has obviously been in discussion for quite some time so for us to just be hearing about it now is not what I would call community engagement.*

*As Barbara Gallen pointed out in her email of August 18th, to already have 2000 participants in the survey is quite suspicious. The survey is flawed and will be impossible to vet the participants. They have not requested your address to be included. This will not be a fair survey including the community/neighbors/residents. Anyone with access to a computer from anywhere in the world who has zero vested interest in this neighborhood and aware of all the ramifications that this project will be cause, is able to complete the online survey. As you stated in your email below, "community outreach did not really begin until just last week", then how is it possible to have over 2000 completed surveys?*

*Peter Nichols of Melrose Action maintains a large email list of actual local residents. If MCW truly wanted community input, why hasn't he contacted and asked to do an email blast. For that matter we also accumulated a neighborhood email list when working on the Stanley Plaza. It would have been very easy for MCW to contact one of us back in March to ask that we also do an informative email blast to our local residents.*

*I still believe, that once again, we are being steamrolled. Have traffic impact studies been done? Has anyone looked at Clinton Street just below Melrose to see if it can accommodate the increased traffic that this plan will inevitably incur? Have people who bicycle been asked if they will enjoy a ride with traffic signals ever other block? Will the amount of scooters that will be present increase danger to pedestrians? How many retail shops and restaurants are in favor of this plan? How many even know about it?*

*We are still in the midst of unprecedented times with the Covid 19 pandemic. How many small "mom and pop" stores on Melrose will even survive this let alone a year of construction?*

*I hope that Councilman Koretz takes my comments into consideration when making a decision regarding this pending project.*

*Sincerely,*

*Karen Hebert*
*849 N Stanley Ave*

Subject: Re: Uplift Melrose

---

Hi Karen,
Just wanted to chime in here. I can confirm as chair of the Transportation Commitee that what we passed in March was not the same as Uplift Melrose. The first time I personally heard of Uplift Melrose was about 3 weeks ago. What we passed in March was our support for changes to Melrose to make the street safer, more walkable, and more bikable. Uplift Melrose includes some of these elements but goes further, with many new trees, wider sidewalks, new lighting, raised crosswalks at all intersections, new way finding signage, etc. I didn't want you to feel like we have been working on this since March behind the scenes, so I felt it was important to distinguish the two things for you.

Lastly, I wanted to share with you that StreetsLA is currently working with the BID and MCW to

flyer the community. Our goal is to get to and engage with as many residents as possible. You will see the flyers around the community starting tomorrow.

Michael

*is the very first time that I had heard anything about "Uplift Melrose". Since then I have visited the Uplift Melrose detailed website and it seems that plans have been in discussion for quite some time. I'm extremely disappointed that there has been zero public outreach to keep us informed. Not one neighborhood person I have spoken with knows anything about this. There has not been a community meeting allowing people to voice their opinions let alone being kept informed of these potential plans.*

*In theory, Uplift Melrose appears to be a great idea. However, in execution it is greatly flawed. There is zero need for a bike path on Melrose Avenue. As much as people would like to think...LA is not a bike town. Very few people travel to work on a bicycle and there are far better places to ride a bike for enjoyment other than on a city street. I don't see people driving to Melrose with their bikes on a bike rack to ride the 20 or so blocks this involves and there are no connecting bike paths to allow for a substantial ride. If they did drive here, those additional cars will park on our already congested side streets.*

*When BID wanted to put the Plaza on North Stanley Avenue, they did a questionnaire and the percentage of people who wanted a bike path was next to nil.*

*To suggest having a bike path on the same level as pedestrians is a very dangerous idea. There have already been numerous accidents that I know of involving scooters and pedestrians. A designated bike path will only be over-run with scooters.*

*There is an existing bike path on Fairfax Avenue and I have never seen anyone actually use it. Beverly Hills spent a great deal of money to install a bike path on Santa Monica Blvd which is also never used.*

*Melrose is a well traveled street. People use it to go to and from their homes, to work and to visit. It is a relatively narrow street and already overwhelmed with traffic. The mere thought of removing one lane of traffic in each direction is, in my opinion, a very poor plan. The street comes to a standstill when waiting for someone to parallel park their car or exit a parked space. With only one lane of traffic, people will become irate and speed into oncoming traffic just to keep moving. Even currently with two lanes in each direction, Melrose Avenue is often at a standstill.*

*Permanently not allowing any left turns off Melrose between Fairfax and Highland will put a considerable amount of additional traffic on our already burdened local neighborhood streets. It will take forever trying to make a left turn from Beverly Blvd. onto Fairfax in order to use Waring or Willoughby to travel East. And I suppose the same would be true on Highland Avenue.*

*This plan also calls for a reduction in parking. Parking on Melrose is currently extremely difficult, already burdening the local neighborhood streets and with a reduction, this will hinder existing business even further. Parking has always been the number one complaint from merchants and residence.*

*The existing sidewalks are in terrible shape. They are broken, have pieces of missing cement and are uneven and cracked. I personally tripped on an uneven sidewalk and hit my head. An ambulance was called since I was*

*unconscious for a few seconds.*

*The idea of additional lighting and landscape is great. The trees will beautify the area and the lights may have a positive impact on safety. I would like to support these changes along with much needed sidewalk repair.*

*I think that the following items need to be considered prior to moving ahead with this reckless idea:*

*1. traffic impact study for surrounding neighborhood streets*
*2. traffic impact study for Melrose itself when one lane is removed in each direction*
*3. the removal of parking spaces will cause an already bad situation to be worse*
*4. number of people who use bike paths in surrounding areas*
*5. Community/neighborhood meeting*

*Seems to me that encouraging/allowing the city the spend 40-50 million dollars on this project is absurd. We sadly have not seen the fallout from the Covid 19 pandemic. People will be jobless, evicted and hungry. Not the time to proceed with an unneeded vanity project considering the scope of the crisis we will be facing.*

*I would like to know where the Councilman's office stands on this project. Please feel free to forward my comments to LA DOT and Streets LA as I do not have an email address to include.*

*Sincerely,*

*Karen Hebert*

>> "Mid City West supports this project and **aims to engage with residents**, businesses, and the Melrose BID to gain broad community support for the project." *To this day, there has been zero outreach...no flyers, no mass emails and no public meetings/hearings.*
>>
>> *My husband and I have* owned *our home on North Stanley Avenue for over 30 years and have lived here for over 20. We know many of our neighbors which was evident when the community took action against the proposed Stanley Plaza. To say that MCW aims to engage with residents is absurd. I bumped into 3*

*friends/neighbors this morning while walking my dog and 3 out of 3 knew nothing about this proposal.*

*As I stated in my previous email, this plan did not happen overnight and has obviously been in discussion for quite some time so for us to just be hearing about it now is not what I would call community engagement.*

*As Barbara Gallen pointed out in her email of August 18th, to already have 2000 participants in the survey is quite suspicious. The survey is flawed and will be impossible to vet the participants. They have not requested your address to be included. This will not be a fair survey including the community/neighbors/residents. Anyone with access to a computer from anywhere in the world who has zero vested interest in this neighborhood and aware of all the ramifications that this project will be cause, is able to complete the online survey. As you stated in your email below, "community outreach did not really begin until just last week", then how is it possible to have over 2000 completed surveys?*

*Peter Nichols of Melrose Action maintains a large email list of actual local residents. If MCW truly wanted community input, why hasn't he contacted and asked to do an email blast. For that matter we also accumulated a neighborhood email list when working on the Stanley Plaza. It would have been very easy for MCW to contact one of us back in March to ask that we also do an informative email blast to our local residents.*

*I still believe, that once again, we are being steamrolled. Have traffic impact studies been done? Has anyone looked at Clinton Street just below Melrose to see if it can accommodate the increased traffic that this plan will inevitably incur? Have people who bicycle been asked if they will enjoy a ride with traffic signals ever other block? Will the amount of scooters that will be present increase danger to pedestrians? How many retail shops and restaurants are in favor of this plan? How many even know about it?*

*We are still in the midst of unprecedented times with the Covid 19 pandemic. How many small "mom and pop" stores on Melrose will even survive this let alone a year of construction?*

*I hope that Councilman Koretz takes my comments into consideration when making a decision regarding this pending project.*

*Sincerely,*
*Karen Hebert*
*849 N Stanley Ave*

on the survey link.

You asked what the Councilmember's position on this project is, and I am happy to share. At this time he is open minded to the concept, but he and his staff have made very clear to the proponents that he wanted to see significant community outreach to as many folks as possible before he would feel comfortable taking a position. He understands that this would be a significant project with a long-lasting impact on the community, so he wants to be thoughtful about the process. Once he has an understanding of where community feelings lie, he'll be able to make an informed decision on whether to be supportive or not. As of yesterday, approximately 2,000 had already submitted responses to the survey.

The community outreach did not really begin until just last week, when the City's StreetsLA (also known as Bureau of Street Services) presented the concept at the MCWNC. However, since then more outreach has occurred, and more will continue through the next few weeks. I hope you'll share the survey with your friends and neighbors in the Melrose area as every response helps.

I am very sorry that you tripped on a City sidewalk. One of the benefits this project would bring is sidewalk repair to improve pedestrian safety so no one else would experience what you went through.

Thank you again, and please let me know if you have additional questions or concerns,
Debbie

*Michael,*
*Although I appreciate your response, how is this design included in the Agenda/Minutes from the March 10th meeting greatly different than what was discussed at the MCW meeting on August 11th?*
*Yes, there have been some modifications, like a no turn lane, elevated bike path and the change in name, now being called Uplift Melrose.*
*To say that about three weeks ago is when you first heard of Uplift Melrose is hard to believe.*
*Name changes don't alter the initial intent.*
*For your reference, I have attached the plans from the March 10 meeting.*

*Sincerely,*
*Karen Hebert*

---

Hello, Karen.

I can confirm that Mid City West was not aware of the Uplift Melrose proposal until shortly before our August board meeting. You have outlined many of the differences between the two plans. You are correct that they share some features, such as accommodation for cyclists in dedicated bike lanes and roadway modification to reduce vehicle lanes.

We placed the Uplfit Melrose plan on the agenda because it would be the only time Mid City West would have a chance to weigh in on the proposed project before the city's grant application deadline. As you know, we received a great deal of engagement at the meeting, and the board voted to support the project by a wide margin.

Best,

Scott Epstein
Chair
Mid City West Community Council

The first time I personally heard of Uplift Melrose was about 3 weeks ago. What we passed in March was our support for changes to Melrose to make the street safer, more walkable, and more bikable. Uplift Melrose includes some of these elements but goes further, with many new trees, wider sidewalks, new lighting, raised crosswalks at all intersections, new way finding signage, etc. I didn’t want you to feel like we have been working on

this since March behind the scenes, so I felt it was important to distinguish the two things for you.

Lastly, I wanted to share with you that StreetsLA is currently working with the BID and MCW to flyer the community. Our goal is to get to and engage with as many residents as possible. You will see the flyers around the community starting tomorrow.

Michael

<hebertmgt@aol.com> wrote:

*Dear Councilman Koretz,*

*On Tuesday, August 11th, I attended a virtual Mid City West meeting. This is the very first time that I had heard anything about "Uplift Melrose". Since then I have visited the Uplift Melrose detailed website and it seems that plans have been in discussion for quite some time. I'm extremely disappointed that there has been zero public outreach to keep us informed. Not one neighborhood person I have spoken with knows anything about this. There has not been a community meeting allowing people to voice their opinions let alone being kept informed of these potential plans.*

*In theory, Uplift Melrose appears to be a great idea. However, in execution it is greatly flawed. There is zero need for a bike path on Melrose Avenue. As much as people would like to think...LA is not a bike town. Very few people travel to work on a bicycle and there are far better places to ride a bike for enjoyment other than on a city street. I don't see people driving to Melrose with their bikes on a bike rack to ride the 20 or so blocks this involves and there are no connecting bike paths to allow for a substantial ride. If they did drive here, those additional cars will park on our already congested side streets.*

*When BID wanted to put the Plaza on North Stanley Avenue, they did a questionnaire and the percentage of people who wanted a bike path was next to nil.*

*To suggest having a bike path on the same level as pedestrians is a very dangerous idea. There have already been numerous accidents that I know of involving scooters and pedestrians. A designated bike path will only be over-run with scooters.*

*There is an existing bike path on Fairfax Avenue and I have never seen anyone actually use it. Beverly Hills spent a great deal of money to install a bike path on Santa Monica Blvd which is also never used.*

*Melrose is a well traveled street. People use it to go to and from their homes, to work and to visit. It is a relatively narrow street and already overwhelmed with traffic. The mere thought of removing one lane of traffic in each direction is, in my opinion, a very poor plan. The street comes to a standstill when waiting for someone to parallel park their car or exit a parked space. With only one lane of traffic, people will become irate and speed into oncoming traffic just to keep moving. Even currently with two lanes in each direction, Melrose Avenue is often at a standstill.*

*Permanently not allowing any left turns off Melrose between Fairfax and Highland will put a considerable amount of additional traffic on our already burdened local neighborhood streets. It will*

*take forever trying to make a left turn from Beverly Blvd. onto Fairfax in order to use Waring or Willoughby to travel East. And I suppose the same would be true on Highland Avenue.*

*This plan also calls for a reduction in parking. Parking on Melrose is currently extremely difficult, already burdening the local neighborhood streets and with a reduction, this will hinder existing business even further. Parking has always been the number one complaint from merchants and residence.*

*The existing sidewalks are in terrible shape. They are broken, have pieces of missing cement and are uneven and cracked. I personally tripped on an uneven sidewalk and hit my head. An ambulance was called since I was unconscious for a few seconds.*

*The idea of additional lighting and landscape is great. The trees will beautify the area and the lights may have a positive impact on safety. I would like to support these changes along with much needed sidewalk repair.*

*I think that the following items need to be considered prior to moving ahead with this reckless idea:*

1. *traffic impact study for surrounding neighborhood streets*
2. *traffic impact study for Melrose itself when one lane is removed in each direction*
3. *the removal of parking spaces will cause an already bad situation to be worse*
4. *number of people who use bike paths in surrounding areas*
5. *Community/neighborhood meeting*

*Seems to me that encouraging/allowing the city the spend 40-50 million dollars on this project is absurd. We sadly have not seen the fallout from the Covid 19 pandemic. People will be jobless, evicted and hungry. Not the time to proceed with an unneeded vanity project considering the scope of the crisis we will be facing.*

*I would like to know where the Councilman's office stands on this project.*
*Please feel free to forward my comments to LA DOT and Streets LA as I do not have an email address to include.*

*Sincerely,*

*Karen Hebert*

Subject: Re: Uplift Melrose

---

Hello All,

I listened to the Transportation Committee meeting and it was clear that Councilman Koretz had issues with the lack of outreach and Kevin Minne of Streets LA said they would be doing additional outreach. That however will not be sufficient.

Fix The City negotiated a settlement agreement with the City of LA regarding MP 2035 to make sure this kind of fiasco never happened again to another community after Rowena and the issues raised regarding the Vista Del Mar project in Bonin's area.

Fix The City agreed to settle our lawsuit on the condition that there be outreach and metrics protocols in place to make sure that the community was on board with any project removing travel lanes and that emergency response times not be adversely impacted. The settlement, attached, calls for projects to be evaluated for a number of years to ensure adequate emergency response times are not adversely impacted and that neighborhood intrusion does not adversely impact adjacent residential streets.

Fix The City was required to be notified when a project of this kind was contemplated. Neither Mid City West, Council District 5 nor LADOT notified Fix the City. And only now is residential outreach taking place.

The two key conditions for a successful street improvement are maintaining adequate emergency services and protecting adjacent residential streets. Neither of these conditions have been met. Fix the City believes that the City has violated its agreement. We reserve the right to enforce our settlement agreement.

Subject: Re: Uplift Melrose

---

Karen,

Let's put some facts on the record.

1. MCWCC Board Chair Scott Epstein was contacted by Streets LA / LADOT about Melrose Uplift on August 3, more than a week before the 8/11 board meeting.

2. The Transportation Committee was not notified of this project, although I assume that the Transportation chair Michael Schneider was in the loop. Our committee could easily have held an emergency meeting to review the proposal but that would have required posting the Uplift Melrose proposal to the public. In fact, as a Transportation Cmte member I did not even get an email clueing me in. There may have been a desire on the part of Board leadership to minimize the advance notice given to the public that this proposal would involve removing travel lanes. It certainly appears that way.

3. Board and Transporation Committee leadership have declined multiple requests over the past twelve months to canvas / engage the Melrose residential community about the prospect of removing travel lanes to facilitiate bike lanes and potentially also a center left turn lane. I personally served on the Transporation Committee and when last August Michael presented us with his own proposal for a Melrose lane reduction program I volunteered for the task force and offered to head up a team to go door to door in the community to hear what the people living nearby thought. I had called Kevin Nahai to learn the history of the situation, and Kevin told me the Melrose community had initiated the No Left Turn many years ago and the councilmember would be unlikely to support further changes without proof that the surrounding neighborhoods supported such change.

4. I was told in September 2019 by Michael that community outreach to guage interest in a Melrose re-design was premature.

5. When Michael's version of the road diet came before the Transportation Committee in Feb. 2020 I raised the issue of outreach again, without success.

6. When the motion for a Melrose road re-design was placed on the March 2020 board agenda, Nora Wyman decided to field a survey on NextDoor since MCWCC still had not reached out to the Melrose residential community. Just prior to the March meeting, Nora had gotten more than 200 respondents — from Melrose area residents — with more than 80 % voting NO on the idea. Board leadership was sent written proof of the survey and declined to discuss it or give it any weight. The board voted by a large majority to support Michael's melrose re-design to remove travel lanes to install bike lanes.

7. I have never taken a position opposing any version of re-designing Melrose. I volunteered for the task force last August because as someone who lives several miles away, I might enjoy biking up to Melrose with my son and enjoying that. But as I said to Michael Schneider last fall, for me "the community is king." I first

needed to know how the Melrose residents feel about taking out travel lanes before I can support any proposal to do that. I don't care how people who live all around the City who might use the Melrose bike lanes once or twice a month feel about it. I care how the people who live on the adjacent streets feel and want to know if they will be bothered by having traffic re-routed to their side streets / parking on their streets.

8. At the March board meeting I questioned the propriety of having Michael, who I had just learned was the chairman of a polictical action committee — Streets for All — leading the charge on any proposal to radically alter a major roadway if that is the goal of his PAC. I said there is a conflict of interest betweeen furthering your personal agenda while the neighboring community has been kept out of the loop. The board leadership dismissed my concern.

9. Nora Wyman's NextDoor survey has in the meantime racked up hundreds more responses. I believe it is over 800 at this point. The per centage of Melrose area residents voting No on reducing travel lanes is still over 80%. Nora reported this at the August 11 board meeting during public comment. This alone should have raised a red flag to the board about proceeding. But it did not.

10. Before the 8/11 board meeting Michael Schneider mobilized people from outside the Melrose community to come to the board meeting to make public comment in support of Uplift Melrose. Other organizations that Michael and Scott are affiliated with were also enlisted to do the same. Thus, they were able to manipulate the public comment to appear to be a great amount of support for Uplift Melrose but that support mostly came from outside the Melrose community. While the Melrose community itself was kept in the dark.

11. I also note that Michael took action right after the board meeting to notify his special interest network about the LADOT. Streets LA survey about Uplift Melrose which served to generate "public support" for the proposal while never doing anything to get the word out to the Melrose community. We were told by Debbie Dyner that "2,000" responses to the survey had come in already, yet the Melrose community itself was still in the dark. Only now, with some of us, including Karen, making noise, is there any discussion of notifying the Melrose community.

11. Karen, you should also understand that per LADOT and Streets LA, the Uplift Melrose proposal grant application (due mid September) once submitted cannot be materially changed. If anyone gives you a vague promise of "we can always modify it later, let's not miss the submission deadline," you are being mis-led.

12. The publicly stated mission of the neighborhood council system is to facilitate the public's participation in governmental decision making. This whole thing has been an example—too often repeated at Mid City West on all manner of "projects," of the neighborhood council showing that it is primarily concerned with advancing the personal agenda of their committee chairs and board chair, and you should appreciate that they are the progressives and you are the "regressive" NIMBY who dpesn't want change.

Hello, Karen.

I can confirm that Mid City West was not aware of the Uplift Melrose proposal until shortly before our August board meeting. You have outlined many of the differences between the two plans. You are correct that they share some features, such as accommodation for cyclists in dedicated bike lanes and roadway modification to reduce vehicle lanes.

We placed the Uplfit Melrose plan on the agenda because it would be the only time Mid City West would have a chance to weigh in on the proposed project before the city's grant application deadline. As you know, we received a great deal of

engagement at the meeting, and the board voted to support the project by a wide margin.

Best,

Scott Epstein

*6-8) state that...*
"Mid City West supports this project and **aims to engage with residents**, businesses, and the Melrose BID to gain broad community support for the project." *To this day, there has been zero outreach...no flyers, no mass emails and no public meetings/hearings.*

*My husband and I have* owned *our home on North Stanley Avenue for over 30 years and have lived here for over 20. We know many of our neighbors which was evident when the community took action against the proposed Stanley Plaza. To say that MCW aims to engage with residents is absurd. I bumped into 3 friends/neighbors this morning while walking my dog and 3 out of 3 knew nothing about this proposal.*

*As I stated in my previous email, this plan did not happen overnight and has obviously been in discussion for quite some time so for us to just be hearing about it now is not what I would call community engagement.*

*As Barbara Gallen pointed out in her email of August 18th, to already have 2000 participants in the survey is quite suspicious. The survey is flawed and will be impossible to vet the participants. They have not requested your address to be included. This will not be a fair survey including the community/neighbors/residents. Anyone with access to a computer from anywhere in the world who has zero vested interest in this neighborhood and aware of all the ramifications that this project will be cause, is able to complete the online survey. As you stated in your email below, "community outreach did not really begin until just last week", then how is it possible to have over 2000 completed surveys?*

*Peter Nichols of Melrose Action maintains a large email list of actual local residents. If MCW truly wanted community input, why hasn't he contacted and asked to do an email blast. For that matter we also accumulated a neighborhood email list when working on the Stanley Plaza. It would have been very easy for MCW to contact one of us back in March to ask that we also do an informative email blast to our local residents.*

*I still believe, that once again, we are being steamrolled. Have traffic impact studies been done? Has anyone looked at Clinton Street just below Melrose to see if it can accommodate the increased traffic that this plan will inevitably incur? Have people who bicycle been asked if they will enjoy a ride with traffic signals ever other block? Will the amount of scooters that will be present increase danger to pedestrians? How many retail shops and restaurants are in favor of this plan? How many even know about it?*

*We are still in the midst of unprecedented times with the Covid 19 pandemic. How many small "mom and pop" stores on Melrose will even survive this let alone a year of construction?*

*I hope that Councilman Koretz takes my comments into consideration when making a decision regarding this pending*

*project.*

On Tue, Aug 18, 2020 at 3:02 PM Karen Hebert <hebertmgt@aol.com> wrote:

*Dear Councilman Koretz,*

*On Tuesday, August 11th, I attended a virtual Mid City West meeting. This is the very first time that I had heard anything about "Uplift Melrose". Since then I have visited the Uplift Melrose detailed website and it seems that plans have been in discussion for quite some time. I'm extremely disappointed that there has been zero public outreach to keep us informed. Not one neighborhood person I have spoken with knows anything about this. There has not been a community meeting allowing people to voice their opinions let alone being kept informed of these potential plans.*

*In theory, Uplift Melrose appears to be a great idea. However, in execution it is greatly flawed. There is zero need for a bike path on Melrose Avenue. As much as people would like to think...LA is not a bike town. Very few people travel to work on a bicycle and there are far better places to ride a bike for enjoyment other than on a city street. I don't see people driving to Melrose with their bikes on a bike rack to ride the 20 or so blocks this involves and there are no connecting bike paths to allow for a substantial ride. If they did drive here, those additional cars will park on our already congested side streets.*

*When BID wanted to put the Plaza on North Stanley Avenue, they did a questionnaire and the percentage of people who wanted a bike path was next to nil.*

*To suggest having a bike path on the same level as pedestrians is a very dangerous idea. There have already been numerous accidents that I know of involving scooters and pedestrians. A designated bike path will only be over-run with scooters.*

*There is an existing bike path on Fairfax Avenue and I have never seen anyone actually use it. Beverly Hills spent a great deal of money to install a bike path on Santa Monica Blvd which is also never used.*

*Melrose is a well traveled street. People use it to go to and from their homes, to work and to visit. It is a relatively narrow street and already overwhelmed with traffic. The mere thought of removing one lane of traffic in each direction is, in my opinion, a very poor plan. The street comes to a standstill when waiting for someone to parallel park their car or exit a parked space. With only one lane of traffic, people will*

*become irate and speed into oncoming traffic just to keep moving. Even currently with two lanes in each direction, Melrose Avenue is often at a standstill.*

*Permanently not allowing any left turns off Melrose between Fairfax and Highland will put a considerable amount of additional traffic on our already burdened local neighborhood streets. It will take forever trying to make a left turn from Beverly Blvd. onto Fairfax in order to use Waring or Willoughby to travel East. And I suppose the same would be true on Highland Avenue.*

*This plan also calls for a reduction in parking. Parking on Melrose is currently extremely difficult, already burdening the local neighborhood streets and with a reduction, this will hinder existing business even further. Parking has always been the number one complaint from merchants and residence.*

*The existing sidewalks are in terrible shape. They are broken, have pieces of missing cement and are uneven and cracked. I personally tripped on an uneven sidewalk and hit my head. An ambulance was called since I was unconscious for a few seconds.*

*The idea of additional lighting and landscape is great. The trees will beautify the area and the lights may have a positive impact on safety. I would like to support these changes along with much needed sidewalk repair.*

*I think that the following items need to be considered prior to moving ahead with this reckless idea:*

1. *traffic impact study for surrounding neighborhood streets*
2. *traffic impact study for Melrose itself when one lane is removed in each direction*
3. *the removal of parking spaces will cause an already bad situation to be worse*
4. *number of people who use bike paths in surrounding areas*
5. *Community/neighborhood meeting*

*Seems to me that encouraging/allowing the city the spend 40-50 million dollars on this project is absurd. We sadly have not seen the fallout from the Covid 19 pandemic. People will be jobless, evicted and hungry. Not the time to proceed with an unneeded vanity project considering the scope of the crisis we will be facing.*

*I would like to know where the Councilman's office stands on this project.*
*Please feel free to forward my comments to LA DOT and Streets LA as I do not have an email address to include.*

*Sincerely,*

*Karen Hebert*

Subject: Re: Uplift Melrose

---

Hello, All.

Barbara has made quite a few claims and accusations in this email, and it would take quite some time to respond to them all. But I do want to highlight some inaccuracies. First, Uplift Melrose is most decidedly NOT an individual board member's road diet plan. Uplift Melrose rather is a proposed project by the **city**, led by the Bureau of Street Services with support by LADOT. Although I was not aware of the project until early August, my understanding is that the city initiated the project both to improve the pedestrian experience on Melrose and as a way to implement the Mobility Plan, which is the official transportation element of the General Plan and has been passed by the City Council. Second, the notion that board leadership intentionally left the community in the dark on the proposed plan is patently false. The item was placed on the agenda expressly to allow the opportunity for stakeholders and the board to weigh in, and multiple communication channels were used to share the information provided to us by the city including social media, our email list, and of course the agenda itself.

I am also dismayed by Barbara's dismissal of the voices of our stakeholders we heard at the board meeting. I am not somebody who believes the board should base its decisions purely on a tally of positive and negative public comments. The decision-making process is much more complicated than that. Our board members are all interacting with MCW stakeholders all the time and must evaluate all the engagement - in person, on social media, via email, and at our meetings - as well as their own experiences and analysis to make a decision. But to disrespect the voice of the stakeholders who took time to share their lived experience and opinions at our meeting by claiming they are mostly not of our community is inappropriate and would also seem to fly in the face of Barbara's stated desire to hear directly from stakeholders vested in the community.

Scott

> Karen,
>
> Let’s put some facts on the record.
>
> 1. MCWCC Board Chair Scott Epstein was contacted by Streets LA / LADOT about Melrose Uplift on August 3, more than a week before the 8/11 board meeting.
>
> 2. The Transportation Committee was not notified of this project, although I assume that the Transportation chair Michael Schneider was in the loop. Our committee could easily have held an emergency meeting to review the proposal but that would have required posting the Uplift Melrose proposal to the public. In fact, as a Transportation Cmte member I did not even get an email clueing me

in. There may have been a desire on the part of Board leadership to minimize the advance notice given to the public that this proposal would involve removing travel lanes. It certainly appears that way.

3. Board and Transporation Committee leadership have declined multiple requests over the past twelve months to canvas / engage the Melrose residential community about the prospect of removing travel lanes to facilitiate bike lanes and potentially also a center left turn lane. I personally served on the Transporation Committee and when last August Michael presented us with his own proposal for a Melrose lane reduction program I volunteered for the task force and offered to head up a team to go door to door in the community to hear what the people living nearby thought. I had called Kevin Nahai to learn the history of the situation, and Kevin told me the Melrose community had initiated the No Left Turn many years ago and the councilmember would be unlikely to support further changes without proof that the surrounding neighborhoods supported such change.

4. I was told in September 2019 by Michael that community outreach to guage interest in a Melrose re-design was premature.

5. When Michael's version of the road diet came before the Transportation Committee in Feb. 2020 I raised the issue of outreach again, without success.

6. When the motion for a Melrose road re-design was placed on the March 2020 board agenda, Nora Wyman decided to field a survey on NextDoor since MCWCC still had not reached out to the Melrose residential community. Just prior to the March meeting, Nora had gotten more than 200 respondents — from Melrose area residents — with more than 80 % voting NO on the idea. Board leadership was sent written proof of the survey and declined to discuss it or give it any weight. The board voted by a large majority to support Michael's melrose re-design to remove travel lanes to install bike lanes.

7. I have never taken a position opposing any version of re-designing Melrose. I volunteered for the task force last August because as someone who lives several miles away, I might enjoy biking up to Melrose with my son and enjoying that. But as I said to Michael Schneider last fall, for me "the community is king." I first needed to know how the Melrose residents feel about taking out travel lanes before I can support any proposal to do that. I don't care how people who live all around the City who might use the Melrose bike lanes once or twice a month feel about it. I care how the people who live on the adjacent streets feel and want to know if they will be bothered by having traffic re-routed to their side streets / parking on their streets.

8. At the March board meeting I questioned the propriety of having Michael, who I had just learned was the chairman of a polictical action committee — Streets for All — leading the charge on any proposal to radically alter a major roadway if that is the goal of his PAC. I said there is a conflict of interest betweeen furthering your personal agenda while the neighboring community has been kept out of the loop. The board leadership dismissed my concern.

9. Nora Wyman's NextDoor survey has in the meantime racked up hundreds more responses. I believe it is over 800 at this point. The per centage of Melrose area residents voting No on reducing travel lanes is still over 80%. Nora reported this at the August 11 board meeting during public comment. This alone should have raised a red flag to the board about proceeding. But it did not.

10. Before the 8/11 board meeting Michael Schneider mobilized people from outside the Melrose community to come to the board meeting to make public comment in support of Uplift Melrose. Other organizations that Michael and Scott are affiliated with were also enlisted to do the same. Thus, they were able to manipulate the public comment to appear to be a great amount of support for Uplift Melrose but that support mostly came from outside the Melrose community. While the Melrose community itself was kept in the dark.

11. I also note that Michael took action right after the board meeting to notify his special interest network about the LADOT. Streets LA survey about Uplift Melrose which served to generate "public support" for the proposal while never doing anything to get the word out to the Melrose community. We were told by Debbie Dyner that "2,000" responses to the survey had come in already, yet the Melrose community itself was still in the dark. Only now, with some of us, including Karen, making noise, is there any discussion of notifying the Melrose community.

11. Karen, you should also understand that per LADOT and Streets LA, the Uplift Melrose proposal grant application (due mid September) once submitted cannot be materially changed. If anyone gives you a vague promise of "we can always modify it later, let's not miss the submission deadline," you are being mis-led.

12. The publicly stated mission of the neighborhood council system is to facilitate the public's participation in governmental decision making. This whole thing has been an example—too often repeated at Mid City West on all manner of "projects," of the neighborhood council showing that it is primarily concerned with advancing the personal agenda of their committee chairs and board chair, and you should appreciate that they are the progressives and you are the "regressive" NIMBY who dpesn't want change.

It will take forever trying to make a left turn from Beverly Blvd. onto Fairfax in order to use Waring or Willoughby to travel East. And I suppose the same would be true on Highland Avenue.*

*This plan also calls for a reduction in parking. Parking on Melrose is currently extremely difficult, already burdening the local neighborhood streets and with a reduction, this will hinder existing business even further. Parking has always been the number one complaint from merchants and residence.*

*The existing sidewalks are in terrible shape. They*

*are broken, have pieces of missing cement and are uneven and cracked. I personally tripped on an uneven sidewalk and hit my head. An ambulance was called since I was unconscious for a few seconds.*

*The idea of additional lighting and landscape is great. The trees will beautify the area and the lights may have a positive impact on safety. I would like to support these changes along with much needed sidewalk repair.*

*I think that the following items need to be considered prior to moving ahead with this reckless idea:*

*1. traffic impact study for surrounding neighborhood streets*
*2. traffic impact study for Melrose itself when one lane is removed in each direction*
*3. the removal of parking spaces will cause an already bad situation to be worse*
*4. number of people who use bike paths in surrounding areas*
*5. Community/neighborhood meeting*

*Seems to me that encouraging/allowing the city the spend 40-50 million dollars on this project is absurd. We sadly have not seen the fallout from the Covid 19 pandemic. People will be jobless, evicted and hungry. Not the time to proceed with an unneeded vanity project considering the scope of the crisis we will be facing.*

*I would like to know where the Councilman's office stands on this project.*
*Please feel free to forward my comments to LA DOT and Streets LA as I do not have an email address to include.*

*Sincerely,*

*Karen Hebert*

Subject: Upligt Melrose: Outreach Assistance Needed

---

Good Afternoon All,
We have over 2,000 survey responses so far, with 75% in general support of the project improvements and overall positive feedback. However, we need to continue our outreach efforts for the next two weeks. Please see below what is needed.

**Merchant/Tenant Outreach:**
Per our conversation today, the BID will be conducting outreach this week to the merchants/tenants along Melrose Ave. I will be present with the BID when walking Melrose, to assist in disseminating the Uplift Melrose Project Brief information as well as having tenants answer survey questions in person. We will print the flyer and start walking on Wednesday with the BID.

**Neighborhood/Residential Outreach:**
In lieu of knocking on doors (COVID safety concerns), it is recommended to place postcard style flyers on doors/gates/fences, with the Uplift Project information and website/survey location. StreetsLA will prepare these 5x7 format postcards by the end of the day tomorrow. Are there any resources the BID and/or Neighborhood Council may have for printing these postcards? In addition, as our resources and staff are very limited right now, can the BID and/or Neighborhood Council assist with flyering the neighborhood? We need to discuss the radius of flyering as well.

**School/Religious Organization Outreach:**
In order to make our outreach efforts as efficient as possible, can the BID or Neighborhood Council reach out to both Melrose Elementary and Fairfax Highschool, as well as local Orthodox Organizations and Synagogues. We would like to hold one meeting (via zoom) to share the project and field any questions/concerns. If this can be arranged for no later than next Wednesday August August 26th - that would give us enough time to compile data.

**Melrose Action Committee:**
Will it be necessary to meet with this group or can the Uplift Melrose Project Brief/Website be shared instead?

***Note*** We will be updating our Uplift Melrose Project Website, to include updates on the BID's proposed future parking mitigation measures (CVS Structure, Fairfax High, Melrose Elementary etc), as well as the traffic mitigation measures to the surrounding east/west streets (Willoughby, Waring, Clinton, Rosewood and Oakwood). We have been working with Tim Fremaux at DOT and will be providing a map that shows the mitigation measures to be included in the grant funding request.

Regards,

**Alexander J. Caiozzo**
***Until further notice, Design-Build staff will be working remotely. Please be assured services to the City and our residents will continue in the safest manner possible.***

The Melrose BID will print the neighborhood cards. Kim's got that dialed in and it's not expensive. She can also set up a distribution service. Can you prepare camera-ready copy? Maybe we just use your flyer format and customize it for the neighbor group?

BID has FFHS and Melrose Elementary covered. Pierson has the HS. I've got the Elementary School.

Deny & Sylvia have Temple Young Israel and Joe Misrahi. Also any other local jewish groups.

Isack has Hancock Park and the Shabat on Willoughby. And he may be able to get us support from the group that does the Paramount event.

RE: Melrose Action Alerts: Peter Nichols appeared at MCWCC and asked for a project EIR to be completed. That will be done. Also Joan Fitzpatrick commented that the project seemed "too bicycle oriented" and the "neighborhood needs must be considered." This will be done in EIR. As I understand it, the neighborhood will be able to determine the means and location of neighborhood traffic protection measures. That seems to address this group for now. Should make them happy. I believe this project will have a positive effect on local residential property values.

Hi Donald,

StreetsLA can confirm, but I do not believe this project would require an EIR. It would most likely be categorically exempt under CEQA. Environmental documents would be produced but they would be far simpler and more concise than an EIR.

Probably just an ND.

Here is a good cheat sheet for the various types of environmental documents. Since the state switched from level of service to vehicle miles traveled, reduction in traffic flow capacity is no longer a significant impact.

>> **Neighborhood/Residential Outreach:**
>> In lieu of knocking on doors (COVID safety concerns), it is recommended to place postcard style flyers on doors/gates/fences, with the Uplift Project information and website/survey location. StreetsLA will prepare these 5x7 format postcards by the end of the day tomorrow. Are there any resources the BID and/or Neighborhood Council

may have for printing these postcards? In addition, as our resources and staff are very limited right now, can the BID and/or Neighborhood Council assist with flyering the neighborhood? We need to discuss the radius of flyering as well.

**School/Religious Organization Outreach:**
In order to make our outreach efforts as efficient as possible, can the BID or Neighborhood Council reach out to both Melrose Elementary and Fairfax Highschool, as well as local Orthodox Organizations and Synagogues. We would like to hold one meeting (via zoom) to share the project and field any questions/concerns. If this can be arranged for no later than next Wednesday August August 26th - that would give us enough time to compile data.

**Melrose Action Committee:**
Will it be necessary to meet with this group or can the Uplift Melrose Project Brief/Website be shared instead?

***Note*** We will be updating our Uplift Melrose Project Website, to include updates on the BID's proposed future parking mitigation measures (CVS Structure, Fairfax High, Melrose Elementary etc), as well as the traffic mitigation measures to the surrounding east/west streets (Willoughby, Waring, Clinton, Rosewood and Oakwood). We have been working with Tim Fremaux at DOT and will be providing a map that shows the mitigation measures to be included in the grant funding request.

Regards,

**Alexander J. Caiozzo**

Thanks for this, Tim.

Maybe someone here could confirm that I am correct in my understanding that the project would in fact be exempt from CEQA due to the fact that it provides bicycle infrastructure on a roadway designated in the Mobility Plan 2035 Bicycle Enhanced Network?

Best,
Jeff

Jeff,

Prior to the switch from LOS to VMT, we would use a specific CEQA exemption for bike lanes to exempt projects that reduced traffic lanes to install bike lanes. However, big capital projects that involved protected bike lanes were in a gray area under that exemption. That is why we did an EIR for the MyFigueroa project. But that is no longer needed. Regardless of the purpose of the

lane reduction, increasing delay or reducing capacity for motorists is no longer is a significant impact under CEQA.
